THE PAN-AMERICAN EXPOSITION AT BUFFALO

By WILLIAM L. BUCHANAN, Director-General BY COURTESY OF COLLIER'S WEEKLY.

(CONTINUED FROM LAST WEEK.)

It does, the most fertile agricultural lands of the world toward both extremities of the hemisphere, with minerals and forests adjacent in either section, with great navigable waterways in both North and South America and with a central zone capable of producing to an unlimited degree all the tropical and subtropical products known to or used by man.

The Pan-American Exposition was not, therefore, either entirely or largely born of a selfish desire on the part of the people of the State of New York, and of Buffalo primarily, to draw attention to anything they possess or to acquire wholly local prestige and benefit from the undertaking. The location of the Exposition was fixed at Buffalo by reason of the fact that the courage of the people of that city and their public spirit and faith in their ability to finance and produce an International Exposition which should be confined to the Western Hemisphere was strong enough to convince Congress that the work would be well done, and hence the location was decided upon.

What Buffalo Has Done.

This step having been taken and the die thus cast, Buffalo has risen equal to the occasion and has subscribed millions of money, and as a city, there have been sunk, in one common purpose to succeed, all personal and sectional jealousies and ambitions.

A splendid location was selected for the Exposition, in which there is included a large part of the city's great and famously beautiful park, and from the time that was done up to the present moment the interest and energy manifested and the strong intent to succeed in every way shown by the people of the city in their great undertaking have been focused upon and centered in the work now nearing completion. The extent to which this interest has been shown can be gauged from the fact that on several recent Sundays 20,000 people have passed through the wagon gates to the grounds in order that they might see how the work of constructing the Exposition buildings was progressing.

Architectural Wonders.

In its architectural qualities and outlines the Exposition pays the republics of South and Central America the highest compliment possible, since in the character and design of its buildings there will be placed before the visitor the most perfect, the most beautiful and the most enchanting picture of Spanish architectural memories that has ever been presented in any country or place, while in its natural attractions and in the loveliness of its lake and forest and flower setting the Exposition as a picture will be a source of gladness and delight and a pride as well to every one who visits it. Those who have its direction and management are doing everything within their power to bring together about these central, salient points these finishing, connecting links of fountains, of brilliant lighting effects, of music, of gardens, of entertainments and of novelty which go so far toward making up the real life of a great Exposition.

As this is being written—six months previous to the opening of the Exposition—it is distinctly gratifying to the people of Buffalo and of the State of New York to be able to realize, as they do, that their efforts in the work of building up and arranging the ground-work of the Exposition have been warmly seconded on every hand, and that the discouragements they have had to overcome have but more closely accentuated and made apparent the merit of their undertaking and brought to them the unsought praise and hearty applause of their fellow citizens of the United States, while the prominent and praiseworthy activity being shown in Mexico, Guatemala, Nicaragua, Costa Rica, Honduras, Ecuador, Peru, Chili, Bolivia, the Argentine Republic and in Cuba, in all that relates to the participation of those countries in the Exposition, is most encouraging and presages a brilliant outcome. To this there is to be added the widespread interest now manifested in the Exposition in Canada, in Jamaica, in Guadeloupe, in Porto Rico, in Hawaii and in the Philippines. With these factors to work from, there would seem to be a bright outlook ahead for a successful outcome and a realization to some degree of the sentiments underlying the Exposition. With but few exceptions the States are cordially and enthusiastically interested in the Exposition and will participate, and they are joining heartily in the efforts to make it in its success consistent with the ideas held by those who formulated its plans and such as will amply and fully justify the pride, faith and confidence of the people who first took up and encouraged by every means within their power the holding of a Pan-American Exposition—at a practically most appropriate place.

which cannot, as it is, of the world's greatest extract, and amid the truly marvelously wonderful applications of the unlimited power now being transmitted from that great leap of waters. Bringing Together the Resources of the Americas.

I have given several reasons why it seemed that an opportune moment had been reached to hold a Pan-American Exposition and also why the people of the Western Hemisphere should be interested in and learn much of great advantage to them from such a bringing together of the resources of the Americas as it is contemplated and desired to do. Many other reasons could be given why a broader, more rational, better understood and more common sense Pan-American sentiment should exist between the people of the three Americas than is now apparent and as to why the suspicion concerning the attitude of the United States toward them that has lain not wholly or always dormant in the Latin American republics should be wiped out for all time. Among these would be the building of an isthmian canal, the possibility of a continental railway some day connecting the two ends of the hemisphere, the benefits and advantages in our relations with Latin America that are certain to follow the assimilation among us of the Spanish language since the Spanish war, which is now going on in every direction, and the striking changes our relations and business dealings and contact with Porto Rico, Cuba and the Philippines will bring about. These are all factors and things of interest and value to all the people of the Western Hemisphere, and each and all will be aided and benefited to some degree in every way by the holding of the Pan-American Exposition.

