NUMBER 22.

BLACK DRESS GOODS

Are apparently the same everywhere—they are not,

Ten cents a yard difference in price may cover a multitude of sins, or which you are only made aware when the cheap black dress turns rusty and its quality is no more.

We have studied the black dress goods question, and experience tells us that seekers of quality will pay for it. We have black goods of quality, and you are not asked to pay a single penny more than is right.

42 inch black Cheviot, all wool, 59c per yard.

50 inch black Cheviot, very fine 89c per yard.

54 inch black Cheviot, extra weight, \$1.00 per yard.

Its hard to find a better wearing or a more stylish suit cloth than a good black Cheviot.

TAMISE—Soft clinging light weight wool stuff; very popular for summer wear, 50c and 85c.

MELROSE—A peculiar seeded effect which is very durable and a great seller.

42 inch \$1.00 Silk Warp Melrose, \$1.50.

PRUNELLAS—in all qualities. They wear like a firm, heavy old fashioned serge, but they are new and stylish, at \$1.00, \$1.25, \$1.69 and \$1.75. 42 to 48 inches wide.

BLACK ALABATROS—We have a fine one at 50c.

SATIN DeCHINE—A substitute for taffeta silk—will wear better—is just as pretty and very much cheaper. 46 inches wide. \$1.00 per yard. Heavy black Meltons for walking skirts, from 45c to \$1.75 per yard.

All Dealers Have It.

The Boy's Best Friend.

There is time in almost every boy's life when home ties are not weighed at their full worth. He is anxious to get out into the world, to see the sights and do something to make his mark. If his parents are not anxious to have him go, or even oppose any idea of the kind, he may induce himself to run away. That is the time the boy makes a grievous error. Stories have been written by the fiction makers of boys that ran away from home to go to sea. They went to far away lands, were ship wrecked, possibly, or had some strange encounter and when they came back home they were heroes. But seldom is that the case in actual life. Many a boy has run away from home never to return, and strolling in a strange land, away from all relatives and acquaintances, has regretted a hundred times that he ever left his own fireside. There are some of these runaway boys in Bay City, now grown to manhood, who will tell you that they have not heard from home in many years. They do not know if their mothers or fathers are living, or anything about the old home. But little did they know of the sorrow their going caused the poor broken hearted mother at home, and of the sleepless nights and long hours of worry they caused her. Many a poor mother has gone down to a premature grave from worrying about her strayed child.

Running away from home is not the real Sunday school picnic that some of the story books picture it to be. The boy's best friend is his mother, and there is no place like home.—*Bay City Times*.

This Was In Gladwin.

A decision affecting the definition of the term "religious meeting," was last week handed down by Gladwin jury. Three boys were on trial charged with "disturbing a meeting." The assemblage referred to was a meeting of the Epworth league. The disturbance was established, but the jury was for a time hung up on a snag. They could not tell what "a religious meeting" was, because of having attended the sessions, were not sure they were truly religious; others, having never attended religious meetings failed to get an idea as to just what a "religious meeting" was. Finally, the jury gave the prisoners the benefit of the doubt, and brought in a verdict of no cause of action.

Uncle Sam's Conscience Fund.

Up to May 2 last the total contributions to the "conscience fund" of the treasury department amounted to \$311,993.57, says the *Washington Star*. This is the fund to which is credited money sent to the treasury by persons who desire to make anonymous restitution to Uncle Sam of money which they have received or taken from the government and to which they feel they are not entitled. The first contribution was received in 1811, and amounted for the year to \$240. The smallest sum ever received in one year was \$6 and the largest was \$23,155.11. The money thus received is turned into the general fund of the government as miscellaneous receipts.

Depositors in Tawas Saving Bank.

All depositors of said bank who have not received the 15 per cent dividend partly paid upon deposits will be paid same at once by calling at my office.

N. C. Hartingh, Receiver.

If people only knew what we know about Kodol Dyspepsia Cure, it would be used in nearly every household, as there are few people who do not suffer from a feeling of fullness after eating, belching, flatulence, sour stomach or water brash, caused by indigestion or dyspepsia. A preparation such as Kodol Dyspepsia Cure, which, with no aid from the stomach, will digest your food, certainly can't help but do you good. Dr. G. S. Darling.

Why Some Men fail.

Many of the failures in business and professional life are attributable more to a lack of energy on the part of the worker than to any other cause. Both physical and mental energy are requisite but the later particularly. Some minds seem quite incapable of action, independent of leading and suggestion from other minds. They cannot originate or even execute ideas except in a dependent manner, started and inspired by continual pushing from others. They have no springs of power within themselves. If they are pushed or led they may work in a sort of way, but they get sidetracked through lack of strength of purpose.

It is not lack of capacity which causes this, but the faculties seem to be paralyzed and there is no energy in them. They are like dead springs. They are helpless, being useless to invent and plan and can only follow, never lead; can only obey and never command.

The men who make their mark in the world the men who achieve something either great or small, are always the men who have this innate power of the initiative. They have strong mentality. Their minds act for themselves, grasping situations and foreseeing consequences and possibilities. It is not always nor even often, perhaps, that the men of power are physically robust, but they are men of tremendous vigor of mind and will. They can plan great enterprises and overcome great obstacles. They can originate methods and can suit the action to the idea. Nor can such a mind be idle in a dallying sort of way. Its life is like the physical life when full of the spring of health. It is impatient of inaction and finds food for progress and for enterprise every where.

Oftentimes the lack of this mental energy is due to habit. Minds which have the power within them are repressed and stunted by the contracted custom of depending on others. There is a joy and independent action, unmatched by any other pleasure, and this they are missing.—*Ex.*

Very Fly.

The Trout came into the drinking parlor of the Anglerworm Inn, looking hot, dusty and tired.

"What luck," asked the Pickrel who was tending bar while the Sturgeon was out.

"Oh pruty good," replied the rainbow "I aint no Jim Lewis, but I got up early this morning and went out before breakfast with a brown hackle two cow dungs and about a pint of anglerworms I broke my pole and lost my bottle, but I saw a lot of resorter girls legs, and got my basket full of good sized Resorters, none of which weighed less than a pound. 'Have drink?' asked the Pickrel, in a scally tone 'what'll you take?' 'Oh well, I'd a got more' said the trout dejectedly, 'but they aint bitin good today, specially the Pittsburg storges; gimme a little Bass's ale and I'll Pike along.' He Poke.—*Tuscarora*.

It Saved His Leg.

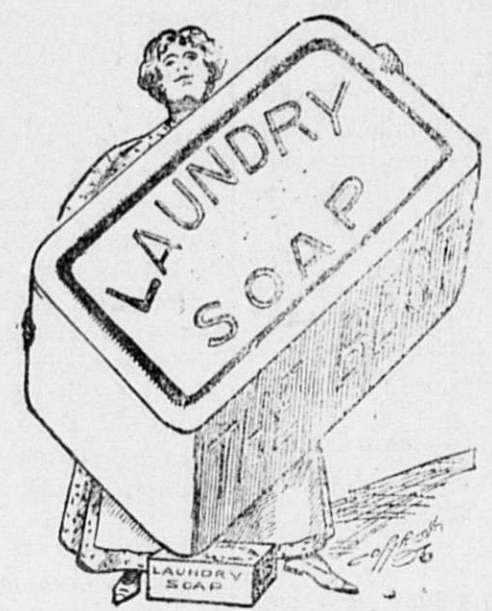

P. A. Danforth of LaGrange, Ga. suffered for six months with a frightful running sore on his leg; but writes that Bucklen's Acania Salve wholly cured it in five days. For Ulcers, wounds, piles, it's the best salve in the world. Cure guaranteed. Only 25 cents. Sold by Dr. G. S. Darling and J. E. Dillon.

