

STADIUM AT THE PAN-AMERICAN EXPOSITION.

THE STADIUM.

Magnificent Arena For the Display of Live Stock and For Sports.

While the Stadium at the Pan-American Exposition was designed primarily for athletic and sporting events, it is intended also for the parade and judging of live stock and for the exhibition of farm and road machinery, traction engines, automobiles and other vehicles in motion. It will be the most magnificent arena ever erected in America. The seating capacity is 12,000. It will contain a quarter mile track and abundant space for all the popular athletic games and sports.

It is said that no exhibitor has ever had such a splendid arena in which to make displays of live stock, machinery or vehicles.

The architectural adornment of the Stadium is very simple and beautiful, giving it an aspect of massiveness and durability. The arrangement is that of a vast amphitheater, the seats being under cover and affording comfort to the spectators. The main entrance of the Stadium is a large building whose upper floors will be used for restaurant purposes. This building is 241 feet long by 52 feet wide, with towers 104 feet high. The architecture is very picturesque and appropriate for the use for which it is intended.

The style is that of the Spanish Renaissance in conformity with the general character of Exposition buildings. The lower story is an arched arrangement, and the red tile roof has broad eaves. Bright colors will be used in the further decoration of the building, and the old Spanish towers give it a finished beauty and make it one of the most prominent features of the Exposition.

The Stadium is on the east side of the Plaza, opposite the Midway. It is near the great northern entrance to the Exposition, adjacent to the steam and trolley railway stations. The Athletic Carnival to be held in the Stadium is intended to be one of the most impor-

tant ever held in America. It will bring together many of the most famous specialists in the world, who will entertain the Exposition visitors with their feats of strength, skill and endurance. The Stadium resembles the one built at Athens a few years ago and is intended as a model of what it is hoped some day may be executed in permanent form.

Apple Growers Much Interested.

Missouri apples are to have a prominent place at the Pan-American Exposition. Apple growers in many states are making plans to be well represented. By means of cold storage arrangements it is hoped to have a continuous and complete display of fruits throughout the Exposition season.

Display of Irrigation Methods.

The advance of knowledge upon the subject of irrigation has prompted the management of the Pan-American Exposition to provide for an adequate exhibit showing methods of irrigation and various tools and supplies.

Plausible Supposition.

"Paw," asked Tommy, "what becomes of a cowboy when he grows up?" "I presume he becomes a horseman," my son," replied Mr. Tucker. "Don't bother me with foolish questions."—Chicago Tribune.

It is well to know that DeWitt's Witch Hazel Salve will heal a burn and stop the pain at once. It will cure eczema and skin diseases and ugly wounds and sores. It is a certain cure for piles. Counterfeits may be offered to you. See that you get the original DeWitt's Witch Hazel Salve. Dr. G. S. Darling.

State Taxes.

They are \$800,000 Less Than in 1898, but Still Many Thousand Dollars in Excess of Previous Years.

Iosco County's Share \$5,264.10

The Auditor-General completed the apportionment of the state taxes for 1900 last Saturday. The total state tax apportioned is \$2,908,680.80 which is about \$800,000 less than last year and still in excess of any previous year, with that exception. This assessment is made on a valuation of \$2,105,100,000, as equalized by the state board of equalization in 1896. A new equalization will be made next year. Of this amount Iosco county will pay \$5,269.10.

The various items for which this tax is raised, together with the amount appropriated is as follows:

University.....	\$ 276,275 00
Agricultural College.....	74,039 00
State Normal college.....	69,807 00
Central Michigan Normal School.....	25,000 00
Northern Normal school.....	7,600 00
College of Mines.....	56,250 00
State Library.....	7,500 00
Soldiers Home.....	110,000 00
Home for Feeble Minded.....	78,000 00
State Public school.....	51,000 00
School for the Deaf.....	117,850 00
School for the Blind.....	28,115 00
Michigan Asylum for Insane.....	12,481 00
State Prison.....	35,000 00
Industrial School for Boys.....	72,750 00
Industrial Home for Girls.....	45,647 00
Fish Commission.....	28,000 00
Comptroller Adjutant-General's record.....	2,000 00
Food Commissioner.....	18,000 00
Dairymen's Association.....	300 00
Library Commissioners.....	800 00
Military fund.....	99,665 64
Naval Brigade.....	11,208 20

State Weather service.....	1,000 00
Michigan War Loan, 1898.....	139,139 68
Current expense of prison.....	90,000 00
Current expense of asylums.....	504,689 32
General purposes.....	982,862 00
Total.....	\$2,908,679 68

Tough on the Hogs.

