

MAYOR MAYBURY

Addressed two Good Meetings in Iosco County on Friday last.

Ten o'clock in the morning is a undesirable hour in the day for a political meeting, yet the crowd estimated at from four to five hundred people greeted Hon. W. C. Maybury, the democratic candidate for governor, at the court house last Friday forenoon, and were repaid by listening to one of the most able and pleasing political addresses ever delivered in Tawas City.

HON. Wm. C. MAYBURY, For Governor.

Mr. Maybury talked for an hour touching upon the general issues of the day and devoting particular attention to state issues. He promised if elected, to give the state an honest administration of affairs, and to see that the third house, or lobbyists did not control the legislation in this state. His address was well received by all, and but little ayered criticism is heard.

After finishing his address here he was driven to Oscoda, where he was greeted by at least 1,500 people. The mills of both AuSable and Oscoda were closed in order that these employees could hear him, and it is safe to say that very few of the inhabitants of the two towns were not present. He talked for about 40 minutes and was obliged to close in order to catch the train for Alpena, where he spoke in the evening.

Mr. Maybury is one of the most polished and entertaining speakers in the state and always leaves a favorable impression.

English Schoolboy Answers.

Here are one of two answers taken from examination papers of boys in the great English public schools corresponding to our best academies.

"The tides are a fight between the earth and the moon. All water tends towards the moon, because there is no water in the moon and nature abhors a vacuum. Gravitation at the earth keeps the water from rising all the way to the moon. I forgot whether the sun joins in this fight."

A vacuum is nothing shut up in a box. They have a way of pumping out the air. When all the air and everything else is shut out, naturally they are able to shut in nothing, where the air was before."

"The barometer was invented by Sir Geoffrey Kneller. He had found in Holland by looking through glass at the end of a pipe that things looked upside down."

"Mules are the mules and small donkeys used to carry provisions up the Andes in California."

Feelings of safety pervade the household that One Minute Cough Cure, the only harmless remedy that produces immediate results. It is infallible for coughs, croup, and all throat and lung troubles. It will prevent consumption. Dr. G. S. Darling.

This is the season when mothers are alarmed on account of croup. It is quickly cured by One Minute Cough Cure, which children like to take. Dr. G. S. Darling.

JOHN MACGREGOR.

A Sketch of the Life of the Democratic Candidate for the State Legislature.

The following sketch of the life of John Macgregor, the democratic candidate for the state legislature is taken from the Alpena county Echo, (Rep.) of March, 22, 1900, and shows the high regard in which the young man is held at home:

Several years ago in the town of Brucefield, Ontario, there occurred a most momentous affair. It was the birth of the child destined by the hand of fate to be the president of the now thriving village of Harrisville. To be exact, this happened on August 2, 1861, and the paternal ancestor of the lusty child was named Hugh Macgregor. The youngster was early named John, and in common with four brothers and an equal number of sisters was brought up under family roof and in a correct manner, as the training of children went in those days. Young Macgregor pined for a glimpse at the world, and in 1878 he shook the dust of his native town from his feet and came to Harrisville. His first experience in the mercantile world was as clerk in Colwell & Macgregor's store, rising to the position of bookkeeper by strict attention to duty. This was but a beginning, and then he got into politics somewhat, being assistant postmaster for eight years under H. F. Colwell and Geo. W. Chapelee, who were respectively Republican and Democratic in politics. He was engaged in business with Mr. Colwell and in 1893 he bought his partner out. Mr. Macgregor saw the opportunities for a bank in this section and in August, 1898, in company with several others he opened for business the Alpena County Bank, of which institute he is cashier.

In politics Mr. Macgregor is a Democrat. That is, he votes the ticket on all national and state questions, but when it comes to local affairs he allows his judgment to sway his ballot. His fellow-citizens recognizing his ability, have placed upon him the responsibility of vice-president, and on Monday of last week they reiterated their opinion formed years ago, by electing him to the office for the fourth time. Mr. Macgregor has taken also an active part in county politics, and has for several years been the Democratic offering for the office of county clerk.

Mr. Macgregor has been indentified with the business interests of Harrisville for so long that it is unnecessary to dwell upon his standing in the community of which he has made himself a valuable resident. His record as a business man and a citizen is clean.

Another Big Battle.

Now that the legislature has approved the submission to the people of the question: Shall the corporations be taxed the same as other taxpayers—on values, in stead of on earnings?—the next move is for the people to decide. If the majority so decide, then the legislature must pass a bill into a law, making the desired change.

