CONNINE ENDORSED

By the Iosco County Republican Convention.

Prof. J. A. Campbell Nominated for County School Commissioner.

The republican county convention was held at the court house Tuesday and every township was represented by a full delegation.

W. L. M. Blackley, of Oscoda, was elected temporary chairman and B. F. Slingerland, of Alabaster, temporary secretary. After the appointment of the usual committees the convention adjourned until 1 o'clock.

On reassembling the temporary officers were made permanent. Fred Yockey, of AuSable, and F. F. Taylor, of East Tawas, were appointed tellers.

A motion was carried that the chair appoint a committee of five to make the selection of eight delegates to the judicial convention and three to the state convention. The committee retired and agreed upon the following delegates, who were reported to the convention and elected:

Judicial—G. A. Prescott, Tawas City; Selig Solomon, AuSable; M. Butts, Burleigh; John Sullivan, Baldwin; J. W. King, Tawas City; R. Wade, Tawas; F. E. Hess, Burleigh; Alva Wood, East Tawas.

State—C. R. Jackson, East Tawas; P. E. Shien, Tawas City; C. S. Pierce, Oscoda.

The delegates to the judicial convention were instructed to support M. J. Connine for circuit judge.

For the nomination of county commissioner of school, A. R. Weir presented the name of Prof. C. M. Jansky, of AuSable; M. Butts presented that of Prof. J. A. Campbell, of this city, and D. E. Emerson that of Rev. A. C. Kay, of East Tawas. Two ballots were taken. On the first, Prof. Campbell received 17, Prof. Jansky 9, and Rev. Kay 9. The second ballot resulted in the nomination of Prof. Campbell, by a vote of 22 to 11 for Mr. Jansky and three for Mr. Kay.

Prof. Campbell was called for and in a few well chosen words accepted the nomination and thanked the delegates for their support.

M. J. Connine was then called for and after much urging addressed the convention for a few moments. He thanked them for the action taken and gave them his promise, if elected, to use his best endeavors to administer justice to all classes with equality. His remarks were frequently interrupted by applause and warmly received.

The convention then adjourned.

Michigan Dept. G. A. R.
Adj.-Gen. C. V. R. Pond, of the Michigan department of the G. A. R. has submitted his annual report, which shows the present membership to be 15,531. This is a net loss of 300 since Jan. 1, 1898, but as the death loss has been 348 an actual gain has been made. There were received by muster during the year, 543; by transfer, 252; by reinstatement, 553. Four posts have been organized and three have surrendered their charters. The losses in membership during the year have been by suspension, 954; by transfer, 210; deaths, 348; honorable discharge, 69; disbanded posts, 58.

Over \$2,000 has been expended from post funds for the relief of more than 200 families. This does not include a large relief given by individual donation of the members of the order and by the W. R. C., aggregation over \$5,000 additional. An effort will be made to secure the passage of a law to prevent persons not members of the G. A. R. from wearing buttons and badges of the order.

His Experience.

Iosco county has been pretty well worked by log buyers this winter. Timber is getting rather scarce and the demand has been exceptionally good, and no farmer, however remote from civilization, has escaped a visit from the man with rule and marking hammer.

These festive buyers often accumulate in members around the big box stove in the village hotels, where they spend the long winter evenings in relating experiences, which are, in a great measure, the product of a vivid imagination, although some of them have an element of possibility and occasionally we hear one which has an element of truthfulness. The following is said to be authentic:

A buyer for a large lumber concern happened to bring up one night at a farm house some considerable distance from any hotel or boarding house. The log man was very weary and ask permission to remain over night. This was granted, although the farmer informed him that as their sleeping accommodations was limited to one bed, it would be necessary for the log buyer to lay strictly in one direction. This was agreed to and the farmer's wife made the gentleman retire to the barn while she located herself on the western one-third of the bed, her husband then took up his quarters in the central oasis and the buyer stretched himself out on the outer edge, bracing himself with his marking hammer. He reports a very comfortable night, but says it got a little cold after the occupant on the other side of the bed had rolled over two or three times taking the bed-covering with her each time.

At its Cash Value.

A Lansing dispatch says: A bill was introduced by Rep. Gustin to amend the general tax law, abolishing township boards of review and county equalization, seeks to solve the problem of listing all the property in the state and assessing it at its cash value. "The difficulty with the present law," says Rep. Gustin, "is that the very provisions of the present law contemplate that the enactments in reference to the assessment of property at its cash value will not be complied with; otherwise, there would be no necessity for county equalization, etc."