If this international enterprise shall therefore do aught in any of the directions I have indicated and if it shall in addition, as a result in any degree add something to the "better acquaintance" stage of the people of the Western Hemisphere and thus tend to bring to them all a more accurate knowledge than they now possess of each other's needs and opportunities and a truer appreciation of their industrial interdependence upon each other, it will not have been created in vain.

HORTICULTURE EXHIBIT.

Will Be One of the Principal Features of the Exposition.

Horticulture, viticulture and floriculture are linked together in one great class. In the midst of a country of orchards and vineyards the Pan-American Exposition will have abundant material close at hand and of the finest quality from which to make an exhibit worthy of the great event. The extensive floral decorations of the grounds constitute a rich display in floriculture, and several acres, including hundreds of beds, are devoted to the exhibits made by leading florists of the country. Flowers in profusion will welcome the earliest visitors and breathe out their fragrance and display their incomparable beauty the season through. Thousands of trees and shrubs flourish throughout the grounds. Double rows of thrifty trees surround the principal buildings. Follage and flowers there will be in great profusion. In the horticultural embellishment of the grounds the Pan-American will far surpass the efforts of all former exhibitions.

In the handsome and commodious Horticultural Building all the popular fruits of the different countries represented in the Pan-American Exposition will be displayed. With a suitable refrigerating room upon the grounds, it will be possible for the management to make a daily fresh display of fruit. Throughout the term of the Exposition, when certain fruits are at their best, special displays will be made of certain varieties. The exhibit from southern California will be particularly large, and New York and other states will be represented befittingly. Bottled productions will also have a place here, the wine growers of the Chautauque, central New York and Hudson river regions having applied for space for extensive exhibits. The opportunity for a timely display of choice native fruits will be improved. Dried and preserved fruits will be exhibited here. Articles and appliances used in horticulture will also be shown in this division.

The exhibits of nursery stock, including orchard and ornamental trees, shrubs and evergreens, will be unquestionably among the finest, if not the finest, ever made. The most prominent nurserymen in the country have interested themselves and will aim to outdo any former show of the kind. No less interest is taken by the leading florists, who are arranging exceptionally fine displays. Many large beds of flowers were planted some months ago, and they will aid in beautifying the scene from the early days of the Exposition.

MARK BENNETT

The Maine Building. The resources of the State of Maine will be exhibited at the Pan-American Exposition next summer in a building at once unique and appropriate. It

MAINE STATE BUILDING.

will be circular in form, with projecting entrances, and the decorations will be typical of things in the Pine Tree State. The building will challenge the attention and win the admiration of every visitor to the Exposition.

ELECTRIC SCIENCE.

Feature of Great Importance at the Pan-American.

Electricity and electrical appliances are to receive such attention as to make this one feature of the Pan-American Exposition of the greatest importance in the history of electrical development. In addition to the spectacular uses of electricity in illuminating buildings, towers, courts and fountains there will be very important demonstrations of the application of the force to many new purposes. Among them will be wireless telegraphy, the X rays, the electromobile, telegraphy to and from moving trains by induction, the improvements in the electric light and telephone. The wonderful labor saving qualities of electricity have revolutionized the production of many articles of merchandise within the past decade. This phase of employment of the electric fluid will form a most pleasant study for those who are interested in the newest of the sciences, and such a study as will only be possible at the Exposition. The development of electric power will be illustrated in a comprehensive manner.

Remarkable Cures of Rheumatism.

From the Vindicator, Rutherfordton, N. C.

The editor of the Vindicator has had occasion to test the efficacy of Chamberlain's Pain Balm twice with the most remarkable results in each case. First, with rheumatism in the shoulder from which he suffered excruciating pain for ten days, which was relieved with two applications of Pain Balm, rubbing the parts afflicted and realizing instant benefit and entire relief in a very short time. Second, in rheumatism in thigh joint, almost prostrating him with severe pain, which was relieved by two applications, rubbing with the liniment on retiring at night, and getting up free from pain. For sale by, Dr. G. S. Darling.

PUBLIC AUCTION.

The undersigned will sell at public auction at his residence on Hemlock Road, in Grant township, Monday, March 25, 1901 at one o'clock, p. m. the following property to wit:

Fifty two sheep, 16 head of cattle, four horses, seven pigs.

Terms of sale: All sums under \$15 cash. Over that amount six months time will be given on good approved notes, of five per cent discount for cash.

PETER BAMBERGER.

Like Oliver Twist, children ask for more when given One Minute Cough Cure. Mothers endorse it highly for croup. It quickly cures all coughs and colds and every throat and lung trouble. It is a specific for grippe and asthma and has long been a well known remedy for whooping cough.

When you need Flour try . . .

WHITE SATIN.

Its simply an innovation in the Flour Line.

All dealers have it.