Bilious is a condition characterized by a disturbance of the digestive organs. The stomach is debilitated, the liver torpid, the bowels constipated. There is a loathing of food, pains in the bowels, dizziness, coated tongue and vomiting, first of the undigested or partly digested food and then of bile. Chamberlain's Stomach and Liver Tablets allay the disturbances of the stomach and create a healthy appetite. They also tone up the liver to a healthy action and regulate the bowels. Try them and you are certain to be pleased with the result. For sale by G. S. Darling druggist.

'Phone No. 68.

The Nevins garnishee bill has been signed by the governor and will take effect 90 days after the legislature adjourns.

The Michigan building at the Pan-American will be dedicated June 10. Hon. Washington Gardner will be the orator.

That Chicago judge who decided that the blacklisting of a discharged employee is lawful, should be removed from the bench.

The people of the state are to be congratulated on the fact that the most disgraceful session of the state legislature ever known has passed into history.

Why can't Uncle Sam challenge the New York Yacht Club to a race for the Americans cup, and so take that trophy out of the hands of a self satisfied lot of snobs.

A Chicago politician who was beat, on at the last election declares that he is going out of politics to make money for his family. If he can't make enough to satisfy him in Chicago politics, he is hard to please.

The state legislature closed its labors at noon Wednesday. Many important and disreputable bills were either killed outright or left on the docket, but every political "ripper" was passed before adjournment.

They are calling for cheaper divorce in Canada, the cost of an uncontested case being about \$500. What seems to be needed over on this side of the river seems to be something that will make divorces harder rather than easier to get.

Gov Bliss signed the new railroad taxation bill last Monday. Under this bill the state tax commission is increased from three to five members, and the governor named as the new members thereof Ira T. Sayre, of Genesee county, and Graham Pope, of Houghton county.

During the past week the friends of two United States Senators have announced their men as candidates for the republican presidential nomination for 1904. The first announcement was that of Senator Fairbanks, of Indiana, which was closely followed by that of Senator Foraker, of Ohio.

There is much speculation as to which of Iosco county's candidates for the congressional nomination will secure the delegation of the county. Temple Emery of East Tawas, and George a Loud, of AuSable, each have a strong following, and are putting up a warm fight. Either gentleman will make a very desirable candidate for his party of nomination.

Auditor General Powers is sending out circulars to all the county treasurers in the state relative to the cancellation of tax purchases. It seems that a former employe is sending out postal cards claiming to have information entitling various parties who have purchased lands or tax titles from the department to a refund. This information he agrees to disclose for a stipulated sum, depending upon the amount of the refund. The Auditor-General desires to put a stop to this, as he says that the department stands ready to adjust such claims free of charge when the proper application is made to the department.

DeWitt's Little Early Risers search the remotest parts of the bowels and remove the impurities speedily with no discomfort. They are famous for their efficacy. Easy to take, never gripe. Dr. G. S. Darling,

Captain Charles D. Sigsbee, who commanded the Maine when she was blown up in Havana Harbor and who is now chief intelligence officer, has made formal application to command the battleship Maine when she is completed. The Maine will undoubtedly be finished and ready for service in 1903. In naval circles it is believed that Capt. Sigsbee's application should be acted on favorably as his excellent work in Havana is recalled with approval by the officers.

The total enrollment of students in the University of Michigan for the college year 1900 1901 is 3,712. Of this number 115 are graduate student and 3,597 are undergraduates. One thousand three hundred and sixty seven, or more than one third of the total number, are enrolled in the literary department. The second largest enrollment, 873, is in the law department and the third largest, 563, is in the medical department. The total enrollment, exclusive of the summer session of 1900, is 3,538.

The supreme court of the United States has just decided, after the nine judges had considered the question for several months, that congress has the power to levy a duty on products brought from Porto Rico to the United States. Porto Rico is, and is not, a part of the United States, according to the opinion of five supreme judges. The other four do not agree with the decision of the majority. While the decision settles the question, as far as action is concerned, it will not change the opinion of any intelligent person. Those who believed the constitution followed the flag, will believe so still, and those who believe that Porto Rico and the Philippines are but colonies, will not change their belief because of the supreme court's decision.

Preacher and The Society Girl.

Prof. J. Scott Clark, speaking to his class in English literature at Northwestern university at Chicago, said the merits of present day women in no way equaled those of the women of the day of his mother and grandfather. His comment was directed against the society girl.

"The society girl is a parasite," said Prof. Clark. "She lives on her father, and in return she gives him nothing. She is of no benefit to the world, and there is no need of our keeping such a weight with us."

Continuing, he told of the failures which society women make as managers of a household, and said they were unable to fill the domestic requirements necessary to make the home an abode of comfort. "They toil not, neither do they spin, yet Solomon in all his glory was not arrayed like one of these," quoted the professor, and he continued:

"The young man who seeks a society girl for a wife is on the wrong track. May God help him that marries one of them, for he is tying a millstone around his neck."

To Uncle Sam's Honor.

The record which the American troops have left in China is one of which other nations whose troops have been associated in the expedition there may well be envious. From the beginning of the invasion of China; the troops of Uncle Sam have been there for a single purpose and that was to protect Americas and American interests. They have been of the most valourous, of the first in fight and first in peace. They have so treated the Chinese, that while they are respected and therefore have brought respect and honor to the flag they represent, they have also brought friendship and trust as well. The Chinese were loth to see the American soldiers leave Peking. They had had experiences with the troops of other nations, and they feared to have the restraining effect of the presence of the boys in blue removed. It is no wonder that nations want to build on Uncle Sam's model when such a record is made. It is to be hoped that no scheming politician will now find some excuse to change the admirable policy followed and spoil the excellent effect produced.—Saginaw News.

Old Soldier's Experience.

M. M. Austin, a civil war veteran, of Winchester, Ind., writes: "My wife was sick a long time in spite of good doctor's treatment, but was wholly cured by Dr. King's New Life Pills, which worked wonders for her health." They always do. Try them. Only 25 cents at G. S. Darling's and J. E. Dillon's.

NOTICE.

Send your clothes to the Tawas City Laundry, where you can get them done in first style. Window curtains, shirt waists and all kinds of delicate color receive special attention. Laundry opposite Prescott's barn. J. M. HAMILTON, Propr.

A CHAMPAGNE CORK.

It Costs More Than the Wine That Is In the Bottle.

To the average lover of champagne the apparent climax of value is in the fizzy fluid itself. Bottle, cork and label are merely accessories. Yet the fact remains that the original cost of the wine is relatively trifling, and the most expensive part of the whole affair, leaving out the cost of the expert labor expended in "ripening" the vintage, is the despised and swollen cork. The cork stands for more than the first cost of the wine plus the value of the bottle, wire, label and wrappings. The cork costs 25 cents. All the rest only foots up a fraction under 18 cents.