The bill provides for a county court of review, to be composed of one member appointed by the governor and four appointed by the board of supervisors, no two of whom shall be residents of the same assessing district.

"If we can enact a law," said Rep. Gustin, "which will take away the incentive for a supervisor or assessing officer to undervalue his property in order to escape the state and county tax, and at the same time showing favoritism to influential citizens by not listing their property or undervaluing it, we could solve this whole question. There is no question that if all property in the state was listed and at its cash value, the question of unequal taxation would be overcome."

Democratic State Convention

The democrats of Michigan will meet in State Convention at the Academy of Music, in the city of Kalamazoo, on Wednesday, March 8th, 1899, at 12 o'clock noon, for the purpose of nominating a candidate for the office of Justice of the Supreme Court of Michigan, and two Regents of the University, and to transact such other business as may properly come before the convention.

According to the rules adopted by the Democratic State Convention held in Detroit in 1890, and since followed, every county in the state is entitled to one delegate to the State Convention for each 500 votes cast for governor at the last general election, and one additional delegate for a fraction of not less than 250 votes. But each county is entitled to at least two delegates. All delegates must be residents of the counties they represent.

The delegates from the several congressional districts are requested to meet in caucus at ten o'clock on the day of the convention in such places as may hereafter be designated by the State Central Committee, for the purpose of selecting candidates for recommendation to the convention for the following nominations, to-wit: One chairman of the District Delegation; one vice-president of the Convention; one member of the Committee on Credentials; one member of the Committee on Permanent Organization and Order of Business; and one member of the Committee on Resolutions.

In view of the increasing danger which threatens our country and its institutions, we appeal to all patriotic people, regardless of party, to lay aside all minor differences, and unite in protecting the rights and liberties of the people from the encroachments of a tyrannical majority. We believe that the efforts of reform would be more effective if there was a general essential principles were not pitting brother against brother in different political organizations. Therefore we cordially invite the members of the Union, Silver and Peoples Parties; all those who have voted in the past with the Democratic Party; all those who subscribe to the principles set forth in the Chicago Platform, and all others who are desirous of associating with the party in the future to participate in the caucus for the election of delegates to this convention.

DANIEL J. CAMPAU,

CHARLES S. HAMPTON, Secretary.

H. G. COBURN, Assistant Secretary.

Under the above call from the Democratic counties will be entitled to representation of three delegates each.

Democratic County Convention.

The Democratic County Convention for the county of Iosco will be held at the Court House in Tawas City, on the 1st day of March, 1899, at 11 o'clock a. m., to elect 3 delegates to attend the Judicial Convention, to elect 3 delegates to attend the State Convention, to nominate a candidate for County Commissioner of Schools, and to transact such other business as may properly come before it.

The several townships and wards will be entitled to one delegate for each 500 votes cast for governor at the last general election, and one delegate for one fraction of 25 such votes. Under this call, the townships and wards will be entitled to delegates as follows:

Ausable Township	2

THE 35th Michigan Vol. Inf. now at Camp McKenzie, Ga., and all other volunteer regiments now stationed in the United States, have been ordered discharged by the war department.

We would urge upon democrats generally the necessity of sending full delegations to the approaching county convention. Keep your organization active in this way and thus be ready for the campaign of 1900.

The democratic county convention will be held at the court house March 1st. It is desired that every ward and township be represented by a full delegation. There are several important matters for consideration.

It has been passed at the session of the legislature which only 52 words. The act is in the name of Ale Buurema of Ale Buruma, the change being of the omission of a u and nothing more.

The States senate has appropriated \$1,000 for a suitable erected in Havana for the sailors who perished. This is another that will hurt the *Adrian Times*.

"SEPARATED as we are by a world of water from other nations, if we are wise we shall surely avoid being drawn into the labyrinth of their politics and involved in their destructive wars."—Washington.

THE "Oldest Inhabitant" will now look to 1899 as the year of the coldest "cold wave," and it will be years before he can delve far into local history. "When he was a boy does not cut much of a figure in these progressive times."—Muskegon News.

THE cruelty of President McKinley in sentencing Brigadier General Eagan to accept a six years' furlough with full pay leads us to believe that he will still further punish him by restoring him to duty and then promoting him to major-generalship.—Silver Knight Watchman.