The general opinion among the senators and representatives after the session was closed was that the governor will call another special session for Dec. 1 or thereabouts, for the passage of the Atkinson bill. Opinions varied as to what the legislature would do with it. Many said that there is so much soreness over defeat for renominations, for which McMillan is blamed, that there will easily be enough votes to pass the bill. There were just as many who said that the election being over and the whip broken, the bill would be turned down. Others said that it will be the last chance to get a hand in railroad boodle.

All were agreed that the governor will want to have the business closed up before he goes out of office on Dec. 31, and that if there is opposition he and his aides will put up the biggest battle of the long equal taxation war. —To Day.

William H. Hartley

The subject of this sketch, is a young man who has spent seventeen of twenty-four years of his life in Iosco county, and by hard study and studious habits raised himself to the front ranks among the public school teachers of the county. When the other boys and young men have devoted their time to sport and pastimes, Mr. Hartley has been engrossed in his studies, and as a result he has made a success of his chosen profession, and for five years has been a successful teacher in our county schools. Moreover he has made a special study of public affairs and is far in advance of the average man on public questions and especially on affairs of the state government. He is held in high esteem by all for his many manly qualities and all have confidence in his ability and honesty.

He has accepted the nomination for state senator or on the democratic ticket, for the 28th senatorial district in the face of a large aversed majority, but should the voters elect him to this responsible position they will have a representative in the upper house of the state legislature who will be free from the control of all corporation influences and who will stand firmly by the interests of his constituency.

Mr. Hartley has issued the following declaration of principles:

To the voters of the 28th Senatorial District. GENTLEMEN:—I stand upon the National and State Democratic platform. My only regret is they don't go far enough.

I am in favor of direct legislation through the initiative and referendum.

I am in favor of the people voting directly for their U. S. Senators.

I am in favor of equal taxation including the taxing of all incomes.

I am not a partisan, any measure designed for the good or enlarging the powers of the people emanating from any party will receive my cordial support.

I am opposed to all class legislation.

I am opposed to the extension or usurpation of any powers or privileges by trusts, combines, corporations or individuals.

I am opposed to any person holding office or voting taxes upon others, unless he pays his just share of the same.

I solicit your votes and influence.

W. H. HARTLEY.

An Awful Slender.

The following "fairly tale" is from the Alpena Echo, and if the editor escapes the wrath of the attorney alluded to, he is very liable to be annihilated by the Tawas boarding house keeper if he ever visits this city:

Funny stories are related to the Foly-Comstock trial at Tawas. One of the Alpena attorneys in the case, so 'tis reported, boarded at a cheap boarding house during the trial so as to be in touch with the witnesses who boarded at this particular house. The bed-bugs were as large as mud-turtles, and the lawyer occupied his nights fighting them with a club, so other attorneys say. When, on one Monday morning, the judge discovered about 200,000 feet of lumber, said to have been cut in 1894, piled in the court room, he ordered the jury removed until he could find out why the court room had been turned into a lumber yard. The lumber was covered with tarpaulin before the jury returned, and was removed, at night.

Sorrow to Many Friends.

Ella A., beloved wife of William C. McKenzie, died last night at 10:45 at the Woman's hospital, where she had undergone an operation, Wednesday, from which she had no sufficient strength to rally. The deceased was born at Tawas City, Aug. 16, 1868, and was the daughter of Mr. and Mrs. Isaiah Curry. She came to this city with them at the age of 15. June 10, 1893, she was married to Mr. McKenzie and has lived in Saginaw since. Beside her husband one son survives her. She had many friends who deeply mourn her early demise, and who have only good to say of her life and character. The remains were removed to the residence, 117 North Baum street, whence they were taken to Tawas City today for burial, after a brief service conducted by Rev. Andrew B. Chalmers. The funeral at Tawas City will take place Wednesday.—Saginaw Evening News of Oct. 2.

Henry Funk.

The democrat candidate for sheriff of this county needs no introduction at our hands. He has been a resident of Tawas City for the past 27 years. Having come here with the J. C. Cameron & Co., to accept a position in their mill, he remained with their successors, Nisbet, Green & Co., and C. H. Prescott & Sons, until about three years ago, having worked for the Prescotts sixteen years, during the larger portion of which time he was foreman. He is at present foreman of the Western Plaster Co's., mill at Alabaster.

Mr. Funk has held many responsible public positions and has always been found an accommodating and careful public official. He is a man of broad and liberal views, and is universally liked by all classes. The voters of the county will make no mistake in trusting to his care the responsible duties of Sheriff, and can have all confidence that the affairs of that office will be attended to in a business-like and impartial manner under his administration.