The champagne cork is the finest bark that is grown. The texture must be flawless or the life of the wine will be lost. Then its peculiar shape requires that it shall be fashioned by hand. No machine has yet been invented that will satisfy the champagne cork connoisseur as well as the deft work of nimble fingers. This expenditure of skill and time combines with equality to make these particular bottle stoppers cheap at a quarter apiece.

The young wine, on the contrary, when it goes into the bottle is cheap—16 cents a quart. The value and the flavor come with age. Countless times the bottles must be turned carefully and gently before the juice of the grape is fit to tickle the palate of an epicure.

There is a wonderful city in France, the subterranean city of Epernay, into whose silent streets no ray of sunshine ever steals, where the wine is stored to ripen, guarded as jealously as if it were human. Miles and miles of streets are hewn out of the chalky soil and cemented with millions and millions of champagne bottles of all blends and vintages left there to ripen. When the bottles went into these underground cloisters, the cork was king by virtue of its cost. When they return to the world of light and life, the cork has become insignificant in comparison with the wine.

Winchouses frequently pay good prices for corks bearing their mark, thus enabling themselves to gauge accurately the esteem in which various vintages are held by the public.

Champagne corks, too, have a special value in the toilet. Their fine texture makes them peculiarly available in treating the skin with powders or similar applications, and the Parisian or Viennese belle whose toilet set does not contain an assortment of champagne corks is rare. The finest and most perfect specimens only are used for this purpose, and they retail readily at the equivalent of 50 cents each.—Chicago Inter Ocean.

SHOOTING STARS.

Thousands of Them Flash Through Space Every Twenty-four Hours.

Shooting stars are only little masses of matter—bits of rock or metal or claudlets of dust and gas—which are flying unresisted through space just as planets and comets do, in paths which, within the limits of our solar system, are controlled by the attraction of the sun. They move with a speed of several miles a second, far exceeding that of any military projectile, but are too small to be seen by us except when they enter our atmosphere, and, becoming intensely heated by the resistance they encounter, light up and burn for a moment; for, to use Lord Kelvin's expression, a body rushing through the air at such an enormous velocity is during its flight virtually "immersed in a blow-pipe flame" having a temperature comparable with that of an electric arc. As a rule, they are completely consumed in the upper air, so that nothing reaches the surface of the earth except perhaps a little ash, settling slowly as an imperceptible "smoke." Occasionally, however, some mass larger than usual survives in part the fiery ordeal, and its fragments fall to the ground as specimens of the material of "other worlds than ours."

The total number of these flying pebbles in interplanetary space must be enormous, though estimates differ rather widely. An ordinary observer under ordinary circumstances will average about eight an hour in a clear, moonless sky. Schmidt of Athens, however, in the clear Grecian air, nearly doubles the number and reckons about 15 to the hour for a single observer. It is found also that one person is able to note about one-sixth of all that are visible at his station by a party of observers sufficiently large to watch the entire heavens minutely. If, therefore, we accept the estimate of Schmidt, it appears that about 2,200 must ordinarily come within the range of vision at any given station every 24 hours, though of course those that fall in the daytime cannot be seen.—Professor C. A. Young in Lippincott's.

Real Greatness.

An exchange gives this story of a pompous member of parliament who attended an agricultural show in Dublin. He arrived late and found himself on the outskirts of a huge crowd.

Being anxious to obtain a good view for himself and a lady friend who accompanied him, and presuming that he was well known to the spectators, he tapped a burly coal porter on the shoulder and peremptorily demanded, "Make way there."

"Garn, who are you pushin'?" was the unexpected response.

"Do you know who I am, sir?" cried the indignant M. P. "I am a representative of the people."

"Yah," growled the porter, as he stood unmoved, "but we're the bloomin' people themselves."

Fooiling the Youngsters.

Mrs. Grimes—How in the world do you get rid of all your stale bread? I have to throw lots of mine away.

Mrs. Smarte—There is no need for you to do that. Why not do as I do? I just hide it away from the children.

Mrs. Grimes—Hide it away from the children? What then?

Mrs. Smarte—Then the children find it and eat up every morsel of it.—Boston Transcript.

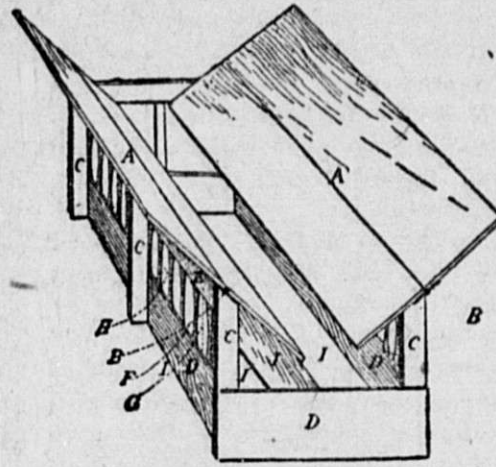

USEFUL SHEEP RACK,

Designed to Prevent Waste During Winter Feeding.

In regard to this useful sheep rack, originally illustrated in the Michigan Farmer, the writer, who furnished the sketch, is quoted thus: From many years' experience I consider sheep of all the domestic animals the hardest to feed through the winter months without waste.

For many years I used the old fashioned slat box rack that almost every farmer has seen. I found it objection-

IMPROVED SHEEP RACK.

[The wings A in this cut hang on hinges B and may be tipped up and stand perpendicular on the outside of the rack. These wings are made of two wide boards, the wider the better. We use the posts C of 2 by 4 stuff on the outside of the rack, but they can be used either out or in. D, baseboard, 9 inches wide; E, top board, 6 inches wide; F, slats, about 3 inches wide; G, space between E and D, 12 to 14 inches; H, space between slats, 8 to 10 inches, as to size of sheep kept. A 12 foot rack will accommodate about 12 sheep on a side. I, bottom boards, placed entirely in under and nailed securely to the bottom of the rack; J, center bottom boards placed on top and lapping on to the other two, I, I. This leaves a shoulder of one inch, against which the sheep can gnaw ear corn or roots of any kind. The body of the rack should be two feet inside. The wings should meet within about six inches.]

able on the ground both of waste and getting the chaff into the wool, so I constructed a patent or folding rack. This worked very well for some time, but at last the sheep grew cunning, and if left open enough so they could reach it at all they would still pull the hay out and get it under their feet. The trouble with the patent rack is there is not enough manger room, so I conceived the idea of combining the wings of the folding rack with the manger room of the old rack, as shown on the accompanying diagram. This proves so far to be a great success. The hay is simply thrown on top of the two large wings.