Men are like hogs, however distasteful this may sound to hogs. When one hog gets an ear of corn every other hog will trot along behind and equal and beg and is ready for a bite, but just let the hog get his head fast in a crack and every son of a sow will jump on him and tear him to pieces. Just so with men.

As long as a man is prospering and has money he can't keep his friends off with a ball bat. The moment he is unfortunate and his wealth gone he is not only snubbed by his former alleged friends but they begin to do him all the harm possible. When a man starts upgrade the world falls behind and pushes.

But when he starts down grade the world steps to one side and greases the track.—Peoria Star.

Vegetable and Animal Fats.

Both vegetable and animal foods furnish fats and oils. Those from the vegetable source being the most digestible and valuable. With the exception of butter and cream animal fats require cooking to make them palatable. This destroys their food value and causes them to become elements of discord in the interior economy. Some form of fat must be introduced into the dairy dietary. When butter or vegetable oil (olive) are objected to cream, which is next in value, is generally liked and introduced in so many tempting ways. Served with all cereals, stewed fruits and when whipped make dainty desserts. Broid bacon is recommended by many as an easily digested fat. But when it is a question of digestion it must be thoroughly browned and crisped to make it at all palatable to a dainty eater and there cannot be much oil left after such thorough cooking. Raw eggs beaten with milk and flavored give both albumin and fat in very suitable proportion and digestible form. Eggs may be slightly cooked as in soft custards and sauces when given to supply fat.—Ex.

This is the season when mothers are alarmed on account of croup. It is quickly cured by One Minute

THE FAIR.

The 26th annual fair closed last Friday with the largest attendance in several years. The society will have a balance on the right side of the ledger once more. While the society has had better exhibits in years gone by, this year's exhibits exceeded those of the past few years in almost every department, the Gazette to the contrary notwithstanding. Some of the exhibits were the best ever had and are worthy of special notice.

The society is to be congratulated on the fact that it has a few loyal friends among the farmers who make a special effort to have a fine line of exhibits each year and it is to be hoped that others will follow their example in the future. These men realize the benefit of an annual fair does not consist simply of a few paltry dollars which are awarded in prizes and year after year they bring the best products of their farms, while their is another class, who come and devote the larger part of their time to fault finding and yet another class who do not come, but can be heard saying, "No I am not going to the fair because it will be no good." The success of a country fair depends on the farmers. If they will not attend and make exhibits the best officers on earth cannot make the fair a success.

Farmers, quit your kicking and commence now to prepare to make the fair of 1901 a success. Take your best stock, your best vegetables, your best grain and the best of everything you have. If you do this no one will go away saying that the fair was 'no good.'

FAIR NOTES.

Three beautiful days.

The dairy and household, vegetable, grain and fruit departments all showed an increase in entries and were of an excellent quality.

The fancy needle-work department was the most handsome display ever shown in this county, and we doubt if it could be excelled in any county in the state.

The stock exhibit this year was the largest for several years. Our farmers are fast working into a better grade of stock and will rank with any county in the state.

T. C. Phillips, of Curtis, Alcona county, exhibited a load of fine Shropshire sheep. Mr. P. is one of the enterprising farmers of our neighboring county and visit to our fair is an example that might be profitably followed by many of our own farmers. He expressed himself well pleased with his trip.

Friday was "democratic day." The speakers were Hon. Lee E. Joslyn, democratic candidate for congress and C. W. Hitchcock, county commissioner of schools, of Bay county. Both received the best of attention from the large crowd present and made a most favorable impression.

The races on Friday were the best of the fair. The free-for-all was won by John Bissone's bay pacer, "Elynn," Dave Cooper's. Black Moll," second and Wm. Allen's, "Grey Grip" third. The running race was the best and most exciting of the fair. There were four entries; "Bay Kit" owned by Edward Spring, "Paddy" by Fred Williams, "Buckskin" by W. H. Clough and "Topsy" by Samuel Anker. In the second heat "Bay Kit" fell and was drawn. The race for first place was between the Clough and Anker horses. "Buckskin" won the first, second and fourth heats, and "Topsy" the third. "Every heat was a race" and was not finished until the wire was reached. Considerable money changed hands on the result.

Feelings of safety pervade the household that One Minute Cough Cure, the only harmless remedy that produces immediate results. It is infallible for coughs, colds, croup and all throat and lung troubles. It

Subscription Price \$1.00 Per Year, if Paid in Advance, Otherwise \$1.50 Per Year.