The best method of cleansing the liver is the use of the famous little pills known as DeWitt's Little Early Risers. Easy to take. Never gripe. Dr. G. S. Darling.

A Card.

City Clerk.

Spread Like Wildfire.

When things are "the best" they are "the best selling". Abraham Hays, a leading druggist, of Nashville, O., writes: "Electric Bitters are the best selling bitters I have handled in 20 years. You know why? Most diseases begin in the stomach, liver, kidneys, and nerves. Electric

A BUSINESS COLLEGE

And Normal Institute will be Established in Tawas.

A Good Thing Which Should be Aided by all Citizens.

In our last issue we mentioned that Prof. C. W. Yerrington, of the Yerrington Business College and Normal Institute, of St. Louis, had been in the city a few days looking over his locality with view of removing the college to this city. It is with much satisfaction that we are enabled to announce that everything indicates that he will locate here.

A meeting of a number of our business men was held on Friday evening last and the matter was thoroughly discussed. Prof. Yerrington made a very favorable offer to the citizens of Tawas City and East Tawas, agreeing to come if a suitable building was furnished him and he was given the support of both cities. Committees were appointed to canvass the matter with our neighbors at East Tawas, and have received promises of liberal support from them.

Soliciting committees were appointed in both towns to solicit contributions and are now at work and are receiving liberal pledges. It is estimated that it be necessary to raise about \$2,500.00 and it now appears that no difficulty will be had in doing so.

Prof. Yerrington expressed a preference for the Sheffer property, on the bay shore, a most desirable location, and an option has been secured on the same at very reasonable terms.

A joint meeting of the committees will be held, within a day or two when more definite arrangements will be made and a report of the pledges had.

The Yerrington college is one of the most successful in Michigan and its location in the Tawas will be an excellent thing, as it will bring to us from 300 to 600 students each year.

As to the location, no better or handsomer can be found, and it cannot fail to prove a popular place for such an institution.

ALL FARM PRODUCTS.

A SPLENDID EXHIBIT TO BE MADE AT BUFFALO'S GREAT EXPOSITION.

Opportunities Will Be Offered For the Study of Object Lessons in Many Important Arts and Sciences.

Thousands of men, representing every degree of skill, are fast bringing into existence the great Pan-American Exposition, which shall next year turn the footsteps of half the nation toward Buffalo. Never was an Exposition projected amid such promising and favorable surroundings and conditions. With the best known natural wonder of the world—the stupendous and majestic falls of Niagara—within half an hour's ride of the Exposition grounds and the greatest electric power plants in the world using the power of these famous cataracts, truly magnets of irresistible force, to help draw the crowds from all directions, Buffalo looks to an unparalleled success in next year's enterprise.

In six important particulars the Pan-American Exposition will outrival all former undertakings of this description. These are in the electrical effects, in the hydraulic and fountain effects, in horticultural and floral decorations, in the variety and splendor of its statuary, in color decorations and in the court settings. The highest skill has been employed in developing these features, and no pains will be spared to bring them to a degree of perfection never before achieved.

A large number of the most noted sculptors of America are engaged upon the models for the magnificent decorative display of original sculpture. About 125 groups of statuary will be employed in the ornamentation of buildings and grounds, aside from numberless small sculptures, such as heads, floral pieces, medallions, arabesques and work in relief upon all buildings and architectural works.

Among the 20 or more great buildings which will shelter the multitude of exhibits to be brought together for the entertainment and education of the public next year the Agriculture building ranks among the largest. This is situated on the north side of the Mall, opposite the Manufactures building and east of the huge Electric Tower, which is to be the centerpiece of electric illumination.

The Agriculture building is 500 feet long by 150 wide. It is very ornamental in its exterior aspect, having broad, high entrances richly adorned with appropriate plastic work. The southern facade is characterized by an open log

method of work and the products of the garden and field in their great variety, produced under all sorts of conditions.

The superintendent of this division is Mr. Frank A. Converse of Woodville, N. Y., a stock grower and farmer of thorough experience in Exposition work, who has been prominent in farmers' institute work on behalf of the New York state department of agriculture. Mr. Converse is receiving the cooperation of many prominent associations and individuals, and his correspondence at this early date indicates a most comprehensive exhibit of scientific farming in all its branches.

Under the classification of agricultural systems will be shown methods of fertilization, including the use of cover crops, commercial fertilizers, crop rotation, systems of sowing, with bulletins, statistics, addresses and exhibitions of crops raised by the use of particular fertilizers.

Under the classification of farm management and processes the different systems will be illustrated with the view of assisting farmers to determine whether it is best to keep a variety of stock or a particular breed and, if but one kind, which shall be favored.

