FARM GARDEN

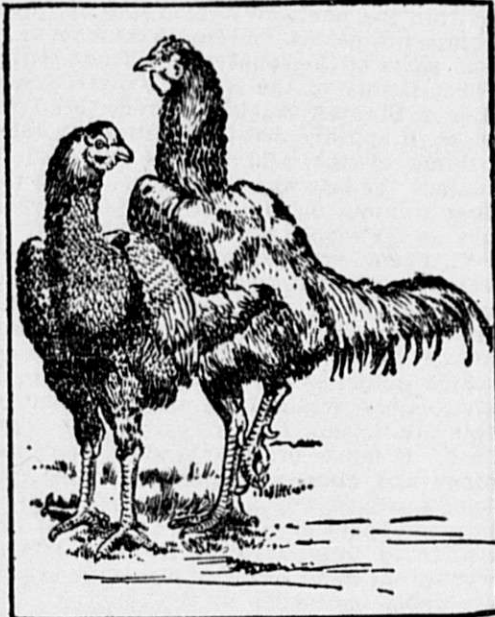

THE GAME CHICKEN.

The Latest Candidate For Favor With Farmers—Many Good Qualities.

The game chicken as a farmer's fowl is among the new departures. Many good things are told of the games. The true games are very vigorous. They are good foragers, pushing boldly out in search of insect food, and it is even said that a mother hen has been known to put up a fight against a hawk in defense of her brood. All these qualities adapt them to farm conditions.

The true old English game is of medium size and fills the bill as to poultry and egg production.

Indian games, which are divided into Cornish and White varieties, are popular in England on account of their value as market fowls and for the same reason are finding favor on this side of

CORNISH INDIAN GAMES.

the Atlantic. They are extensively used in England and in many instances in this country for crossing purposes. The hens are reported fairly good layers of an egg of medium size. Chickens are fairly hardy and make satisfactory development.

Some authorities claim that, while the Cornish are a variation on the original type in the direction of blocky build and development of flesh, they also mark a great departure from the original hardness and egg producing merits of the type.

The Duckwing Leghorns, which are newcomers and comparatively little known, are said to contain both game and Dorking blood and to approximate closely the good points in the typical games.

BIG PROFIT IN CHERRIES.

Dark Varieties the Money Makers, With Windsor in the Lead.

The best sweet cherries I have seen south of central New York are along the fences where the cultivator has not disturbed them. In northern Delaware there are several famous sweet cherries in the fence rows and corners, but nearly all of the orchards that I have seen in which modern cultivation methods are attempted have been failures.

In central and eastern New York the sweet cherry has to be kept on medium thin land. My father has a young orchard that is booming on land that would be considered poor for farming purposes, but the trees respond there to tillage.

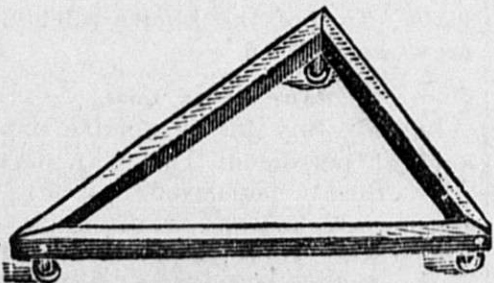

The sour cherries will probably do best under high culture. While they grow well along the fences, they need more moisture than the sweet varieties and pay well under the best treatment.

The dark kinds are the money makers. Black Tartarian, Black Eagle, Windsor and Dikeman are the leading sorts at home. There is big money in Windsor, and if Dikeman turns out as we expect it there ought to be more in it.

Sometimes the sweet cherry needs lime and dies for want of it. Some kinds need it more than others. Tartarian, I believe, is one of them. Thus writes Professor G. H. Powell to Rural New Yorker.

A Labor Saving Device.

The illustration shows a truck used around the markets to move barrels, boxes, etc. It is simply a triangular frame of two inch stuff cut two and one-half feet long. Bolt the pieces firmly together at the ends, screw a ball bearing caster wheel under each

A MARKET TRUCK.

end, and you have a truck which will carry a barrel of produce or four bushel boxes over any smooth surface with a slight outlay of strength. It can be used on a barn floor and in many places around a farm. By laying a board track it can be used to roll barrels of potatoes, etc., from the wagon to bin in cellar. About all the cost of this useful truck will be that of the three casters, which will be 30 to 60 cents, according to size.—Ohio Farmer.

FACTS FROM FRANCE.

France has 300,000 tuberculous subjects.

Smoking among women in France is on the increase, both in town and country.

At present there are 78,000 houses in Paris, only 24,000 of which drain directly into the sewers.