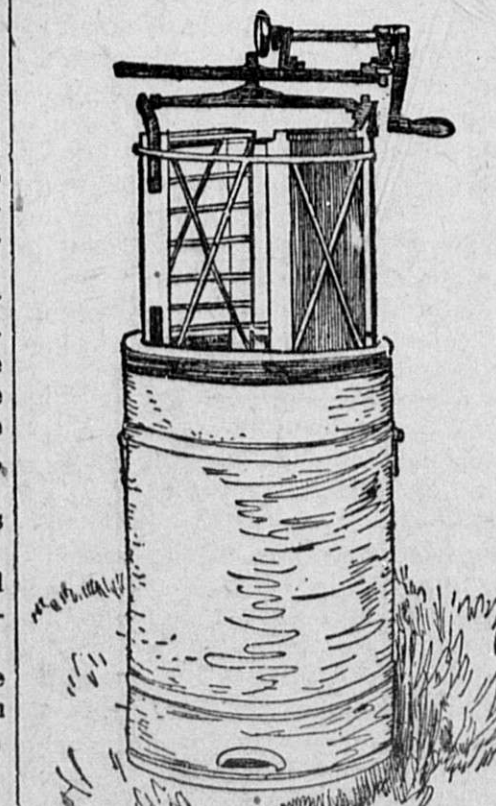

Will Bees Freeze in Winter?

Discussing the question "Will Bees Freeze in Winter?" in the light of last year's experiences, A. H. Duff has said in substance in Farm, Field and Fireside: Bees that are in proper condition in the hives will not freeze, otherwise they will. If a colony of bees have ample stores of honey and the honey so situated that they can partake of it as they need it, they will not freeze. Hungry bees will freeze, and losses largely occur from starvation. Bees starve with plenty of honey in the hive. This is true from the fact that during a long spell of continued cold weather owing to the intense cold the cluster of bees in the hive is unable to expand in the least, to move sidewise but a few inches, to where the honey is located. Thus they starve and then freeze with plenty of food in sight.

A good winter hive for bees is a long deep one that admits of all the surplus honey being stored directly above the bees, and a hive of this kind will winter bees without freezing from the fact that the bees have access to the honey at all times, for the heat of the cluster naturally rising upward the bees can ascend with it and thus readily reach the honey directly above them. To remedy this defect of the modern hive, which is shallow, the chaff hive is brought into use. By thus placing heavy packing around the bees their natural heat is retained to such extent that only in very severe cold weather are they unable to reach their stores.

Extracting Honey.

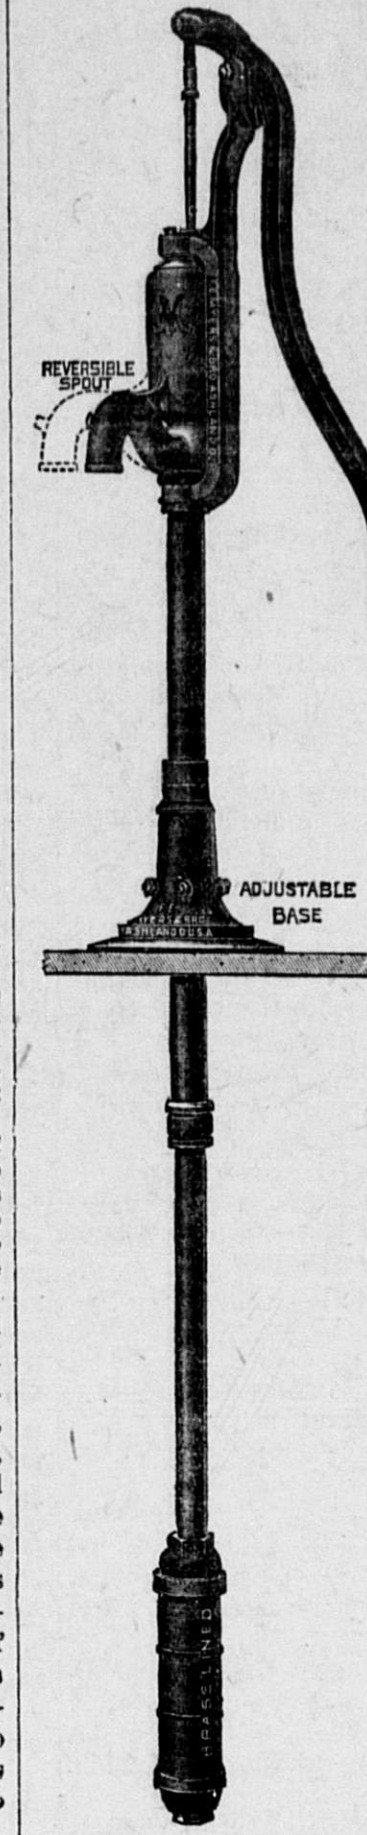

The honey extractor is one of the principal sources of profit in connection with beekeeping, says an authority in The Farm, Field and Fireside. This machine extracts the liquid from the combs and leaves the comb as clear of injury as before taken from the hive. In the accompanying illustration

A HONEY EXTRACTOR.

the inside gearing is raised up and exposed to view and shows two comb baskets, each to accommodate a frame of comb to be extracted, and by turning the crank the reel is turned with such velocity as to empty the entire comb of its contents by centrifugal force. The empty combs are then placed back in the hives of bees to again be filled.

These Make Life's Labor Easy FOR THE FARMER.

Myer's celebrated easy working anti-freezing pump. They have brass lined cylinders, glass valve seats--can be adjusted to fit any platform. Made in plain set length, set length wind mill top and force pumps. We have a nice assortment at all times, and the price is right. Corn planters, potato planters, wing shovel plows, double shovel and five-tooth cultivators, Everything to plant and care for your farm.

One-Gale daisy hay rake, 8 feet, \$15.00.

Screen doors, \$1.75 and down to the bottom.

Window screens, 35c and less.

We also carry anything you may want in seeds for planting. Fine Alsike and mammoth clover, timothy, Hungarian millet.

Mangel witzel, ruta бага, carrots, and in fact all kinds of seeds in bulk,

C. H. PRESCOTT & SONS.

NEWS OF THE WEEK

Gathered from Various Sources.

Are we to celebrate?

Watch for the balloon ascension.

Warm weather is what all are wishing for.

The straw hat will soon be making itself felt.

Buy a Durant-Dort buggy of G. S. Darling.

Buy a Cleveland bicycle of Harry Schlanger.

C. D. Brooks, of Omer, was in the city Tuesday.

You can buy a Crescent wheel for \$25.00, at Mount's.

Joseph Duby has been at Bay City on business this week.

The P. M. Ry. will build a new \$50,000 depot at Bay City.

Mrs. T. H. Dodd arrived home from Cass City Wednesday.

Some much needed repairs have been made on our streets this week.

The graduating exercises of the East Tawas school occur this evening.

The steam barge Wyoming, loaded lumber at Prescott's dock this week.

The new gas buoy was placed in its position off Ottawa Point this week.

There is no better wheel made than the Cleveland. Harry Schlanger sells them.

The sixth Michigan Cavalry will hold its annual reunion at Ionia, July 4.

Before you buy your bicycle this spring call and see the Crescent wheel at Mount's.

If you wish to influence an unreasonable person, let him suppose you agree with him.

The Alpena cement factory is now turning out 500 barrels of cement every 24 hours.

O. R. Bouquette, is now engaged in pulling the spiles in the old Potts dock at AuSable.

There is satisfaction in riding a Cleveland wheel. Harry Schlanger is agent for them.

Hon. Grant Fellows, of Hudson, delivered the Memorial Day address at AuSable yesterday.