The question of farm help and the different specialties in the way of fruit, grain and truck farming will be treated exhaustively. The experience of a large number of farmers under many conditions of the soil, climate, etc., will be brought together for the information of all who wish to learn.

Under the classification of agricultural statistics will be presented reports from different states and provinces issued by the departments of agriculture, experimental stations, various horticultural, live stock and dairying associations, showing the aggregate of crops and products of all kinds.

Under the head of cereals will be exhibits from different states and localities, wheat, rye, oats, barley, corn, buckwheat and rice. The exhibits will be arranged to prove which crop is best fitted for each state or locality. These exhibits will show the many varieties of cereals in their highest stage of development.

In tubers and root crops will be displays of beets, turnips, carrots, peanuts, potatoes, sugar beets, parsnips, onions, etc. In October a special potato display will be made showing the products of many states in comparison with one another. Farmers who are interested in the production of sugar beets will have an invaluable opportunity to learn about the wonderful development of this particular vegetable. A special display will be made of sugar beets, showing all varieties and making clear to every one the conditions under which they thrive best, including both soil and atmosphere. The necessity of abundant sunshine in the maturing of sugar beets and the absence of it at the proper season have been the causes of serious loss and dis-

appointments to stock raisers. The value of various byproducts for food for live stock will be shown in exhibits of gluten meal, linseed meal, cottonseed meal, hominy meal and other prepared foods.

The display of grasses and forage will include all varieties, the purpose being to show the ones best adapted for farm uses with reference to particular soils and conditions. The proper mixture of seed for permanent pastures, meadows, lawns, etc., will be explained.

The display of vegetable fibers will include flax, jute, hemp, cotton and their different products. The fibers of animal origin will include hides, hair, wool, silk and the processes of preparing them for market.

Among the nonedible products of animal origin to be exhibited are glue, gelatin, stearin, wax, candles, bone and horn products, fertilizers, etc.

The question of fertilizers is always an important one to those who seek to obtain the best results from the soil. In the treatment of this subject the Division of Agriculture will endeavor to show the relative value of the natural fertilizers, both crude and compounded. It will bring to the information of all the sources and value of nitrogen compounds, guano, oil, phosphatic rocks, potash, nitrates, etc.

As a sort of catch all for many things impossible to classify satisfactorily the superintendent has set apart a separate class.

Great luck of an Editor.

"For two years all efforts to cure Eczema in the palms of my hands failed," writes Editor H. N. Lester, of Syracuse, Kan., "then I was wholly cured by Bucklen's Arnica Salve." It's the world's best for Eruptions, Sores and all skin diseases. Only 25c at Dr. G. S. Darling or J. E. Dillon.

It is well to know that DeWitt's Witch Hazel Salve will heal a burn and stop the pain at once. It will cure eczema and skin diseases and ugly wounds and sores. It is a certain cure for piles, Counterfeits may be offered to you. See that you get the original DeWitt's Witch Hazel Salve. Dr. G. S. Darling.

That Throbbing Headache.

Would quickly leave you if you used Dr. King's New Life Pills. Thousands of sufferers have proved their matchless merit for Sick and Nervous Headaches. They make pure blood and build up your health. Only 25 cents. Money back if cured. Sold by Dr. G. S. Darling or Dillon.

Your vote will be appreciated by

Now is the time to order Storm Sashes. Storm sashes save fuel. They pay for themselves in a single winter. C. H. PRESCOTT & SON.

The C. E. Societies of this city have been invited to meet with the East Tawas society, at the Presbyterian church in that city, next Sunday afternoon, at 4 o'clock, to listen to Rev. A. C. Kay's report of the International C. E. convention which met at London last July.

Sheriff Shien arrived home from Detroit Tuesday, where he took Fred Lakestorm, convicted before Justice Tate, of East Tawas, last week, for wife beating, to serve a 90 day sentence at the house of correction.

We are offering extra bargains on 1899 Rambler and Ideal bicycles. WHITTEMORE & PHINNEY.

This has been one of the most remarkable falls ever known in this section of the state. The weather has been delightful and no frosts were had until well into October. The farmers never had so good weather in which to harvest their fall crops and there are few who failed to take advantage.

If you want a new bicycle call and examine our line. It comprises the Ramblers, Clippers, Altans and Ideals. None better and prices right. WHITTEMORE & PHINNEY.

T. G. Winnette, general passenger agent of the Detroit & Mackinaw Railway, met a serious accident at Emery junction Friday morning. He was assisting men in taking a handcar from the tracks when he lost his balance and fell backward upon a scrub oak. The stump struck him between the thighs inflicting a painful wound. Mr. Winnette was brought to Bay City for medical treatment, and will be laid up for three weeks.