A Parisian who placed a fender in front of his automobile was so annoyed by small boys falling into the net for a free ride that he was obliged to remove the life saving device.

According to an apparently authentic article in a French periodical, not fewer than 20,000 aristocrats are at present confined in the prisons of Europe. Russia stands first, with 12,000 blue blooded lawbreakers.

The French government has forbidden the production of a comedy called "The Oil Question" because one of the scenes was laid in the precincts of the chamber. A number of deputies who accepted bribes were in the play.

Paris is threatened with an elevated structure in its finest streets. It is proposed to build a moving sidewalk like that used in the late exposition to run along the Avenue de l'Opera, the Grand boulevards, the Boulevard Sebastopol, the Rue Turbigo and the Rue de Rivoli, a circuit of about six miles.

THE GLASS OF FASHION.

The combination in belts of velvet or ribbon with leather is one of the latest fads and is decidedly effective.

Pale gray lace in an old fashioned netted design is being employed again for trimming batistes, muslins and velvets.

Applications of panne in either white, cream or corn color are a popular trimming for white barege or white serge suits.

Sashes or long bows at the back of the waist are much worn with gowns of the thinner and openwork types of muslin. The ends frequently fall nearly to the bottom of the skirt.

Bands of red, white or dark blue add amazingly to the style in the gray linen skirts. These linen skirts, by the way, are far more serviceable than the pique, since they do not require such frequent washing.

A simple summer toilet of white alpaca or thin linen may be rendered unusually charming by the addition of a ceinture and broad plaited collar, falling over the shoulders, of figured foulard or flowered muslin.

ITEMS OF INTEREST.

It has been ordered in Washington that fire surgeons respond to fire alarms.

Forty cable ships are constantly at work relaying and repairing the world's cables.

A Kansas City juror went to sleep during the progress of a trial, and the judge fined him \$20.

Of more than 20,000,000,000 checks used annually in the United States about 18,000 are "raised."

The engineers of the New York rapid transit commission say they expect the tunnel will be completed and ready for the running of trains before the end of 1903.

A runaway horse in Denver the other day finished his flight by landing in the interior of a rapidly moving trolley car, where he rode for nearly a block before the vehicle could be stopped.

A Chicago magistrate suggests that a school be opened in that city where policemen may be taught elementary grammar, so that they may express themselves more clearly on the witness stand.

In 50 years the words and phrases of the English language lexiconized under the letter A have increased from 7,000 in number to nearly 60,000. Science and invention requiring new terms are largely responsible.

The vegetarian movement does not appear to have made noteworthy inroads upon the armies of the meat eaters. Never was the demand for fresh food so extensive. As a result the price of beef and other meat in New York has gone up both at wholesale and retail.

What A Tale It Tells.

If that mirror of yours shows a wretched, sallow complexion, a jaundiced look, moth patches and blotches on the skin, it's liver trouble; but Dr. King's New Life Pills regulate the liver, purify the blood, give clear skin, rosy cheeks, rich complexion. Only 25 cents at J. E. Dillon's or Dr. G. S. Darling's drug stores.

"I am indebted to One Minute Cough Cure for my present good health and my life. I was treated in vain by doctors for lung trouble following la gripe. I took One Minute Cough Cure and recovered my health. Mr. E. H. Wise, Madison, Ga.

'Phone No. 68.

Captain Carter often reads about the Neely case and wonders how he himself ever came to be convicted.

An Indiana judge says that a bucket shop is not a gambling concern. Certainly not! It is a sure thing.

A Chicago preacher has been assuring his hearers that heaven is like a summer resort—there are plenty of women but the men will be somewhere else.

It cost Britain nearly eight million dollars to capture 24 Boers last week. But then a hundred or more Boer women and children died in the prison pens at the same time, and that should be consolation for John Bull.

The Washington Star comes out with this noble poem:

I love the flag—the noble flag.
Fair emblem of the free;
And next to that the cold wave flag
Is the flag I long to see.

Such sentiments must re-echo through millions of bosoms.

Bay City wants to erect an insane asylum at her poor farm for keeping indigent insane persons. Why not. Such an institution will be under constant supervision of the friends of the patients, who can see that they receive good care. Investigations all over the country show that they do not get the best of care at public asylums.

Register Thomas Scadden, of the Marquette land office, has just completed the compilation of his report on the acreage of the United States lands which now composes the public domain of the state of Michigan. The aggregate of all the counties on July 1, 1901, was 462,157 acres. Last year the total acreage comprised in the public domain was 473,013.

It is instructive to learn, says the Pittsburg Dispatch, that Maclay, the alleged historian of the navy department, is borne on the rolls of the Brooklyn navy yard is a "laborer." Whether he is better as a laborer than as a historian is not easy to determine, from the fact that he does not do any labor. Neither, for that matter, does he write any history.