The Gazette appeared last week with a new heading which adds much to its neat appearance.

Harry Schlanger, at Friedman's, will sell you a Cleveland bicycle, the best made, at \$25 to \$35.

When a girl knows she is pretty, she usually chums with a homely girl to make the contrast striking.

WANTED.—\$1000.00 worth of butter and eggs.
MURPHY & KULASZASKI.

The celebrated Harison wagon is the best made. For sale by
WHITEMORE & PHINNEY.

Mrs. Mary Merrick, of East Tawas, widow of the late Joseph Merrick, has been granted a pension of \$8 per month.

The East Tawas high school defeated the AuSable high school at a game of base ball yesterday by a score of 13 to 4.

The D. & M. will run an excursion to Bay City next Sunday. Fare for round trip \$1. The train will leave this station at 9.01.

Claude Phelan, a Tawas boy and former employe of the HERALD, now has charge of the job department of the Leader office, at Dexter, N. Y.

C. L. Bonney returned Monday evening from Battle Creek where he was called by the death of his father. Mr. B's mother died last February.

Try the new remedy for costiveness, Chamberlain's Stomach and Liver Tablets. Every box guaranteed. Price 25 cents. For sale by G. S. Darling, druggist.

For sale or exchange, 40 acres of land. Close by corporation limits of Tawas City. Twenty acres improved. Good buildings and a fine young orchard. Apply M. Murphy city.

WANTED.—2000 bushels of huckleberries, for cash.
MURPHY & KULASZASKI.

All crops are backward this spring showing to the cold weather, and much fear is expressed by many that much of the seed planted will rot if the weather does not soon improve.

For sale or exchange, 40 acres of land close by corporation limits of Tawas City Mich. Twenty acres improved. Good buildings and a fine young orchard. Apply M. Murphy, city.

Mrs. Charles Harris, jr. lost a pocketbook containing over \$6, last Monday, between her home and the depot. It is to be hoped that the finder is possessed with enough honor to return same.

No steps have been taken towards arranging for the celebration of July 4th, in this city, as yet, although considerable talk is heard. It is time action was taken if a celebration is to be had.

Henry Kane took charge of the Bay Side Monday. The hotel has been newly papered and renovated and Mr. K. is now prepared to attend to the wants of the traveling public. He will conduct a livery in connection with the hotel.

The G. A. R. memorial services at the Baptist church last Sunday afternoon were attended by a large congregation. Rev. D. Q. Barry delivered a very appropriate and entertaining sermon which was well received. The special music was well rendered.

Jake Wortz beat his previous record Monday by capturing a sixteen inch trout, in cold creek, which weighed one and three-quarters pounds. It was the most handsome "beauty" that it has ever been our good fortune to see.

Col. G. A. Loud, of Au Sable, was in the city Wednesday, in the interests of his candidacy for the congressional nomination. Mr. Loud's friends seem to think that there is no doubt of his ability to secure the Iosco county delegation.

Any person who desires the special announcement which describes in detail the instruction offered in the course in higher commercial education, or in public administration, may secure the same by addressing James H. Wade, secretary of the University, Ann Arbor, Mich.

A wise saying is this by an experienced employer: "I always give preference to men who want to learn, because a studious man is more attentive to his duties and can be instructed easier than one who does not care to study, and if a man studies he has no time to waste about places he had better not be."

If the paper made a mistake in something concerning you, how much of an effort did you make to help the editor get the facts? It is "catch it as you can" in most cases with the editor, and the time is limited. Remember the same system cannot be carried out in a county office in large towns.—West Mansfield Enterprise.

"Our little girl was unconscious from strangulation during a sudden and terrible attack of croup. I quickly secured a bottle of One Minute Cough Cure, giving her three doses. The croup was mastered and our little darling speedily recovered." So writes A. L. Spafford, Chester, Mich. Dr. G. S. Darling.

Electric kisses have been discovered. Shuffle your feet over the carpet thus charging yourself with electricity, then kiss your best girl. A spark at the point of contact can be plainly seen in a dark room. Antiquarians who have been consulted about this interesting phenomenon, say that it was well known to the ancients and commonly practiced by them. The custom doubtless gave rise to the term "sparking."—Ee.

No man can plead religious convictions in excuse of a violation by him of the rights of others. A sick child has its rights. A parent is under legal obligations to do all in his power to protect and save the life of his child. He is not doing this when he refuses the child the aid and skill of medical science. This is the view the New York court of appeals is likely to take in the Pierson case if it be carried up to that court.—Chicago Tribune.

G. S. Darling has the finest line of carriages and buggies ever brought to Iosco county. They are the Durant-Dort.

Skin affections will readily disappear by using De Witt's Witch Hazel Salve. Look out for counterfeits. If you get De Witt's you will get good results. It is the quick and positive cure for piles. Dr. G. S. Darling.

The memorial day services yesterday forenoon were largely attended notwithstanding the fact that a light rain was falling almost the entire time. Owing to the bad condition of the weather the only exercises carried out were the ritualistic services of the Grand Army and the Maccabees.

The graduating exercises of the class of '01, of the East Tawas high schools occur at the opera house, this, Friday, evening. The class is composed of nine members, as follows, Misses Maude Simmons, Edna Anker, Edyth Anschuetz, Alberta Sharpe, Nina Fox, Messrs. Harry LaBerge, Jay Oakes, William Grant and Amos Fortier.

The city of New Baltimore, which will run between Saginaw and East Tawas, during the summer, begins her regular trips next Monday, and will stop at all points between this places. She will make three round trips each week, coming up Mondays, Wednesdays and Fridays, and down Tuesdays, Thursdays and Saturdays. We have not yet received the time card.

Miss Florence Newman, who has been a great sufferer from muscular rheumatism, says Chamberlain's Pain Balm is the only remedy that affords her relief. Miss Newman is a much respected resident of the village of Gray N. Y., and makes this statement for the benefit of others similarly afflicted. This liniment is for sale by G. S. Darling druggist.

It seems that there is no disposition on the part of our city officials to enforce the ordinance relative to stock running at large, and yet they expect people to keep their sidewalks in repair. The enforcement of this ordinance will not work hardships to anyone, while the non-enforcement of it causes many dollars of needless expense. We hope that some action will be taken at once.

John Arn, an old and respected pioneer, of Sherman township, died Tuesday, after an illness of several months. He was well and favorably known throughout this section, where he has been a resident for many years. He leaves a wife, two sons and a daughter to mourn his loss. The funeral services were held from the East Tawas M. E. church yesterday afternoon, Rev. Gordon, officiating. The remains were laid at rest in the East Tawas cemetery.

The cosmopolitan for June is even more than usually strong in fiction. Ian MacLaren tells more adventures of that incorrigible youth, Sparrow. Richard Le Gallienne revives with charming freshness and simplicity the love story of "Aueassin and Nicolette." H. G. Wells concludes "The First Men in the Moon" with Cavor's sudden death at the hands of the Grand Lunar. Tudor Jenks contributes a clever little satire on justice. Egerton Castle's powerful novel, "The secret Orchard," continues. and O'Neill Lathom writes a half-humorous, half sad fairy story, "Prince Weary Heart."

