### Dental Notice.

I have resumed my dental practice in East Tawas, having dispensed with the services of my operator, Dr. Olp. I have the formula for the best local anaesthetic for the extraction of teeth. It is used by all the leading dentists in large cities. It is harmless, and the majority of the teeth can be extracted without pain.

New ideas in crowns and bridge work. Sets of teeth made that will fit. All kinds of filling inserted. You may rely on having good work done at a modern cost.

Respectfully,  
Dr. J. H. Borz, Dentist.

## A Kind of Farming that will Pay.

One point needs to be emphasized at this time. Farmers should inquire more closely into the wants of local markets, and try to meet their requirements. It is surprising to what an extent the interior towns depend upon large cities—perhaps 30 or 50 miles away—for products which should be supplied by nearby farmers. In the more thickly populated parts of the country, fresh vegetables, poultry, eggs, meat and dairy products are always in demand, at fairly remunerative prices, yet how little of the money paid for these commodities goes into the pockets of farmers, who should receive it all. In fact it is no uncommon sight to see farmers buying for their own tables, vegetables which by a little forethought might have been raised on the farm and made a source of profit.

We are not advocating the idea that the general farmer should be a market gardener, but as well-provided garden or "truck-patch" should be an adjunct to every farm. It should be an unfailing source of good things for the home and a profit to its owner. The farmer engaged in growing staple crops has little time to devote to other matters; but at present low prices, might it not pay better to grow less wheat, potatoes and corn, and give more attention to producing choice vegetables, to improving and increasing the flock of poultry, and to supplanting scrub stock with improved breeds of cattle? Early and late vegetables, fresh eggs, poultry, and choice butter are always in good demand, and farmers should produce these commodities, at least to such an extent as to supply their own families and the demands of neighboring market or mining towns.—Orange Judd Farmer.

## The Home Training of Children.

Mothers, remember that upon the home training of your children depends their success in after life. Their destiny, in a measure, lies in your hands. Begin this training early while the mind is susceptible and plastic. That which is learned early in life is never forgotten. The first thing taught should be obedience, and if this lesson be well learned, you may teach them whatever else you may desire.

A good example is the best teacher. Precepts are useless if contradicted by our daily living. If we are slaves to our evil passions, how can we expect to teach our children self-control? If we sometimes speak or act an untruth, we cannot expect them to be truthful. Do not scold, do not use harsh words, for they will surely be reflected in your children.

A child may be influenced at a very early age by good literature. A good story well chosen sometimes has more influence in overcoming a fault than any other means that could be used.

Train them to helpfulness about the house, to sweep and dust and take care of their own clothing. This teaches them habits of industry, neatness and self-reliance.

Give them a corner in the garden, and let them raise flowers and vegetables, teach them to watch the unfolding of the blossoms, and the gradual growth of the plants, thus giving them their first lessons in botany and instilling within them a love for the beauties of nature. Instruct them as to the names and habits of the different birds and insects.

How many beautiful lessons may be taught the little ones from nature, if the heart of the mother be attuned to her noble mission!—A Mother.

## ADAM AND EVE'S FIRST FALLING OUT

occurred over what they ate. Modern housewives, take warning. Don't listen to tempting voices—use your own judgment—choose for yourself and husband the proper food.

## CALUMET BAKING POWDER

is the wisest choice, for many reasons. In the first place, it is pure—perfectly pure—\$1,000 to you if you find that it is not. A pinch of it has power enough to do a pound of leavening.

In point of price it certainly will suit you.

JAMES LA BERGE, EAST TAWAS.

To all appearances McKinley has the lead for the republican nomination in the St. Louis convention. But then, it is nearly four months before the convention meets.

When the republican state convention meets May 7, it will be again demonstrated by a machine nomination, that the "dear people" do not control republican conventions, and that Mr. Pingree will of necessity have to make his race for governor as a "stump" candidate.

McKINLEY has again expressed his opposition to the restoration of silver to the place it occupied before the crime of 1873. Of course. He is the candidate of the monopolists. They have bought him body and soul, and he would not be getting the use of their millions to help on his boom if he was not in favor of everything they say.—Potoskey Democrat.

The truly good John Wannamaker, one of the high priests of "protection," has been convicted of violating the alien contract labor law and will have to pay a fine of \$1,000. This violation of law made for the protection of American labor by so prominent a protectionist as Mr. Wannamaker, subjects him to the charge of inconsistency.