If in need of a "rainy day" skirt be sure and look over our line before purchasing. Good heavy suit-suiting at 60 cents. C. H. PRESCOTT & SONS.

As soon as the shirt waist is adopted by boys another calamity will follow, just as one industry creates another; see if it don't. The sequence will come in the changes in the spelling of personal names. We now have Mae, Mayne, Edythe,

John Armstrong was in Bay City this week.

A fine daughter was born to Mr. and Mrs. John Brabon, Wednesday.

Mrs. B. J. Dennis and son Roy, arrived Monday from Detroit and are again residents of East Tawas.

Mayor and Mrs. Wm. Nisbet returned yesterday, from an extended visit with relatives in Canada.

Herman Lange of Tawas township and Miss Emilie Mueller, of this city were united in marriage on Sunday last by Rev. John Karrer.

The infant child of Mr. and Mrs. Murry Wade, of Tawas township, died on Friday last. The funeral was held from the M. E. church Sunday.

County Clerk Mark has issued but one marriage license this week, and that was to Arthur J. Goddard and Miss Jeanetta Dickinson, both of AuSable.

Miss Edyth Walker announces that she will give lessons in physical culture each Monday afternoon at the Prescott building opposite the court house. Those interested are invited to see her.

Who says 13 is an unlucky number? Herman Birr held No 13 and secured one of the free gifts at Friedman's this week. Roland Goldie held No 247, and got the other one. Remember these tickets cost you nothing.

The schooner Canton had her sails carried away in the heavy northeast, Tuesday, while off Ottawa Point. Wednesday night the steam barge Britian run aground on the point but was released Thursday noon by the Protector, without damage.

Mrs. B. J. Dennis, has sold her millinery business in Detroit, and has moved back to East Tawas, where she will again engage in business in her old store next to the Holland hotel. She will soon be "at home" with a full line of the latest styles of fall and winter millinery. Her many friends are glad to again welcome her as a resident of the Tawas.

Wednesday afternoon the board of supervisors elected Thomas Davidson, of this city superintendent of the poor for the ensuing three years. There were six candidates and it required seven ballots to secure an election. Prof. W. M. Gregory of East Tawas was elected as a member of the board of county school examiners. The board will probably not complete its labors before next week.

"There is more profit in eggs at 15 cents per dozen than in raising wheat at the present prices," said a prosperous farmer as he deposited a large basket full of eggs on the counter of one of our business firms. It would seem as though this were a fact, for the farmer does not know when he sows his wheat whether he will get even half a crop. Farmers are turning their attention more to beans, potatoes, and small fruits in many portions of this state and some say that they will hereafter only sow enough wheat for their own use.

For the use of parents who have large families of unruly boys and who have lost faith in the efficacy of corporal punishment, Edward and Ulysses DeMoulin have just secured patents on an automatic electric spanking machine. With the new invention in use it is only necessary to place the culprit on the stand, grasping the two handles. Then by simply pressing the electric button the machine is set to work. The severity of the punishment may be varied by changing the power of the electric current employed. The inventors also believe that they will find a large sale for their device among college fraternities and other secret societies who wish to make memorable the initiation of candidates into their organizations. In order to make the victim believe that he is being punished more severely than he really is, a "flip-flapper" is attached to the machine, which makes a tremendous racket when the spanker is in operation.—Ex.

For Sale Cheap. Ten pair of window sash, glass all set ready for use. 3, 5 panel doors with trimmings and painted ready for use, one square coal stove

CAPES and JACKETS!

We have just received the largest and best line of Capes and Jackets for Ladies and Misses, ever offered our patrons. It contains the latest in Style and Material and Our prices can not be duplicated anywhere in the state. We give you the best for the least money.

4. We are agents for the J. E. Dayton line of Heavy shoes.

5. Come and see our Oil Grain tap sole Shoe. It can't be beat.

6. Henderson's Red School House Shoes For Boys and Girls.

7. Val Dutenhofer celebrated Cincinnati line of ladies fines shoes.

When you want to fit out for Cold weather. Let me fit you out. I will do it right, both both in prices and GOODS.

Yours,

Geo. W. Mount,

ESTRAY CALF.

There came into my enclosure in Tawas township, on or about, September 7, 1900 one spotted black and white bull calf, Owner can have same by paying charges.

JOHN FASSTON,
Tawas City Mich.

Notice of Reistration.