SENATOR HANNA must be getting badly frightened, as he devotes most of his time to abusing Bryan, rather than making campaign argument.

All indications point to a victory for the striking coal miners of Pennsylvania over the operators, and that the strike will soon be ended.

D. P. McMULLEN, of Cheboygan, has been re-nominated for state senator by the republicans of the 29th district. O. O. Black, of Alpena, is his democratic opponent.

AT THE democratic legislative convention for the Iosco district held at West Branch, last week, John Macgregor, of Harrisville, received the nomination. Mr. Macgregor is one of the most active young business men of Alcona county and will make an active canvass for the election.

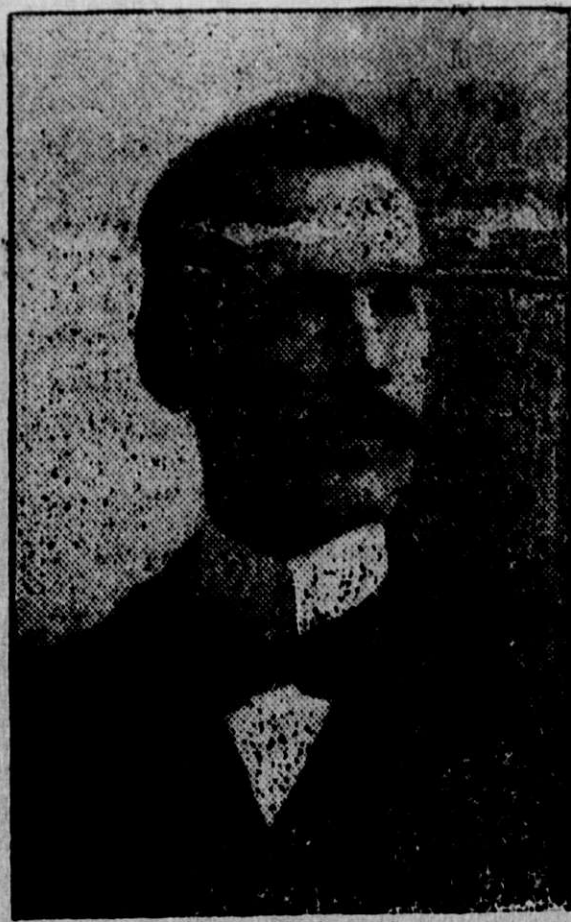

THE Democrats of Michigan have had much difficulty in securing candidates for office this fall. Not because they could not find men ready to take the nominations, but because they have required men of ability, honesty and integrity. The party realized that reform in state affairs was needed and have given the people a chance to vote for men whom the office sought, rather than politicians who sought the office.

In the October Review of Reviews the editorial department entitled "The Progress of the World" contains an impartial review of the Presidential campaign down to its present stage, special attention being given to letters of acceptance of the several candidates. Other topics editorially treated in this number are the Galveston calamity, the coal-miners' strike, the pending elections in England, and the problem of reconstruction in China.

It is said that the nut trees of the world alone could alone, if necessity should arise, provide food for the year around for a total population three times greater than the present. It has been pointed out to the Washington Department of Agriculture that Brazil nuts around Para grow in such profusion that thousands of tons of them are wasted every year; with coconuts it is the same in many sections. Nuts ground in various ways are rapidly coming into favor, and it is predicted that in the near future, nut flour will compete successfully, with wheat flour.

In view of the fact that typhoid fever is more prevalent at this season of the year than any other time, and as this disease is prevalent by the destruction or avoidance of the germ, the office of the state board of health is just now redoubling its efforts to warn the public of the presence of this dangerous communicable disease, which might easily be restricted, but which annually destroys a thousand victims. In addition to the weekly bulletin showing the presence of diseases the board has issued a unique map showing the places at which typhoid fever has recently been reported. Bearing in mind that the water the people drink is the most common source of the disease the board advises the people to boil all water not absolutely above suspicion, and all water from shallow wells.

Do not get scared if your heart troubles you. Most likely you suffer from indigestion. Kodol Dyspepsia Cure digests what you eat and gives the worn out stomach perfect rest.

HON. LEE E. JOSLYN.

Democratic Nominee for Congress from the 10th Congressional District.

IS UNCONSTITUTIONAL.

Michigan Supreme-Court Knocks Out Beet Sugar Bounty Act.