The least in quantity and most in quality describes De Witt's Little Early Risers, the famous pills for constipation, and liver complaints. Dr. G. S. Darling.

The Rod Makes Boys Good.

This question was asked of a large number of persons: What punishments or rewards have you ever had that did you good or harm?

The majority claimed to be benefited by punishment. The boys thought the effects of a good plain talk were salutary, and none had a complaint to make against a good "dressing-down." Many were grateful for having had punishment in due season. There is a time in many a boy's life when he thinks he is lord of everything, and it would seem that a good whipping is often the best way to cure this defect. Tenderness is excellent for most children, but there are certain natures on whom it is wasted, because they simply abuse it.

Conscience does not seem to be very powerful in children before the age of 9. Preaching, or advice unsought for, does not seem to do much good, while suggestion does. As to the influence of companions, it was greatest between the ages of 10 and 15. This influence is next to that of home.—Everybody's Magazine.

13 DROWNED.

The Steam Barge Baltimore Wrecked off Fish Point Last Friday.

But Two of The Crew of Fifteen Were Saved.

The storm of Thursday and Friday of last week was one of the most severe known on the lakes in the past 15 years. Many boats were damaged and several bad wrecks are reported besides numerous narrow escapes.

The steam barge City of Baltimore bound from Lorain, O., to Washburn Wis., loaded with coal, foundered off Fish Point, about 10 miles from here, at eight o'clock Friday morning, and thirteen of the fifteen people composing her crew were drowned, and the two who escaped, second engineer Murphy, and deck hand George A. McGinnis, escaped by but a slight margin. The lost are,

M. H. Place, captain.
Mrs. M. H. Place, stewardess.
Peter Marcoux, 1st engineer,
Michael Breathin, 1st mate.
John Delders, asst. steward,
C. W. Sears, wheelman.
Edward Owen, wheelman.
George W. Scott, watchman.
Herbert Winning,
Louis La Frarrier, carpenter.
August Anderson, deckhand.
Two fireman, names unknown.

The storm struck the boat when off Thunder Bay and Capt. Place headed for Tawas Bay for shelter. When off Harrisville the boat became unmanageable and drifted until she went on the rocks two miles off Fish Point at 6 o'clock Friday morning. At eight o'clock she began to rapidly break up and went to pieces before the crew could take to the boats.

Murphy and McGinnis succeeded in getting on to a piece of the deck and were buffeted about in the waves until 2 o'clock in the afternoon when they were rescued by the tug Columbia. Much of the time they were submerged and when rescued were nearly exhausted. Murphy withstood the ordeal the best and soon recovered, while it was only by the hardest work and after many hours of efforts that McGinnis was revived.

In the rescue of Murphy and McGinnis, Mate Herbert H. Hickmott of the Columbia, proved to be a brave and courageous man. When the men were discovered on the raft Mr. Hickmott, who is 53 years of age, jumped from the tug into the water and swam to the raft with a line in order to get the men to the tug. A movement is now being made to secure him a government medal, to which he is certainly entitled.

The wrecked Baltimore now lays about two miles off Fish Point, her engine and cylinders being visible above the water, but her decks and upper works being all washed away by the heavy seas.

The first body recovered was that of C. W. Sears, a wheelman, whose home was at Saginaw. He was found near Point Lookout. The body was taken charge of by his brother in law, Mr. Judd, and taken to Saginaw Saturday evening.

The body of First Mate Michael Breathin, of St. Clair, came ashore at Wenona Beach, near Bay City, Monday.

Large amounts of wreckage has come ashore between Alabaster and Wenona Beach. Life boat No. 1 came ashore near Fish Point Monday, and bore evidence that it had been used by some of the crew in their attempt to escape, but capsized. Twenty six hours later boat No. 2, came ashore in the same conditions and at the same place.

Weekly Climate and Crop Bulletin.

U. S. Department of Agriculture, climate and crop bulletin of the weather bureau, Michigan Section, for the week ending May 25, 1901.

The mean daily temperature for the week ended May 25 was 54.1 degrees, or 2.5 below the normal; average total precipitation was 1.12 inches, or 0.32 of an inch above the normal; the sunshine averaged 26 per cent of the possible amount.

The week has been generally cool, cloudy and rainy; moderately heavy showers have occurred in all counties. The percentage of actual sunshine has been unusually low, while the average daily temperature during the latter part of the week ranged from 6 to 10 degrees below the normal. Light frosts have occurred, but the damage resulting was very light.

All field work has been greatly delayed by the frequent showers; the low temperatures have retarded, and in some cases checked the germination of corn and sugar seeding; high winds have done some damage to orchards, while from a few localities considerable damage by hail is reported. The cool, wet weather has, however, been very beneficial to wheat, rye, meadows and pastures, which show a marked improvement over their condition of last week. Oats and barley are generally doing well; early potatoes are coming up nicely and some have been cultivated. Plowing, corn planting and sugar beet seeding have been greatly delayed. Rye is heading in most counties and is generally promising. Some late potatoes have been planted and bean planting has begun. Wheat, although improved, is just beginning to show that much of it is infested with the Hessian fly, which is now hatching out and beginning its work.

LOU M. BENTON,

Piano and Reed Organ Instructions.

Terms moderate. In Tawas City Saturdays, at "Courtland," Residence, East Tawas.

CITY LAUNDRY

Washing Every Tuesday and Friday. Goods called for and delivered.

JOHN M. HAMILTON, Propr., TAWAS CITY, MICH.

Dentist of East Tawas Mich., will be in his East Tawas office, Friday, Saturday and Monday of each week. Office next door to Emery's Photo Gallery, EAST TAWAS Michigan

New Grocery Stock!

I have added to my meat business a full line of STAPLE and FANCY GROCERIES, and I solicit your patronage for everything in the line of Groceries, Meats, etc. My stock will be fresh and of best quality at all times, and you can always find what you want.

My prices are as low as first-class goods can be sold for.

Farm produce always wanted.

THOMAS GALBRAITH,

Successor to Johnson & Kane,
TAWAS CITY, - MICHIGAN.

Free Dinner Sets!

The Celebrated Semi-Vitreous Porcelain, Hand-Painted Decoration, with Gold Trimmings, given away Free to our customers.

We have saved no expense in getting up the most beautiful patterns ever made.

You can get a dinner set FREE! The way to obtain them is easy. Trade with us and get your friends to trade with us, and we will do the rest, by supplying you and them with these dishes free of charge.

M. E. FRIEDMAN,

Leader of low prices, dry goods, clothing, furnishing goods, hats, shoes and trunks. Men's fine dress suits a specialty. Tawas City, Mich.

Woman's Home Companion

THE IDEAL HOME MAGAZINE

Is in its twenty-eighth year; is printed on fine paper and profusely illustrated. It gives 40 to 54 pages a month, each page 11 by 16 inches, and a new and beautiful cover in colors every issue. Its editors and contributors are the most popular American writers; in short, it is the ideal family magazine, magnificently illustrated. Its departments are edited by experts and are full of interest. As a home magazine it has no superiors, and few, if any, equals.

600 Pages—1,200 Pictures

EACH PAGE IS EQUAL TO FOUR ORDINARY MAGAZINE PAGES...

