Under the law as adopted in 1885, the sum of \$20.000 was appropriated for "the purpose of compiling a series of text books for the common schools. An additional sum of \$150,000 was set aside for the purpose of establishing a plant purchasing of material, and payment of salaries. In 1887 the further sum of \$165,000 was appropriated for the same purpose. Other and additional appropriations have been found necessary from time to time in or ler to carry on the work and provide suitable books. The state, of course, ownthe copyrights and the plants for binding and printing, California, according to figures compiled by the secretary of state, has appropriated \$405,000 in all for printing textbooks. There seems to be other items not included in the sum amounting to \$73,669. Very much of this large um has been refunded to the treasury from the sale of books. Theory of the state board fixes eight years as the time in which the estimated sales of books would pay for themselves and also for the plant. As against this theory are the facts that the books, as all school books must. need frequent revision, that the plant will wear out, and that the number sold does not reach the estimate.

D. F. Witter, a member of the Capital Park school board, Iowa, has this to say regarding the free textbook system: We have had free text-books in our district for eight years. We adopted the system long before it was legal to do so, but our people were all favorable to it, and we did not far the result. The entire trouble would have been avoided had the board of supervisors appointed their committee to meet the council, before they proceeded with their sewer, instead of after they had lost their suit. The city council was never opposed to a sewer for the county buildings bit always favo & le. This fact was fully explained to the committee (and to a majority of the supervisors, who was also present) at the council meeting Tuesday evening. The entire trouble seems to be that the board went on the advise of one man, believing he was familfar with the law and was giving them good advise. The mistake has been demonstrated. THE Salt Lake Herald appropriately suggests that if a solid gold statute is made of President McKinley for the Paris exposition, another of solid brass should be made of Mark Hanna. It is only fair to give the foreigners a chance to see the image of the creator as well the creature .- Midland Sun.

Times are so lively, and so full of sensations just now, that the coming contest announced for Mark Huna's seat in the senate is not receiving so much attention as awaits it by and by, Meanwhile the redoubtable Mr. Han na is said to have just formed a pigiron trust, and to be attending carefully to bond projects and other sorts of profitable business.

A STATEMENT prepared at the pension office shows more than \$10,000,000 have been legally paid by pensioners to pension attorneys during the last seven years. Just how much the attorneys have illegally gotten from the pension rs is more or less uncertain, but there is data enough in the pension office to show that the illegal exactions more than equal the legal fees. It is not surprising that the pension attorneys should be able to maintain a powerful lobby.

According to a statement from Newport News under date of Marca 13, Captain Gronmeyer, of German steamship Castila, declares that he saw submarine mines laid in the har bor of Hayana two years ago. Two wires, he says, were attached to each nine, one being taken to one bank and one to the other, where they were attached to electric batteries, ready to be fired at the will of the officers who had charge of them. And new it appears that seven of these minies have been actually found.

It is to be borne in mind that Spain is such a little thing she could be picked up and said out in Texas, and Texas would still have 76,686 square miles of territory to spare. Four of our states taxen to gether have n greater population than Spain has. and their people are far more intelli-gent, too. Only one nation in Europe is lower in scale of entightenment than Spain. Sixtyeight per cent of her population can neither read or write, and her credit is about as bad as it can be. The higgest thing in company, open only to employes of Spain is her national debt. - Boston Herald.

DR. GOMBERG, of the chemical laboratory of Ann Arbor, has jes published two articles, each announce ing the production of a new chemical compound of significance in chemical investigation. Both the papers are now putlished in Germany, and wil be shortly is ued in this country. Both belong to a field of work which the author had entered upon before he went abroad, labored upon in Munich and in Heidelberg and now holds under investigation here. One of the articles appears in "Liebig's Annalen" and the other in the journal of the chemical society at Be. lin.

or not it looks as if peace for the world were coming in a peculiar way. Russia has just ordered the expendi ture of \$70,000.000 for warship-, and Great Britain is to patch up and extend her navy to the extent of \$137,-750,000 France has provided for expending \$161,000,000 for naval purposes during the next eight years. Perhaps the end will be that explosives will yet reach such horrible perfection that no great nation can attack another, especially on its own land without complete extermination of the invading forces. THIS week will probably determine enough to retain the undivided support of congress in his Spanish policy. ity of the tax-payers of the county. It will all depend upon the action he takes on the report of the Naval Court of Inquiry, which he now has. It he acts promptly and properly on that report and then sends the report and a statement of what he has cone to congress, he will be squarely and unanimously supported by congress to any extent. But if he plays into Spain's hand by making a weak demand and delays the matter by keeping the report away from Congress, gere will be trouble right away. A Firge majority of both branches of congress have made up their minds that Senator Proctor was right when he said that no settlement of the Cuban question could possibly be satisfactory that left the island under the Spanish flag, and if Mr. McKinley doesn't lay his policy along that line, he will probably find congress taking the matter out of his hands. He can control the situation if he does the right thing; othewise not. Much will depend upon his first move, which should be made this week .-Washington dispatch.

It is now proposed by the Sons of Veterans to make good their professions of devotion to the principals for which their fathers fought by founding a great National Military College dedicated to patriousm and to be a living monument to the memory of the soldeirs of the Union Army. This great work is receiving the commendation of G. A. R. and loyal people everywhere. Through education along the lines of civics and patriotism it it is proposed to bring about a higher standard of citizenship and through good citizenship to have good government. This is a laudable enterprise and these loyal young men will receive the hearty support of ail good people. A committee has been appointed to devise so ie feasible plan of organization and report the same to the National Encampment which neets at Omalit next September. The committee consists of A. L.