Lansing, Oct. 2.—The supreme court at 10 o'clock filed a unanimous opinion declaring the beet sugar bounty law of 1897 unconstitutional and void. The law provided for the payment of a bounty of 1c a pound on all beet sugar manufactured in the state. Bounties were paid under it until 1899; when the legislature failed to make an appropriation for this payment. The Michigan Sugar Co., of Bay City, brought suit against the auditor general to test the constitutionality of the law, and the opinion in denial of the writ of mandamus holds the law void. The court says the taxaton provided for is for no public purpose and cannot be upheld, and there is no power in the state to authorize a tax for private purposes. The state cannot take the property of A and give it to B. The law is void whether it comes within any of the express provisions of the constitution or not. The court declares that the law is not in the nature of a law providing for the payment of a bounty for the destruction of wild beasts which is a police regulation.

"The discrimination by the state between different classes of occupation, and the favoring of one at the expense of the rest," says the court, "whether that be farming or banking, merchandising or milling, printing or railroading, is not legitimate legislation and is an invasion of that equality of right and privilege which is a maxim in state government."

The court dismisses the claim of the company that the honor and integrity of the state are involved, as the bounty law had not been passed the company would not have been established an expensive plant by saying:

"So the honor and integrity of the state might become involved under any other act, however unconstitutional, the legislature might see fit to pass.

The state paid out in 1897 and 1898 under this law \$28,456.07 and \$331,508.73 was claimed under it by the several manufacturers of beet sugar in the state. The law provided that the bounty should run seven years.

COUNCIL PROCEEDINGS.

Regular meeting, Oct. 2nd, 1900. Called to order by E. M. Schlechte president pro tem. Present: Ald. Moore, Livermore, Walker, Phelps and Schlechte. Absent: Alderman King. Quorum present. Minutes of last regular and adjourned meetings read and approved. The following bills were then presented and on motion were allowed as follows: Geo. Shaw, draying..... 3 75 John Wood, labor..... 1 75 Fred Howey, labor..... 1 50 Wallace Brown, team work..... 6 25 John W. King, team work..... 2 50 Frank M. King, Salary..... 24 00 W. D. Wingrove, labor..... 1 50 Ezra Shaw, labor..... 1 50 Lewis Shaw, labor..... 1 50 O. Griss, supplies..... 7 02 C. H. Prescott & Sons, lumber..... 11 12 Geo. Shaw, balance, bridge contract..... 5 00 Geo. Shaw, labor..... 1 00 Claimed. Allowed. Mount & Murphy, lumber \$10 51 107 51 Druggists bond of C. A. Wakeman, with Geo. W. Mount and James Kinney as sureties in the sum of \$2000 00, presented. Moved and supported the above bond be approved. Carried. Moved and supported that the City Clerk be hereby instructed to request the Supt. of the D. & M. Ry. Co. to have trains run more slowly at Hamilton Crossing, and also to cut trains more regularly at crossings, when unloading freight. Carried. On motion council then adjourned. E. M. SCHLECHTE, ORLANDO ELLIOTT Pres pro tem. City Clerk.

The Foley vs. Constock case which was commenced two weeks ago last Wednesday was given to the jury Wednesday evening at 6 o'clock. A verdict was returned at 2 o'clock yesterday afternoon, in favor of the complainant for \$6,700.00. This has been the largest and most bitterly contested cases ever tried in this county. Another appeal will undoubtedly be taken to the Supreme Court and what the final outcome will be remain to be seen. The judgment is \$1000.00 smaller than the one rendered at the previous trial in Alpena County.

School Report.

Report of Tawas City Schools for the month ending Sept. 28, 1900.

FIRST PRIMARY. Winnifred DuPraw, Teacher. Number enrolled during the month 63; average daily attendance, 52; average number belonging, 58; neither absent nor tardy: Willie Bay, Kenneth Webster, Roy Redhead, Gordon Lloyd, Joe Lubaway, Elmer Bradley, Charles Johnson, Veronica McCue.

Highest average standing, Hazel Brown, 93; Leo Braband, Edith Baguley, 90.

INTERMEDIATE DEPARTMENT. Teresa Shaver, Teacher. Number enrolled during the month, 31, average daily attendance, 26; average number belonging, 30. Neither absent nor tardy, Jennie Birney, Grace Birney, May Murray, Marguerite Baguley, Mamie Swartz, Hazel Hinton, Ethel Garber, Charlotte Jahraus. Highest average standing, Kate Smith, Anna Tate, 93 James Mark, Jennie Birney, Merl Nellum, 97; Hazel Hinton, Grace Birney, May Murray, Marguerite Baguley, 96; Evelin Bradant, Rhea Lowe, Charlotte Jahraus, Ethel Garber, 95; Wellington Armstrong, Savina Cox, 94; Lucile Smith, Mamie Swartz, Ray Jacobs, 93; Vera Barie, Frank Moore, 92.