To the electors of the city of Tawas City, Mich:

You are hereby notified that in accordance with the law, there will be a re-registration of all the qualified voters of this city.

All persons qualified to vote at the next general election to be held Nov. 6th, 1900, must appear before the Board of Registration at the place designated in this notice and have their name placed upon the register of electors.

The said Board of Registration for the several wards will be in session Friday, Nov. 2nd, and on Saturday, Nov. 3rd from 8 o'clock a. m. to 8 o'clock p. m. of each named day, at the City Hall in said city.

When such new registry shall be made the former register shall not be used, nor shall any person vote at any election after such re-registration, unless his name shall be registered in such new register.

ORLANDO ELLIOTT,
City Clerk.

Dated at Tawas City, Mich., this 16th day of Oct., A. D. 1900.

ELECTION NOTICE.

To the Electors of the City of Tawas City:

You are hereby notified that at the General Election to be held in this State on the Tuesday succeeding the first Monday of November next, the following officers are to be elected, viz:

A Governor, Lieutenant Governor, State Treasurer, Auditor General, Attorney General, Superintendent of Public Instruction and Commissioner of State Land office; also a member of the State Board of Education in place of Perry F. Powers, whose term of office will expire December 31 1900; also fourteen electors of President and Vice-President of the United States; also a Representative in Congress for the Tenth Congressional District of this State to which your City belongs; also Senator for the 28th Senatorial District of this State, comprising the counties of Iosco, Ogemaw, Gladwin, Clare, Misisaukee, Roscommon, Crawford, Oscoda and Alcona; also one Representative in the State Legislature for the Iosco Representative District, comprising Iosco, Ogemaw, Roscommon and Alcona counties.

Also the following officers are to be elected for Iosco county, viz: one Judge of Probate, one Sheriff, one County Clerk, one County Treasurer, one Registrar of Deeds, one Prosecuting Attorney, one Circuit Court Commissioner, one Surveyor and two coroners.

In ordinance with the Law now in force for this city, the polling place of the several wards will be at the city hall in said city.

To all at which I have hereto set my hand, this 18th day of Oct. A. D. 1900, at Tawas City, Iosco Co. Mich.

ORLANDO ELLIOTT,
City Clerk.

MORTGAGE SALE.

By reason of default in the payment and conditions of a Real Estate Mortgage made by Charles Harris, July 17, 1883, to George P. Smith of East Tawas Michigan, recorded August 30, 1883, in Liber 7, of Mortgages, at Page 25, in Iosco county Register of Deeds Office, on which there is claimed to be due the sum of One Hundred and seventy two dollars and fifteen cents (\$172.15), and no suit a law or otherwise having been commenced to recover the same. By virtue of the power of sale in said mortgage contained, the premises in said mortgage described will be sold at public auction on the 12th day of January, 1901, at 10 o'clock in the forenoon of said day, to the highest bidder therefor, at the front door of the Court House in Tawas City, (that be the place of holding the Circuit Court of the County of Iosco, Michigan) to satisfy said amount and the costs of said sale.

AGRICULTURAL BUILDING.

A FINE HORSE SHOW.

PLANNED TO PLEASE THE VISITORS TO THE PAN-AMERICAN EXPOSITION.

A Field Day For the Fashionables. Exhibits of Horses of All Breeds. The Interest of Leading Breeders and Associations Enlisted.

A Horse Show of the fashionable kind, with all the embellishments that society can bestow upon it, will be one of the features of the Pan-American Exposition at Buffalo next year.

It is planned upon the lines observed in those well known society events of a like nature held annually in Madison Square Garden, New York city. Metropolitan society is regularly thrown into a flutter of excitement as the time approaches each season for these picturesque events, and the great Garden takes on a festive air that is not rivaled again throughout the year.

Society then shines resplendent. Popular conversation is upon the comparative merits of favorite animals. The decorations of the person and of the building and the attire of devotees suggest the horse. The newspapers talk horse and the whole metropolis pays homage to the high-bred animals whose proud pedigrees become as familiar as the biographies of statesmen at election time.

It is expected to make the great horse show to be held in the fall of next year at this Exposition quite as spectacular and interesting as those held in New York. On this occasion the finest bred animals of the Americas will be brought together to compete for honors and the favor of the public.

The show will be held in the Stadium, which is to be the great show place of the Exposition, having seats for more than 10,000 and a track a quarter of a mile in circumference.

While a general display of horses will be made at this show, of particular interest will be the animals adapted to the uses of fashionable society, such as saddle horses and ponies, tandem drivers, hunters, jumpers, polo ponies, coupe and coach horses, four-in-hands, trotters and runners. The show will include many costly equipages and novel turnouts that are used with the finely bred animals that will be brought forward to delight the public eye.

