MANY Democratic members of the House will be wishing before long that they had spent more time in their seats.

MR. BLAINE is hardly sitting up nights to worry because more delegates have not been instructed for Mr. Harrison.

TAMMANY Hall, the much abused New York organization, has contributed \$5,000 towards building the Grant monument. Now let some of its abusers outdo it in patriotism.

THE Canadian government having worked the reciprocity racket for all it was worth in that country, Mr. Harrison has taken his turn at the crank to grind out a little partisan grist.

Republican conventions is either a very courageous man or a candidate for the insane asylum.

AGAIN the story is started upon its round that Senator Sherman intends retiring from public life. The Sherman family is not of a retiring disposition, and the Senator will hardly be an exception.

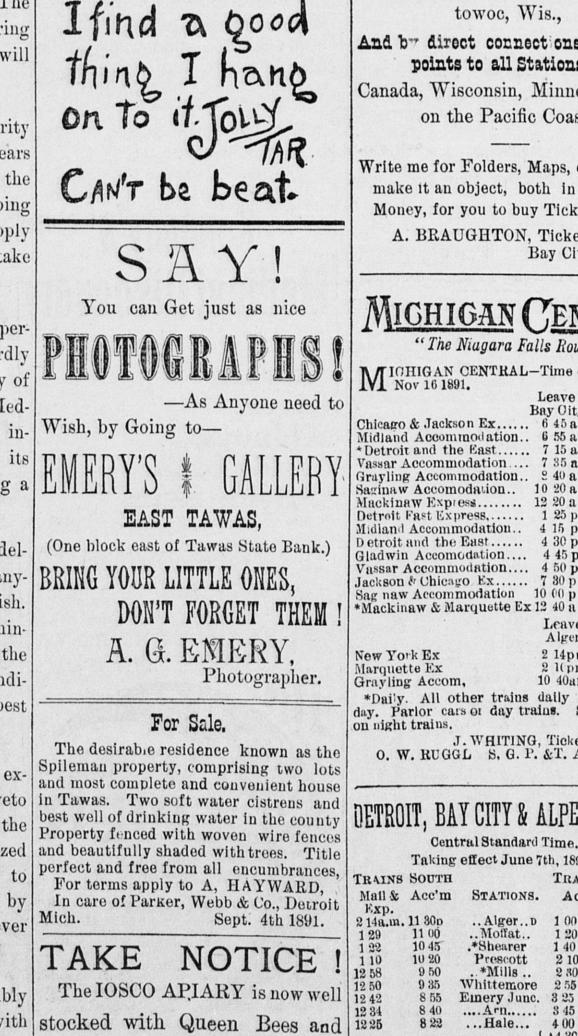

According to Budhist authority the world will last 427,000 years longer. If that be true what is the good of fretting about things going slow. Rather let us lay in a supply of ice and palm-leaf fans and take things coolly.

Col. INGERSOLL has a very persuasive tongue, but he will hardly succeed in persuading the faculty of that New York Post-Graduate Medical School that it should in the interest of "human rights" ruin its prosperous business by admitting a Negro.

IF the mania for uninstructed delegates continues, it will be anybody's fight up to the very finish. One advantage in sending uninstructed delegates is, it leaves the convention free to select the candidate who in its judgement is best qualified to win.

REPUBLICANS pretend to have expected that Gov. Flower would veto measures intended to take away the political power so long monopolized by New York Republicans just to show that he was not controlled by Senator Hill. Bosh! They never expected anything of the kind.

The new burner, which has been in course of construction for the past two months is completed, and is now doing duty, as the great volumes of smoke issuing therefrom testifies. This introduces something new in the line of burners in these parts, being constructed wholly of iron-two thicknesses-with a water chamber between for the purpose of making steam to run the salt block. It will necessitate the employment of about 30 less men, and consequently is a great economizer.

A full stock of logs has been secured for the summer's cut, and it is expected the mill will run very steadily this season.