HIGH SCHOOL DEPARTMENT. Miss Nancie MacArthur, Teacher. Number enrolled during the month, 70; average daily attendance, 59; average number belonging, 67. Neither absent nor tardy: Lena Redhead, Grace Redhead, Ernest Kasiechki, Anna Graf, Agnes Galbraith, Maggie McRae, Minnie Smith, Harlow Wittmore, Lulu Murphey, Katie Ballotman, Edmond Conner, Lois Garber, Mabel Ross, Floral Ramage. Highest average standing, Grace Redhead and Agnes Galbraith, 93, Anna Graf, 96; Nina Crandall, 94, Floral Ramage, Rose McDonald and Minnie Smith, 93; Mabel Crandall, Lena Redhead, Katie McDonald and Harlow Whitmore, 91; Hallie Wilcox and Archie Barry, 90.

Our Lady of the Holy Cross. Our of the wreck and ruin of Galveston a woman arisen as the central figure in the work of relief. Into the hands of Miss Clara Barton, President of the American National Red Cross the Mayor and Citizens' Relief Committee of Galveston have given the distribution of all supplies arriving there for the survivors of the hurricane.

With the first confirmation of the news of disaster, Miss Barton summoned a dozen experienced relief workers and hastened to Galveston, where she quickly establish Red Cross headquarters and began the ministration of mercy among the destitute, the sick and the suffering.

Like a company of well drilled soldiers, the Red Cross staff fell to work, orderly, systematic, practically Business men watched curiously, for a women was in command. In less than a week leading citizens of Galveston said to one another: "This woman knows more about this sort of thing than us all. Let us give the entire work in her hands." It was done; and to-day Miss Clara Barton, known to her closest friends as Our Lady of the Red Cross, is directing the relief distribution in Galveston.

In this prompt recognition of Miss Barton's skill, experience and executive ability, the Mayor and Citizen's Relief Committee of Galveston have followed the precedent set by the business men of Charleston and other places where tidal waves, floods and various calamities have made necessary Red Cross relief during the past nineteen years. Miss Barton thus describes her work in Galveston to a telegram to William Willard Howard, General Manager of the Red Cross Texas Relief Fund, 156 Fifth Avenue, New York City:

"We are feeding the hungry, clothing the naked, and caring for the sick. We cannot restore the dead; but the living can have their homes restored to them in some small measure at least. They cannot continue long in temporary quarters which they have found in the few remaining dwellings and business buildings; in the tents that are being erected, or under improvised shelter from the wreckage of their former homes. They have nothing left. The temperature has been warm and the weather fair since the hurricane, but rain and inclement temperature are likely to come at any time. Money should be immediately forthcoming with which to build temporary dwellings.

The number of homeless, and, in many instances, utterly destitute persons, is very great. It is impossible to make an accurate estimate as yet; but it is likely that there are from six to eight thousand homeless persons in the city of Galveston today, many of whom have lost not only their homes and all of their possessions, but lost their employment as well. The destitute through our warehouse from morning until night. The undecipherable anguish of thousands of persons who have lost members of their families and their dearest friends is a suffering which cannot be removed even by generous contributions, but may be lighter by partly resorting their lost property.

"Among the homeless sufferers of the hurricane are many orphaned and destitute children. For these waifs of the storm we have fitted up a temporary asylum on the upper floors of a large warehouse. For the care of these orphans money is urgently needed. I hope that the generous-hearted people of the United States will contribute promptly to their support." Contributions for Miss Barton's work should be sent to the Red Cross Texas Relief Fund, 156 Fifth Avenue, New York City.

CHURCH DIRECTORY.

The old steam barge "Sakie Shepherd," which was burned at Moreton, Ont., three years ago, has been rebuilt and was launched at Marine City last Saturday.

Now is the time to order Storm Sashes. Storm sashes save fuel. They pay for themselves in a single winter.

C. H. PRESCOTT & SON.

The C. I. C. society of the Hemlock Road Baptist church will give a chicken pie social at the home of Mr. and Mrs. Thomas Lowe, on Wednesday evening, Oct. 10. A cordial invitation is extended to all.