The bicycle manufacturers are expecting to sell about 800,000 of those vehicular contrivances this year, the aggregate cost of which to the purchasers will be not less than \$50,000,000. The rapidity with which the wheel has gained popularity is one of the striking facts of current history, and it has manifestly come to stay.—St. Louis Globe-Democrat.

Under the caption "Republican Prospects" Harpers Weekly reviews the do-nothing policy of the present congress, and concludes with the following: "Never since the close of the civil war has the Republican party had a finer opportunity to render great service to the American people than by taking in hand the problems of the day honestly and fearlessly. Never has it had a better chance to win the support of those citizens whose political action is determined rather by their sense of public duty than by party spirit. But never has it appeared in so repulsive a state of moral degradation and so unworthy of that support.—Some time ago it seemed impossible that the Republican party should be defeated in the coming presidential election. It seems impossible no longer.

Spring Care of Lawns.

In many sections of the country it is customary to cover the lawns which surround the dwelling houses with stable manure, with the view that the spring rains may wash the fertility contained in it into the soil. While this process tends to enrich the lawn, it at the same time makes it very unsightly and objectionable in many ways, as the manure generally brings many weed seeds in the lawn, and unless it is very fine, it makes the growth of the grass uneven. For small lawns, especially, a high-grade complete chemical fertilizer prepared for lawns is far preferable, and produces an immediate effect. If it is not obtainable, put on unleached wood ashes and fine bone meal.—Orange Judd Farmer.

Live Stock Points.

What to do with idle horses in winter is a hard problem. A good plan in districts where the ground is not frozen solid to the depth of several feet is to use them to do the hauling while you dig a pond for irrigation purposes in summer. Many farms have a brook or spring or springy soil in a place high enough to afford considerable fall. At a convenient place dig a good sized pond. Cover the bottom and sides with clay, water cement, or wall it, as you like best. It will fill full and stay full. In the hot dry weather of summer you can connect it by hose pipe with your farm garden or berry patches and raise bounteous crops in spite of drought. Thus your horses will more than pay their way in winter.

The kind of stock that you can't keep because it is so good that buyers snap it up at once is the kind that you want to raise every time.

Breed for size and speed in the American road horse. There is no better in the world.

Shropshires and Oxford Down sheep have wool growing well down on the legs, while the Southdowns have smooth, hairy legs.

There is many a time good work for farm horses in winter, if their owners will just hustle around and find it, either at home or in neighboring towns.

Tennessee is rapidly rising into fame as a live stock state, especially in the production of mules and trotting horses.

Sows bred at 12 months old will bring vigorous litters. It does not pay to breed them till they are at least 8 months old.

 The person who furnishes items to a newspaper is always a valuable friend to the editor. Many persons hesitate about sending personal notes to the newspaper regarding the movements of friends lest the newspaper man should think them too anxious to see their names in print. He will think nothing of the kind, but on the contrary he is glad to see such notes. Many seemingly unimportant items when printed are news to a large number of readers.—*Ex.*  
 Thursday, April 2, is the date set for the grand Easter opening at Mrs. Hurlburt's millinery parlors. The ladies of Tawas City and vicinity are cordially invited to be present and inspect the finest line of spring millinery ever shown in Iosco county. All the latest styles in hats and bonnets, with trimmings to match every complexion. It is with pleasure that Mrs. Hurlburt announces that she has secured the services of Miss Farquhar, of Detroit, who will have charge of the trimming department.  
 Mrs. Alexander Henderson, a former resident of this city and well known here, died at Bay City last Friday, after a lingering illness of several months. The funeral services were held at the residence of her brother, James B. Dufty, of Bay City, last Monday and the remains taken to Caseville for interment. Mrs. Henderson leaves six children to mourn her loss. The family have a large circle of friends in the Tawas who extend them their sympathy in this hour of sad bereavement.  
 Everyone will be deeply interested in the excellent offer made by a family paper published at St. Paul, Minn. To those sending them the names of five friends who buy seeds, accompanied by 10 cents (in stamps or coin) they are sending the famous Dolly Varden mixture of over 50 choice flowers, and the Royal mixture of 20 varieties of sweet peas, or five packages of vegetable seeds: radish, onion, beet, tomato and cabbage. In addition to this they give a three months subscription to the American Home and Garden, a bright 16-page illustrated journal devoted to the garden and household—the only paper of its kind in the entire Northwest. State which collection you want and the seeds will reach you by return mail. For 20 cents in stamps all will be sent. Address the American Home and Garden, Newspaper Row, St. Paul, Minn.