Hundreds of thousands consider it a family necessity. It is clean, pure and inspiring. Its contents, while varied, are entertaining and of the highest order. It contains neither sensationalism nor provincialism. Its number is constantly increasing.

It already has 340,000 subscribers, and this number is constantly increasing.

A Live Agent Wanted in Every Community. Most Liberal Terms.

Subscription Price \$1.00 a Year. Ten Cents a Copy.

Send Ten Cents for a sample copy and we will send you an elegant engraving, 20 by 25 inches in size, of Landseer's famous painting "Defiance, or Stag at Bay." Mention this offer when you write.

THE FARM CORNER.

Newsy Items Gathered From Many Sources.

FARM NOTES.

Farm papers commend the idea of naming the farm. A fitting and worthy name adds to the value of a farm. Do not apply your name as the Jones farm may become the Smith farm in a few years, etc. Billboards, to announce farmers' products for sale, are suggested. Name of the farm, its owner and his address should be placed at the top. Then the farmer should supply himself with stationery with his card printed thereon.

"The Principal Insect Enemies of Growing Wheat" is the of a bulletin soon to be issued by the department of agricultural, Washington, for free distribution. Preventives and remedies are given in the bulletin.

Next month cucumbers for pickling may be planted. A dozen vines will give a large supply, provided the young cucumbers are picked off as soon as they are large enough. For small pickles they should not be allowed to grow over two inches long. It frequently happens that the vines cease to bear profusely, but that is usually due to the allowing some of the cucumbers to mature. As soon as the plant accomplishes its object of producing seed it will have but few more cucumbers. It is important, therefore, not to allow a single cucumber to mature. The vines must be carefully watched for the stripped beetle, which must be destroyed by picking from the vines, as the ordinary insecticides, and as some remedies are as injurious to the plants as to the beetles.

There is art in curing clover. Let it wilt in the sun after cutting. When this is well done put the hay in cocks, small at the base and as high as possible, using pressure on the cocks, if necessary. In a day or two considerable warmth will be generated, when the cocks must be opened, but only after the dampness from dew or showers has dried off. Take the cocks down in flakes without shaking and expose to the sun for an hour or two, and then remove the hay to the mow, sprinkling a little salt over each layer. The point is not to cure the clover too much and to have the hay bright and clean.

The spring rains are as beneficial to weeds as to grass, and young weeds will easily get the start of some crops unless care is used at the start. Keep the rows clean until the plants of the crop get a good start, and the number of weeds will then be greatly reduced.

The following is recommended by a practical gardener as an insecticide. Take the leaves and stems of the tomato plant and boil them in water until the juice is all extracted. When the liquid is cold it is to be sprinkled over the plants attacked with insects, when it, at once destroys caterpillars, black and green flies, gnats, lice and other enemies to vegetation, and in no way impairs the growth of the plants. A peculiar odor remains and prevents insects from coming again for a long time.

The best time to cultivate is after a rain, as then the soil is liable to break or become hard on the surface. Even a raking will prove beneficial, as the top soil is kept fine and less and prevents the escape of moisture from

He Is A Wonder.

All who see Mr. C. F. Collier, of Cherokee, Iowa, as he is now, cheerful, erect, vigorous, without an ache, could hardly believe he is the same man, who, a short time ago, had to sit in a chair, propped up by cushions, suffering intensely from an aching back in agony if he tried to stoop all caused by chronic kidney trouble that no medicine helped till he used Electric Bitters and was wholly cured by three bottles. Positively cures Backache, nervousness, loss of appetite, all kidney troubles. Only 50 cents at Dr. G. S. Darling and J. E. Dillon.

below. Weeds seldom appear if the rake is freely used.

A small silo will hold a large amount of food. For 15 head of cattle a silo 10x10 will hold sufficient ensilage to supply them through the winter. The silo should be strong, as there is considerable lateral pressure. June is an excellent time for growing ensilage, and it is the cheapest food that can be produced on a farm for live stock.

The ordinary fine wire strainer does not remove all the impurities from milk. In addition to straining through wire milk should also be strained through four thicknesses of butter cloth, which may be fastened to the wire strainer with a tin ring to slip over it. Even then the soluble impurities will pass through with the milk.

The woodpeckers, which are supposed to destroy trees by drilling, really destroy the insects in the trees, thus performing a service by saving the trees. They should be encouraged to remain in the orchard, as the very fact that woodpeckers are at work is evidence that they are needed on the trees.

It is not necessary to wait for an orchard to come into bearing and thus lose the use of the land. A crop of cabbage or potatoes may be grown among young trees. Strawberries are also an excellent crop. The manure will benefit the trees later on.

The use of incubators is spreading. They are now made of all sizes. As a ten egg incubator will hatch as many chicks as eight or ten hens, and as the chicks can be kept in a small space together under one brooder, there is no more care required than in attending to a large number of broody hens. As all the chicks can be hatched at once they consequently reach the market in one lot and are uniform in size. The best time to learn with an incubator is in the summer, when eggs are cheap, as the cost of running the brooder is also then low. It is not difficult to operate an incubator, but there is something to learn hence the incubator and brooder should be operated as a trial before attempting to hatch for market.

The raspberry prefers a rich soil but will also thrive on the lightest soils. The space between the rows should be well cultivated and kept clean. A crop of cow peas may be grown late after the berries are picked, and the pea vines plowed under late in the season followed by rye which should be turned under in the spring. A dressing of air slacked lime on the land, after plowing the pea vines under, will greatly benefit the soil. If raspberries are given good care they will pay as well as any of the small fruit crops.

When weeds appear in lawns it is sometimes difficult to eradicate them, even when the lawn is frequently mowed, as it may happen that dwarf weeds will drop seed, which will grow, while other weeds are propagated by sending out roots in every direction, from which young plants come. The best way to destroy such weeds is to pour about one teaspoonful of sulphuric acid on

"It is with a good deal of pleasure and satisfaction that I recommend Chamberlain's Colic, Cholera and Diarrhea Remedy," says Druggist A. W. Sawtelle, of Hartford, Conn.

"Lady customer, seeing the remedy exposed for sale on my show case, said to me; 'I really believe that medicine saved my life the past summer while at the shore,' and she became so enthusiastic over its merits that I at once made up my mind to recommend it in the future. Recently a gentleman came into my store overcome with colic pains that he sank at once to the floor. I gave him a dose of this remedy which helped him. I repeated the dose and in fifteen minutes he left my store smilingly informing me that he felt as well as ever." Sold by G. S. Darling druggist.

the crown of each weed, as no plants can stand the effects of the acid.

The parsnip is not as extensively grown in this country as the carrot, yet parsnips are relished by horses and cattle and they are wholesome. The cattle breeders of the Channel Islands, from which our best butter breeds come, use parsnips and regard them as excellent. They are as easily grown as carrots, and the two combined make an excellent ration.

A TRAVELING SHEEP PEN.