Michigan railroad earnings for the month of August are reported as \$3,560,668.40 as against \$3,414,029.44 for the corresponding month last year. This is an increase of over 10 per cent.

The D. & M. Ry. Co. have just issued a neat card containing a synopsis of the Michigan game law. It is of convenient size to carry in the pocket. Copies may be had by addressing J. D. Hawks, president, Detroit, Mich.

Harry Cameron, of Chicago, a former resident of this city, has been renewing old acquaintances and talking over old times a few days this week.

The D. & M. will sell excursion tickets from Tawas City to Port Huron and return on account of the Eastern Star Grand Chapter. One fare for the round trip. Dates of sales Oct. 9 and 10, good to return Oct. 12.

Miss. Nellie Scarlett, held ticket 436, which received the silver pickle caster at M. E. Friedman's Sept. 26, No. 653 held by William Baxter got the handsome clock given away Wednesday of this week. Don't forget to get your tickets with each one dollar purchase. They cost you nothing.

Edward McGill, a brother of Thomas McGill, of this city, died at his home in Harrison, Manitoba, Sept. 8, at the age of 51 years. The deceased was one of the best known citizens of that locality, having been a city official for many years. He leaves a wife and two sons and two daughters to mourn his loss. He was at one time a resident of the Tawas, and will be remembered by many of the older citizens.

Mrs. Ella McKenzie, died at Saginaw on Monday last from effects of a surgical operation. The deceased was a daughter of the late Isaiah Curry, and a former resident of this city, where she was well and favorably known. The remains were brought to the home, of her uncle Thomas Curry. The funeral was held from the Congregational church in this city Wednesday afternoon, Rev. A. Waterbury officiating. The remains were laid at rest in the Tawas City cemetery by the side of her father, brother and sister. The deceased leaves an aged mother a husband and little son, besides a large circle of relatives and friends to mourn her sad loss.

A Card.

I wish to take this opportunity to return my sincere thanks to my many kind friends and neighbors for the numerous generous acts of which I have been the recipient during my long illness. Especially to my brethren of Tawas City Lodge No. 302, F. & A. M. and Dr. G. S. Darling do I feel grateful for many acts of brotherly love given me and my family.

W. M. WEBSTER.

Directors Meeting.

The directors of the Iosco County Agricultural Society will meet at the court house, in Tawas City at 1 o'clock p. m., on Monday, Oct. 8, 1900, for the purpose of settling claims against the society, and transacting such other business as may come before them.

L. J. PATTERSON, Secy.

Democratic Club Meeting.

All democrats are requested to attend the meeting of the Democratic Club, in the hall on the second floor of the Friedman building, formerly occupied by the L. O. L., on Tuesday evening, Oct. 9. A full attendance is requested.

J. W. MINOR, Pres.

MARRIAGE LICENSES.

The following marriage licenses have been issued by county clerk.

Sept. 27—Alfred J. Noel, East Tawas. Jessie May Fraser, Baldwin.

" Herman Laing, Tawas. Amelia Miller, Tawas.

" 29—Charles G. Cornett, Wilber. Jennie Dickenson, Baldwin.

" 30—Adelbert Trudell, East Tawas. Ollie Burch, East Tawas.

Oct. 1 Wellington Chipps, Prescott. Sarah McLean, Burleigh.

MARRIAGE.

Married at the residence of W. H. Dickenson, father of the bride, on Oct. 3, 1900, by Rev. Geo. Nixon, Mr. Charles G. Cornett, of Wilber and Miss Jennie Dickenson, of Baldwin. The bride was neatly attired and the recipient of suitable presents. The party partook of a sumptuous dinner and supper, separating at a proper hour, after singing "God be with you till we meet again." **

Estray Horses.

There came to my enclosure in Grant township, about Oct. 1, 1900, two horses, a gray mare, lame and an iron-gray colt about two years old. The owner can have the same by proving property and paying charges.

THE FARM CORNER.

Newly Items Gathered From Many Sources.

NOTES AND COMMENTS.