Two years ago Representative Hammond introduced an anti-trust bill, which made it a felony to be connected with any compact formed for controlling the price or output of any commodity, but the measure failed to pass the house. He has again introduced it and proposes to push it through, if possible.

Imperialism is gradually giving way to practical common sense. In stead of defiantly asking "who shall pull down our flag" in the Philippines, Mr. McKinley is intimating a purpose to give the Filipinos a chance at self government and to let them alone when they stop fighting and show themselves fit to be trusted.—N. Y. World.

THE libel law will come up for consideration this year, Representative Crosby having introduced a bill to amend it so that juries may not allow damages for injured feelings, but must confine their verdicts to actual damages sustained. The injury to one's feeling is so difficult to estimate that the average jury overshoots the mark.

It looks very much as if the electors of the state will be given an early opportunity to vote on the question of amending the constitution so as to extend the right of suffrage to women. The house committee on state affairs has recommended the passage of Dr. Howell's joint resolution providing for the submission of this resolution, and the house sentiment favors it.

THE scheme to make this government pay a private company a subsidy of \$100,000 a year for 20 years for the use of a Pacific cable, was thought to have been knocked out sometime ago, but it is on deck again as an amendment to the Sundry Civil bill, proposed by Senator Frye. It cannot be knocked out in the senate on a point of order as the Nicaragua canal bill was in the house nor can the same tactics be followed in the house when the bill goes back with the senate amendments. That is why the senators who are trying to get the Nicaragua Canal bill through have had what is practically the Hepburn bill added to the river and harbor bill, as an amendment. They have not undertaken an easy job as it is understood that Czar Reed has declared his intention to prevent canal legislation, no matter what has to be held up to do so, but the senators are confident of getting the best of the Czar, who is said to oppose the canal only because he is unwilling that work should be begun upon it under the McKinley administration.

An Infamous Subsidy Bill.

The more the Hanna-Payne shipping bill is studied, the more audacious it appears to the students of American marine. The drain, which the subsidies would produce upon the national treasury during the full period of the law, would, according to conservative estimates, equal one-half of the debt of the civil war. This alone is sufficient to condemn the bill, but it is merely one of the objections. The bill proposes to pay rich subsidies to all vessels of a certain classification built during the

first 10 years of the law, and the builders who get their ships afloat during the 10 year period are assured of the bounty for 20 years thereafter. After the expiration of 10 years ship-builders will be cut off from the bounty. It will be impossible and foolhardy for vessel men to build unsubsidized ships and attempt to compete with bounty ships which can make a good profit, even if they go one way in ballast. American shipping is now handicapped because the ships of other nations are subsidized, but it would be infinitely worse if the people of the United States should bind themselves to pay subsidies amounting to \$1,500,000,000 to the Standard Oil monopoly and other enormously rich concerns during the next 30 years and build up a domestic shipping trust which would destroy all competition during the next 50 years.

It is by all means advisable that the shipbuilding industry should be encouraged in order to place the commerce of the nation on an equal footing with Great Britain, Germany and France, but it is not necessary to pass the Hanna-Payne shipping bill, which appears to be inspired by private greed. There is a rumor that a big syndicate of American capitalists has placed conditional orders in foreign shipyards which will take effect upon the passage of the subsidy bill. But the people of the United States are not in such desperate straits for ships that they must mortgage themselves for the next 30 years in order to fatten a few American capitalists and the shipyards of Great Britain.—Detroit Tribune.

Pig Feeding Experiments.