The Michigan Experiment Station last year experimented with a traveling sheep-pen moved by electricity. Two lambs and part of the time an old ewe were pastured in the pen during the summer. The field was planted with lucern, growing thick and heavy. The pen was so arranged that it crawled the full length of the pasture in one month, traveling about two feet an hour; at the end of this time it is switched around and traveled back again. As it moved, the sheep ate every bit of fodder, eagerly cropping next the forward side of the pen as it ran over new ground. A bit of canvas duck was hung over the corner of the pen for shelter, and curious as it may seem, the sheep became so accustomed to the moving of the pen that when they lay down to sleep they snuggled up close to the forward end of the pen so as to lie as long as possible without being disturbed by the rear end of the pen as it crept toward them. When the pen has passed, of course, the lucern that has been cropped by the sheep immediately grows up again, and by the time the pen has made its monthly circuit, the pasture is again in good condition. The advantage of this electric pen is that the sheep are kept from running over, half eating and trampling down a large amount of pasture; and it keeps the sheep quiet, so that they take on flesh rapidly,

NOTES ON SPRAYING MIXTURES.

Bordeaux Mixtures.—It is rather a curious incident in the history of the spraying business that the Bordeaux mixture was discovered by accident. It would not seem so odd if the accident had only revealed a clue which had been worked out by subsequent experiment into a suitable formula; but here, after years of the widest practical trial and most exhaustive scientific experiment, the formula for Bordeaux mixture remains essentially the same as that first used when it was found

Fought For His Life.

"My father and sister both died of consumption," writes J. T. Weather wax, of Wyandotte, Mich., "and I was saved from the same frightful fate only by Dr. Kings New Discovery. An attack of Pneumonia left an obstinate cough and very severe lung trouble, which an excellent doctor could not help, but a few months use of the wonderful medicine made me as well as ever and I gained much in weight." Infallible for coughs, colds and sore throat and lung trouble. Guaranteed bottles 50 cents and 1.00 at Dr. G. S. Darling and J. E. Dillon E. Tawas.

that grapevines "poisoned" with lime and blue vitriol held their leaves better than unpoisoned vines.

Bordeaux Formulas.—There is some diversity, to be sure, in the formulas for Bordeaux mixture in practical use; but these diversities are not due to difference of opinion, but to the necessity of varying the mixture to suit different needs. The two conventional formulas are the "6-4-40" and the "4-4-44." The former calls for 6 lb. blue vitriol, 4 lb. lime and 40 gal. of water; and the latter uses the same ingredients in the proportions of 4 lb. vitriol, 4 lb. lime and 44 gal. water. It will be seen at once that one formula is much stronger than the other. The former has 50 per cent, more blue vitriol than the latter. According to wide experience the following general rules may be used to govern the strength of the mixture. Use the strongest mixture early in the season on grapevines, apple trees, etc., before the leaves appear. The strongest mixture also seems to be the best for spraying potatoes, providing it is properly made. Use a medium strong mixture for spraying apple and pear trees in foliage. Use a light mixture on peaches, apricots and plums, especially on the Japanese plums. The amount of lime will vary somewhat also, depending on the quality can be used. If the lime is clear, fresh and unslacked, the minimum quality can be used. If it is old and deteriorated, more is naturally required.

Beware Of A Cough.

A cough is not a disease but a symptom. Consumption and bronchitis which are the most dangerous and fatal diseases, have for their first indication a persistent cough, and if properly treated as soon as this cough appears are easily cured. Chamberlain's Cough Remedy has proven wonderfully successful, and gained its wide reputation and extensive sale by its success curing the diseases which causes coughing. If it is not beneficial it will not cost you a cent. For sale by G. S. Darling, druggist.

CHANCERY SALE.

In pursuance and by virtue of an order and decree of the Circuit Court for the County of Isosco in chancery in the State of Michigan, made and dated on the 27th day of December A. D. 1901, in a certain cause then pending, wherein Henry B. Smith, Christiana Smith, George P. Smith, Eugene H. Smith, Mary F. Schmeck, Kate S. Hathaway and Sarah C. Fales, heirs-at-law of Henry P. Smith, deceased, are complainants and Albert E. Sharpe, James Bagaley, The First National Bank of Detroit and Charles B. Steele are defendants. Notice is hereby given, that I shall sell at public auction to the highest bidder, at the front door of the Court House on Lake Street in the City of Tawas City, Isosco County, Michigan said Court House being the place of holding the Circuit Court for said County, on the 23rd day of June A. D. 1901, at 3 o'clock p. m., standard time, all or so much thereof as may be necessary to raise the amount due to the said complainants for principal, interest and costs, of this cause, the following described lands, to-wit: The Northwest quarter of Section three in Town twenty-one North, Range seven East. Dated May 9th, 1901.

Geo L. CORNVILLE,
Circuit Court Commissioner,
For Isosco County Michigan.

N. C. HARTING, Esq.,
Solicitor for Complainants.

MORTGAGE SALE.

By reason of default in the payment and conditions of a real estate mortgage made by George Koenig and wife Johanna Koenig, April 23rd, 1898, to Karl Krueger of Tawas City, Michigan, and recorded April 25th, 1898, in Liber 13 of mortgages at page 251 in the Register of Deeds office for Isosco County, on which there is claimed to be due now the sum of Two hundred and forty one dollars and fifteen cents, and no suit at law or otherwise having been commenced to recover the same.

By virtue of the power of sale in said mortgage contained the premises in said mortgage described will be sold at public auction on the 27th day of July A. D. 1901, at nine o'clock in the forenoon of said day, to the highest bidder therefor at the front door of the court house in Tawas City (that being the place of holding the Circuit Court for said county) to satisfy said amount with interest, costs and attorney fees.

Said premises are described as the Northeast half of lot number Four (4) in Block number three (3) of the original 1 plat of the Village, new City, of Tawas City, Isosco County Michigan.

Dated April 30th, 1901.
N. C. HARTING, KARL KRUEGER,
Atty. for mortgagee, Mortgagee.
Business Address, Tawas City, Mich.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage, bearing date the 2nd day of July, A. D., 1895, made by Cynthia Ballard, of the township of Reno, Isosco County, Michigan, to Bertha Mills, of Whittemore, Isosco County, Michigan, and recorded in the register of deeds office in and for said county, on the 2nd day of July, A. D., 1895, in liber fifteen (15) of mortgages on page 242, upon which said mortgage there is claimed to be due and payable at the date of this notice the sum of six hundred seven and 11-10 dollars, and no suit or proceedings either at law or in equity, having been instituted to recover the said sum or any part thereof:

Now, therefore, notice is hereby given that by virtue of the power of sale therein contained and the statute in such case made and provided, there will be sold at public auction or vendue to the highest bidder, on the 16th day of August, A. D., 1901, at ten (10) o'clock in the forenoon of said day, at the front door of the courthouse in Tawas City, in said Isosco County, (that being the place where the circuit court for said county is holden), the premises described in said mortgage, or so much thereof as may be necessary to satisfy said debt and the interest thereon, and attorney's fee covenanted for in said mortgage, together with all other costs and charges, which said lands mentioned in said mortgage are described as follows, to-wit: The southwest quarter of the southwest quarter of section thirty-five (35), in township twenty-two, (22) north of range five, (5) east, Isosco County, Michigan.

Dated May 18th, A. D., 1901.
FERN C. SMITH, BERTHA MILLS,
Attorney for Mortgagee. Mortgagee.
Business address, Gladwin, Mich.