Air out that hen house.
Shade during the hot weather is very important.
A comfortable hen is generally a profitable hen.
Remember that a thoroughbred male is half the flock.
Before saying that poultry on the farm doesn't pay, think twice.
A fat hen will cover eggs some better than a poor one, probably because she produces more feverish heat.
At a recent convention held in the interests of poultry it was decided that 55 per cent. is about an average hatch of an incubator.
The fowl that is "stunted" at any time while young never becomes the fowl that it would have been under proper treatment.
People like trees are known by their fruits in one form or another and he who knowingly sells poor eggs will also be judged by his fruit.—*Farmer's Voice.*
Beets, carrots and parsnips for table use may be stored in dry oats in bin, boxes or barrel to be kept in a cool place. Kept in this manner they can be used at any time, while if stored in pits in the open air it will be difficult to get at them when the ground is solidly frozen.
When buying pure-bred stock the fall of the year is the best season for so doing if the prices to be paid are considered. The majority breeders do not care to winter more stock than they can accommodate comfortably and are consequently disposed to sell at lower prices than in the spring. Better stock can also be obtained in the fall, as breeders have more on hand from which to select.
Farmers who do not cut their corn and utilize the fodder appear to be satisfied with 60 per cent of a crop. The stalks, leaves and husks that are allowed to go to waste in the fields constitute about 40 per cent of the nutritive value of corn plant. In some seasons the ears alone do not yield any margin of profit above actual cost of production. The corn fodder grown in Iowa this year, if cut and properly cared for, would be worth at least \$40,000,000 above the cost of labor required to save it. About three-fourths of that amount will be wasted.

SWAMP MUCK.

The drainage of small marshes and swamps, especially on uplands, often make available very good soil. If the vegetable matter in the drained muck be not dead, the muck will burn when dried. So long as it will burn it is not in condition for tillage. Muck or peat that will not burn is thoroughly decayed and may be manipulated.
It is a mistake to consider muck in its native condition fit for cultivation. Generally it is acid and requires liming or other treatment to reduce the acidity. Always it lacks one or another of the elements of plant food, and this is why muck, while called and considered "rich", needs manure to make it fine plant food.
Often marsh land, so soft that cows and horses will mire in it will grow a large crop of coarse grass and weeds, and when drained will not grow anything. In such cases the application of manure or commercial fertilizer will induce the desired growth. Very often those who spread muck on their loamy soil get no benefit from it simply because the soil is already acid, and the untreated muck adds to the acidity.

Muck properly utilized may be made very valuable. Each

analyst, and he found them as distinct in make-up as though they had been formed 3,000 miles apart instead of 300 feet.

KEEP OFF FLIES.

In the midst of the fly season owners of live stock will be interested in the method successfully pursued by Dr. A. T. Peters, veterinarian at the Nebraska Experiment Station, for combating this pest. He took an ordinary oil barrel and into it a wooden spigot, using the barrel as a storage tank. Two and a half gallons of Zonoleum, with five gallons of cotton seed oil, were then placed in the barrel and enough water added to fill it. As required the mixture thus formed was drawn from the barrel and sprayed upon the cattle and horses, or applied with a sponge or cloth as the occasion demanded. The control of the flies was not only quite perfect, but it had one marked advantage not possessed by most other mixtures for the purpose, in that the solution was not greasy and sticky but left the coat of the animals in fine condition. The mixture has the further advantage of being a very economical one, a barrel of it being compounded at very small cost.—*From the Homestead.*

STORING THE APPLE CROP.

The question of the best manner of the storage of the apple crop will soon be up for consideration. The Department of Agriculture has been collecting some information upon this subject and concludes that a vast quantity of apples spoil every year simply through carelessness of improper storage.

The storing of fruit under dwelling houses is not recommended. A certain amount of decay is inevitable, and the rotting fruit becomes a propagating place for disease germs which permeate the rooms above.

A pit or cave, if carefully constructed, will keep apples very satisfactorily, and has the advantage of being the least costly of any possible storage construction. Such a cave as described by the Department is usually built into a hillside, sloping toward the north, so that the entrance is protected from the southwest winds that prevail during summer and autumn. In moist soils the cave must be walled, in dry soils no walls are required. Upright posts along the sides support the top, which is made of poles; over the poles is a layer of coarse hay, and over the hay soil to the depth of two feet. Several flues are made for ventilation. Such a cave may be built any desired dimensions; some are being planned with doors in each end and large enough for a passage way for a wagon through them. The best system of ventilation and the most even and desirable temperature can be maintained by use of an underground ventilation pipe leading from an opening in the floor of the cave to a similar opening on the surface of the ground several rods away. The pipe should be large enough to provide sufficient air for the cave and should have valves at each opening to regulate the supply. The air in passing through the pipe is cooled in summer and warmed in winter, and thus brought to near the proper temperature for good results in keeping fruit. To complete the system several flues should lead through the top of the cave to the open air above. The sum of the capacities of these flues should at least be equal to the capacity of the ventilator leading into the cave.