Superintendent F. A. Converse of the Live Stock division has planned to accommodate 1,000 horses in the exhibit of American bred animals. The breeds that will be recognized are Standard-bred, Thoroughbred, French coach, French trotters, Cleveland bay, Oldenburg, etc., Belgian, Hackney, Morgan, Arabs, Percheron, Clydesdale, English shire, French draft, Suffolk, Punch, Shetland ponies, Jacks and Jennets.

This will be the occasion for bringing together the finest animals bred on the western continent. While the trolley car and the automobile have relieved the horse of much of his drudgery, he continues to occupy a distinctive field of work in the general economy. The tendency of the times, too, is to produce better animals.

The cheap car horse has to a large extent gone out, and scientific breeding is replacing the common stock with horses of higher intelligence and efficiency. The experience of many breeders during the introduction of the trolley car and the flooding of the market with cheap horses was discouraging, and a large number turned their attention to other lines of work.

The situation, however, is considerably improved, and prices are again more nearly what they should be. The interest in breeding is regulated by the pecuniary reward, and the improved demand lends a new attractiveness to the breeding and training of horses. The demand for horses in cities continues brisk, particularly for draft animals such as the Clydesdale and the Percheron, and for gentlemen's driving and coach horses.

The Live Stock division of the Pan-American Exposition will offer to breeders an opportunity to place before the public high bred, stylish, good acting horses with a view of showing what particular crosses are advantageous in producing such animals. Experiments have been made with a view of producing large standard bred horses with the most admirable results.

superintendent Converse is in correspondence with the entire 28 National Associations whose members are engaged in sheep breeding and wool growing. He reports that every association, without exception, is much interested in the Pan-American Exposition and that it will contribute exhibits to the show which will take place in September.

A strong feature of the sheep exhibit will be in the middle wool class, in which mutton is the first consideration and wool secondary. This class includes Shropshires, Oxford, Southdowns and like breeds. The exhibits of these breeds will be exceptionally large. The classification of sheep includes some 14 breeds. Some of them are new to America, such as Tunis, Suffolks and the Highland Black Face. These new breeds will be particularly interesting on account of their novelty.

The Highland Black Face is a well known breed in Scotland, but in America there are comparatively few flocks. Wool growing is carried on in nearly every part of the United States, the business being particularly adapted to rough and mountainous districts where the steep hillsides and mountain pastures can be utilized. The exhibit of sheep will therefore come from nearly every state in the Union and will include about 1,500 of the finest bred animals. The exhibits of imported sheep will be made only by American breeders, the rules requiring that the stock shall have been in the possession of exhibitors at least 60 days before the date of the entry.

The display of swine to be made in the latter part of September will include representatives of 12 breeds. Among these will be the new breeds known as Suffolks, Victorias and Tamworths. The Tamworth stock is bred to some extent in Canada, but is practically unknown in the United States. While swine growing on an extensive scale has been confined largely to the corn belt, it is becoming a profitable industry among dairymen. It is particularly so in connection with cheese making, the byproducts furnishing an economic and suitable food for swine.

A special exhibit will be made of breeds adapted for the production of bacon. The secret of "fattening hogs lean" is the one that swine growers are striving to learn, and this exhibit will be judged with special reference to their bacon producing qualities. It is expected that not less than 1,500 animals will be shown in the exhibit of swine.

A BIG CATTLE SHOW.

ALL BREEDS TO HAVE RECOGNITION AT THE BUFFALO EXPOSITION.

A Building to Be Devoted to Exhibits of Dairy Appliances, Methods and Products—Milk in All its Commercial Forms.

It is expected that the live stock, poultry and pet stock exhibits at the Pan-American Exposition next year all told will include about 25,000 individuals. Beginning the latter part of August, Superintendent Frank A. Converse has arranged for a special cattle show, to continue two weeks. The 16 or 17 breeds recognized in this country and Canada, including beef and dairy cattle, will have a place in this division. The classification of beef animals includes the Shorthorns, Herefords, Aberdeen-Angus, Galloways, Devons and Polled Durhams. The National Live Stock, Shorthorn, Hereford and Galloway associations will endeavor to make exhibits excelling in interest any that they have heretofore brought together. The co-operation of these great associations gives strong assurances of an unqualified success in this feature of the show. The National Live Stock association expects to make a very instructive exhibit, showing the character of animals upon the range many years ago along with those of the present day, illustrating the remarkable results of scientific breeding.