Experiments recently conducted at Wiltshire, Eng., under the auspices of a local committee formed for the purpose of ascertaining the best combinations of foods for pigs, have gone to show that the best results so far as increase in weight was concerned, were obtained from a mixture of corn meal and separated milk. Subsequently the carcasses of the animals fed upon the different mixtures were examined by a number of experts, and their relative qualities were classified as follows—perfection being representative by 1,000: Basley, meal and bran, 990; barley meal and separated milk, 988; barley meal alone, 974. Of the corn mixtures, corn and bran gave carcasses which were valued at 964; bean meal, 951; corn with separated milk, 939; and with pea meal, 908. Commenting on the results obtained in respect to separated milk, the deductions which have been made are to the effect it is the most valuable of the additions made to either corn or barley; nothing has a greater effect on the weekly increase; there is less loss of weight in killing; and it improves the quality of the meat to a greater extent than does anything else but bran. The highest average given in weight was made by the pigs fed on barley meal and separated milk, and next to this came the lot fed on corn meal and separated milk. Barley meal in every instance gave a greater increase than corn meal, either when used alone or in conjunction with other foods. The low value of the quality of the pigs fed on the corn meal and pea meal was due to the fact that a large number of the pigs so fed increased in weight very slowly, and consequently were sold as rather small pigs. The quality of those which did well during the fattening period was about equal to those fed on corn meal and bran. A great falling off in the case of all the pigs fed on corn was that they carry excessive fat. Taking the number in thousands and as representing an ideal pig food, the various mixtures employed in these experiments rank as follows: Barley meal and separated milk, 903; corn meal and separated milk, 877; corn meal and bean meal, 590; barley meal alone, 519; corn meal and pea meal, 486; corn meal alone, 484; barley meal and bran, 449; and corn meal and bran, 404.

Not one child dies where ten formerly died from croup. People have learned the value of One Minute Cough Cure and use it for severe lung and throat troubles. It immediately stops coughing. It never fails. Dr. G. S. Darling.

If you expect to conquer in the battle of today you will have to blow your trumpet in a firm determined way. If you toot your whistle only and lay aside your horn, there is not a living soul will know that you were ever born. The man who owns his nose is the man who plows all day and the man who keeps a humming is the man who's there to stay. But the man who advertises with a sort of sudden jerk is the man who blames the printer-man because it won't work. The man who gets the business uses lots of printers ink—not a clatter, not a spatter, but an ad that makes you think—and plans his advertisements as he plans his stock and the future of his business is as solid as a rock.

The "big hat" question has been successfully solved in a southern Michigan village. The ladies and gentlemen are seated separately in church, the ladies on one side and the gentlemen on the other. The idea is that if the woman insists upon wearing high hats they will discommodate no one but themselves, while the men will have an unobstructed view of the pulpit.

As the season of the year when pneumonia, la grippe, sore throat, coughs, colds, catarrh, bronchitis and lung trouble are to be guarded against, nothing "is a fine substitute," will "answer the purpose," or is "just as good as One Minute Cough Cure. That is one infallible remedy for lung, throat or bronchial troubles. Insist vigorously upon having it if "something else" is offered you. Dr. G. S. Darling.

Washington Langworthy, of Petoskey, formerly of East Tawas, returned to his home Wednesday. About six weeks ago Mr. L. came to East Tawas to consult Dr. F. C. Thompson. The doctors at Petoskey had pronounced him incurable and told him he was suffering from a cancer of the stomach. After an examination Dr. Thompson told him that it was not a cancer and that he could be cured, and commenced a course of treatment as a result of which Mr. L. is now in the best of health. Dr. Thompson is establishing an enviable reputation in the treatment of chronic stomach and kidney troubles. He has the finest chemical outfit to be found outside of Detroit and by a special study of these diseases he is meeting with excellent success.

Ably Debated.

Twelve young ladies of our high school gave a public debate Tuesday evening of this week. Subject debated:—"Resolved that the Indian has been more abused than the Negro."

The ability of these students in this new field of labor can not be questioned by the many friends that manifested an interest in this work by their presence at the school house that evening, as the discussion was a good one, showing soundness in reasoning, breadth of thought, and a complete mastery of both sides of the question.

Miss Phineev, Mrs. Galbraith, and Rev. Goldie acted as judges. The decision as given by them read two for the affirmative side and one for the negative.

We fortell the coming of many a Demosthenes in this class of young ladies and will say to the crest-fallen negative side, remember, "they also serve who only stand and wait."

How Races are Changing.

Some astonishing changes in the physical type of races as a result of intercourse with foreigners, have been pointed out by M. Albert Gantard to the French Ethnographic Society. The Japanese, who, since the revolution of 1868, have been rapidly adopting European modes of life, are losing the eccentricity of their eyes and the prominence of their cheek bones, while recently born have less flattened

noses than their ancestors, with a skin not so yellow. Europeans settling in Japan, on the other hand, gradually lose the rosy color of their skin and tend to acquire an eccentricity in the eye. Another instance is reported by Adhomar Leclere, who has observed in Cambodia a striking change in his countrymen, the French residents soon beginning to acquire the type and the gait of the natives.