PROTECTION FROM MICE.

We have seen all manner of

WANT COLUMN.
A level bush under this head: five less cents per year. (Twenty cents for an additional line.)
FOR SALE—One set of Chambers' Bicycle pedals bound in sheepskin. Cheap if taken at once. Enquire at the Herald office.

PRICE, 25c. BY DRUGGISTS.
PACAL BALM COMPANY, ST. LOUIS, MICH.

NERVOUS, WEAK, DISEASED MEN. NO CURE—NO PAY
THE NEW METHOD TREATMENT, original with Drs. K. & K., will positively cure forever any form of Blood or Sexual disease. It is the result of 30 years' experience in the treatment of these diseases.

WE CURE SYPHILIS
This terrible Blood Poison, the terror of mankind, yields readily to our NEW TREATMENT. Beware of Mercury, Potash, etc. They may ruin your system. If you have sores in the mouth or tongue, pains in the joints, sore throat, hair or eyebrows falling out, pimples or blotches, stomach derangement, sore eyes, head-aches, etc., you have the secondary stage of this Blood Poison. We solicit the most obstinate cases, and challenge the world for a case we accept for treatment and cannot cure. By our treatment the ulcers heal, the hair grows again, pains disappear, the skin becomes healthy, and marriage is possible and safe.

CURES GUARANTEED
Thousands of young and middle-aged men have their vigor and vitality restored by early abuse, later excesses, mental worry, etc. No matter the cause, our New Method Treatment is the refuge.

WE CURE IMPOTENCY
And restore all parts to a normal condition. Ambition, life and energy are renewed, and one feels himself a man among men. Every case is treated individually—no cure—all—hence our wonderful success. No matter what ails you, consult us confidentially. We can furnish bank bonds to guarantee to accomplish what we claim.

250,000 CURED
We treat and cure: EMISSIONS, VARICOCELE, SYPHILIS, GLEET, STRICTURE, IMPOTENCY, SECRET DRAIN, UNNATURAL DISCHARGES, KIDNEY AND BLADDER DISEASES. CONSULTATION FREE. BOOKS FREE. If unable to call, write for QUESTION BLANK for HOME TREATMENT.

FERTILIZERS ON WHEAT.
In the tests of the Ohio Experiment Station, phosphoric acid, in the form of acid phosphate, has been decidedly the chief factor in producing increase of crop during the season just past. A similar result has been reached by many farmers, and the natural consequence is a general tendency to limit the use of fertilizers the coming season to plain acid phosphates; a tendency strengthened by the fact that the phosphates are not so completely under the control of the fertilizer trust as are the mixed fertilizers.
When, however, the experiments at the Ohio Station are studied as a whole, taking not simply the effect upon the present season's wheat crop but the average results upon wheat, corn, oats and grass for the past seven years, it will be seen that it would be a decided mistake to base conclusions upon this one wheat crop alone.

In the experiments of the Central Station at Wooster, where wheat has been grown in rotation with corn, oats, clover timothy, the average increase per acre from the plain acid phosphate, applied at the rate of 160 lb. per acre to wheat and 80 lb. per acre to corn and oats, or a total of 320 lb. during the five years of a rotation, has been 4.6 bushels of wheat, 3.6 bushel of corn, 7.2 bushels of oats and 500 lb. hay; while from the same quantity of acid phosphate, carried partly in acid phosphate and partly in tankage, but reinforced by the nitrogen carried in the tankage and by a small addition of muriate of potash, the average increase has been 7.2 bushels of wheat, 8 bushels of corn, 8 bushels of oats and 1600 lb of hay.

The cost of the acid phosphate used on an acre in five years has been about \$2.40, while that of the mixture of acid phosphate, tankage and muriate of potash, has been about \$3.75; but the average increase from this mixture has been so much greater than that from acid phosphate alone as to give a total net profit, over the cost of the fertilizer, of about \$12 per acre in five years for the mixed fertilizer against about \$6 for the acid phosphate used alone.

In mixing this fertilizer "7 and 30" tankage and 14 per cent. acid phosphate are used in equal quantities, adding about 100 lb. of muriate of potash to the ton. This gives a fertilizer analyzing over 3 per cent. ammonia, 10 to 12 per cent. phosphoric acid and 2 1/2 per cent. potash, and may be made up at a cost of \$18 to \$20 per ton.