The dairy associations are putting forth a special effort to be represented at the Exposition by their best animals, and individual exhibitors are preparing to come in considerable numbers with specimens of very fine dairy stock. The displays of dairy breeds will include Jersey, Holstein, Ayrshire, Guernsey, Brown Swiss, Red Polled, French Canadian and Dutch Belted cattle. Liberal prizes are to be awarded by the Exposition for the best animals of the several breeds. These attractive purses are certain to bring out a fine selection of animals.

So important are the dairy interests of the Americas that a large building will be devoted exclusively to them at Buffalo. The building will be equipped with a complete refrigerating outfit, so that fresh exhibits may be shown throughout the continuance of the Exposition. The many ins and outs of dairy management will be illustrated by means of models of stable appointments, ties, water buckets, mangers

ing and vessels for setting and shipping milk. An exhibit will be made with special reference to the sanitary and hygienic management of the animals themselves, the stables which they occupy and the buildings in which the milk and cream are cared for. It has been found that nearly all diseases to which dairy cattle are subject can be avoided by cleanliness and proper management. The germ theory of the transmission of disease has had a revolutionary effect in dairy management, and the importance of the observance of hygienic rules will be graphically portrayed. The ventilation of dairy buildings, having due regard for the comfort and health of the animals, has been developed upon scientific lines, and present knowledge upon this feature of dairy construction will be shown by means of proper models. The exhibit of dairy products will include milk and cream in all their commercial forms, embracing pasteurized, sterilized and condensed milk, butter and many varieties of cheese.

America has never produced a distinctive breed of beef or dairy animals, but scientific breeding has so improved upon the imported stock that it is said the American product would hardly be recognized in the land of its origin. The effort will be made at this Exposition to bring to the attention of stock growers, dairymen and unscientific breeders of beef and dairy cattle the advantages to be derived from the possession of choicer and more efficient breeds.

It is said that half the dairymen in the United States are milking cows with no profit to their owners, while it is possible for well bred cows, whose milk is marketed at normal prices, to yield a profit of \$100 per annum. This lesson in profit and loss concerns every one who devotes any part of his time to dairy work.

The judging of cattle will take place in the Stadium, where the honors will be bestowed and where an audience of 10,000 people may witness these formalities. The live stock buildings will accommodate not less than 1,000 cattle, and their construction is upon plans best adapted for the comfort and convenience of the animals and herdsmen.

MARK BENNITT.

Rose Displays at Buffalo. In the outdoor horticultural exhibits of the Pan-American Exposition will be numerous beds of roses of choice varieties, each containing 500 bushes. Imagine what a brilliant show they will make when all in blossom!

The Sheridan Wit. Thomas Sheridan, the Irish clergyman and grandfather of Richard Brinsley Sheridan, the dramatist, had a great distaste for metaphysical discussions, whereas his son Tom, the actor, had a great liking for them. Tom one day tried to discuss with his father the doctrine of necessity.

"Pray, father," said he, "did you ever do anything in a state of perfect indifference—without motive, I mean, of some kind or other?" Sheridan, who saw what was coming, said, "Yes, certainly." "Indeed?" "Yes, indeed." "What, total indifference—total, entire, thorough indifference?" "Yes, total, entire, thorough indifference."

"My dear father," said Tom, "tell me what it is that you can do with (mind) total, entire, thorough indifference?" "Why, listen to you, Tom," said Sheridan.

Don't Drink Ice Cold Water. Ice cold water is not so good as lead water—that is, water cooled by ice without coming in contact with it. The less of either the better. It is an excellent practice to drink water—an abundance of it—just before retiring, also the first thing in the morning. It is a cleanser of the system and is a good diuretic.—Ladies' Home Journal.

The Fateful Hand. Palmist—This line in your hand indicates that you have a very brilliant future ahead of you. Simkins—Is that so? Palmist—Yes, but this other line indicates that you are too slow to ever catch up with it.—Chicago News.

The average speed of a carrier pigeon in calm weather is 1,200 yards a minute. With a strong wind in the direction of flight some pigeons have covered 1,900 yards a minute.

The man who loves home best and loves it most unselfishly loves his country best.—J. G. Holland.

Boy Without a Chance. Little George, who lives in a handsome house on a fine avenue, had been reading the biographies of Horace Greeley, Abraham Lincoln, George Peabody and General Grant. Laying down the book with great impatience, he exclaimed, "If we were only just poor, there might be some chance for me."—Detroit Free Press.

Warned. Suddenly a voice from the head of the stairs broke the stillness. "Grace?" "What is it, papa?" "Tell that young fellow not to knock over the milk picher on his way out."—Savannah Herald.