A rural farmer recently wrote to a city newspaper concerning the seed of Mardi Gras, and where he could get it, and wondered if it was for hay lawns or meadow. He said he was progressive and wanted to keep up with the times in the way of grazing and cow feed.
Headache often results from a disordered condition of the stomach and constipation of the bowels. A dose or two of Chamberlain's Stomach and Liver Tablets will correct the disorders and cure the headache. Sold by G. S. Darling Druggist.
A West Bay City man paid 85 cents for two parcels at a public sale of unclaimed express packages. Each of the packages contained a fine watch. Another man secured a diamond ring for 40 cents, which encouraged another man to pay a similar sum for a package that contained a small, elegantly put up sample of hay seed.
Mrs. C. E. VanDeusen, of Kilbourn, Wis., was afflicted with stomach trouble and constipation for long time. She says, "I have tried many preparations but none have done me the good that Chamberlain's Stomach and Liver Tablets have." These Tablets are for sale at Darling's drug store. Price, 25 cents.

DEATH'S DOINGS

A Number of Pioneers have Passed to the Great Beyond During the Past Week.

It is our sad duty to announce the passing of a number of old and highly respected citizens of this vicinity to the great beyond, during the past few days.

WILLIAM NISBET.
William Nisbet, of this city, died at the home of his daughter, Mrs. P. J. McCombs, in Bay City, at 7:30 o'clock, Friday morning, March 15, 1901, aged 65 years.
The deceased was born at Beverly, Ont., June 9, 1836. He followed the occupation of farming and lumbering in his native home until 1876, when he came to Tawas City, as the head of the lumbering firm of Nisbet Green & Co., who conducted the Cameron mill for two or three years, since which time he has lived here and been engaged in the lumber business, and farming. He was married in 1863, to Sophia Patterson, who survives him.
Five children were born to them, two whom—James H., of this city, and Mrs. Margaret McCombs survive him.
Mr. Nisbet always took an active interest in public affairs, and has held several offices, being at the time of his death mayor of this city. During the past year he has been in rather poor health, and went to Bay City several weeks ago for medical treatment. The immediate cause of his death was la grippe.
The funeral was held from the home in this city Monday and conducted by Rev. Dr. Smith, of Bay City, and the remains were interred in the Tawas City cemetery.

V. H. BAGER
Word was received here on Saturday last announcing that V. H. Bager, of this city had dropped dead at Onaway, from heart failure. Joseph H. Wilson, went to that village and brought the remains home Monday evening.
The deceased was born in Copenhagen, Denmark, March 13, 1841, and was 61 years and three days of age.
He left his native country at the age of 21 years, and after four years in West India he came to America, and settled in Tawas City in the fall of 1868, and for a number of years was one of our prosperous business men. Reverses came to him which swept away the accumulation of years of toil, and about ten years ago he went to Montana, where he remained until last May, when he returned to this city. He had worked at Onaway since about January 1.
He leaves a wife and three sons, besides a large circle of friends to mourn his loss. The funeral was held from the Congregational church at 10:30 Thursday forenoon, and conducted by Rev. A. Waterbury. The remains were interred in the Tawas City cemetery.

REUBEN OSBORN.
After a long and painful illness, Reuben Osborn, an old respected resi-

dent of Tawas township, died at his home, on the Meadow Road, Monday March, 18th, 1901, at the age of 67 years.
The deceased was born in New York state, May, 10, 1833. He came to East Tawas, June 19, 1868. For nine years he was proprietor of the Strong house, and moved from there to the farm where he died. He was universally respected by all for his kind and generous ways. He leaves a wife and one daughter, Mrs. Henry Hanson, of East Tawas, and other relatives to mourn his loss. The funeral was held from the residence yesterday afternoon and the remains were laid at rest in the East Tawas cemetery.

E. D. BENEDICT.
Word was received here Wednesday announcing the death of Emery D. Benedict at Grand Rapids. Mr. Benedict has been a great sufferer from Bright's disease for the past two or three years, and accompanied by Mrs. Benedict, went to Grand Rapids, Wednesday of last week for medical treatment. The deceased has been employed as an engineer on the D. & M. Ry. for about 15 years, until poor health compelled him to discontinue a few months ago. He was universally respected by a large circle of friends and acquaintances. The remains were taken to Anherstburg, Ont. for interment. He leaves a wife and daughter to mourn his loss.

WILLIAM KENNEDY
Died, at Kane, Pa., Sunday, March 17, 1901, of pneumonia. The deceased was born in Ireland, and was a resident of this city and vicinity for about 20 years, where he was engaged as filer in the various mills. He left here about seven years ago, going to Canada. He removed to Kane about one year ago. The deceased was about 52 years of age, and leaves a wife and a large circle of friends to mourn his loss. The funeral was held at Kane Tuesday.

WILLIAM IRISH,
Of Grant township died at Whittimore Wednesday, of rheumatism of the heart. He was sick only a few days, and his death was unexpected. The funeral will be held today.

BENJAMIN RICHARDS
Died at his home in East Tawas, at 2:30 o'clock this morning. Mr. Richards was one of the oldest and most highly respected residents of that city.

Candidates.
At the republican ward caucuses in this city held Wednesday evening, the following candidates were nominated.