In the August Review of Reviews Dr. Shaw discusses the great steel strike in its various aspects and comments on many other matters of current interest at home and abroad. M. de Bloch's recent address at Paris on the lessons of the Boer war is reviewed, and its application to the military situation in the United States, as well as in Europe, is pointed out.

Our diplomatic and consular service costs us \$1,346,000 this year, about one third what the Agricultural Department comes to. This is less than the amount paid by any other nation or the first class. In this we are showing ourselves penny wise rather than otherwise. We can afford to have the best and in fact cannot afford to have anything else. We cannot afford to confine the work to rich men because salaries are too low for others.—To Day.

Two of the forty new auto-cars being built for use in Chicago were put into service on Sunday. They approach the street cars in dimensions, yet do not appear cumbersome, with their double deck and seating capacity for forty-four persons. They are to tap territory not provided or poorly provided, with surface or elevated street car lines, and on their first day were filled to their capacity on each trip. There may be in these auto-car a solution of some of our street railway troubles, in cities at least, in the not distant future.

Business men's associations are the order of the day in towns that wish to attract new industries. Little can be done in that line by any town

without some organization of the kind. The old idea of "bonuses" is out of favor. There is plenty of capital in almost any town that could be interested in manufacturing concerns of approved merit, if only an organization of some kind was effected to look after such matters. A live, enthusiastic business men's association in Tawas City, could and would do more for the interests and growth of the town than anything else.

Climate and Crop Bulletin.

U. S. department of agriculture. climate and crop bulletin of the weather bureau, Michigan section, for the week ended July 27, 1901.

The mean daily temperature for the week ended July 27 was 73.7 degrees, or 5.0 degrees above the normal; the average total precipitation was 1.82 inches, or 1.30 inches above the normal; the sunshine averaged 48 per cent of the possible amount.

General and very ample showers have occurred in all sections of the state. The temperatures were high and the sunshine less than usual; the rainfall was very timely and exceedingly beneficial to corn, late potatoes and pastures. During the early part of the week the conditions were becoming somewhat droughty; the rain has interfered with haying and harvest work and some hay and wheat damaged; generally, however, hay, wheat, rye and barley are well secured in stack and barn. Oat harvest is quite generally finished in the more southerly counties and well under way in the northerly portions of the lower peninsula; oat yields are rather light, the fields being somewhat thin and the straw short. The hot, dry weather preceding this week has considerably shortened the yield of early potatoes, which are small and few in a hill; late potatoes have suffered somewhat, but are improved by the late rains and now fairly promising.

Corn and sugar beets are generally in fine condition, except in the extreme southwesterly counties of the lower peninsula, where corn suffered considerably, and there is hoped that the recent rains will restore it to a normal condition.

The heavy thundershowers lodged some corn, blew down considerable fruit and soaked some grain in shock, the corn is straightening again, but some wheat and oats are still in shock drying; these conditions are far from being general. Beans are in generally good condition and pasturage rapidly improving.

Turnips Should Now Be Planted.

Roots add value to all other foods because of the fact that during the winter, when dry food is the rule, the use of turnips, beets or carrots gives a change from the dry ration to a more succulent kind. Digestion is, therefore, promoted, and all kinds of food become more beneficial, because more thoroughly digested and assimilated. Cooking roots for stock is not now practiced, compared with formerly, as inventors have introduced roots slicers or pulpers, which prepare such foods for stock with but little labor and with rapidity, thus placing before the farmers of today advantages which he should not overlook. It is past the time for putting in crops of beets and carrots, but July is the month for growing turnips. Since so much injury has been done the grain crops in some sections this year, the farmers who may give their attention to turnips will largely recover their loss of feeding material. The turnip crop is now one of the cheapest produced on the farm, considering the large yields that are possible, as seed drills, wheel hoes and hand cultivation enable the grower to put in the seed and keep down the weeds with as little outlay per acre as for corn. The turnip is a summer and fall crop and can be grown in a short time. The growing of but an acre of turnips will provide the farmer in the winter season with a food that is valuable from a dietary point of view, even if it is low in solids and contains a large proportion of water.

Chamberlain's Cough Remedy A Great Favorite.

The soothing and healing properties of this remedy, its pleasant taste and prompt and permanent cures have made it a great favorite with people everywhere. It is especially prized by mothers of small children for colds, croup and whooping cough, as it always affords quick relief, and as it contains no opium or other harmful drug, it may be given as confidently to a baby as to an adult. For sale by Dr. G. S. Darling.

IOSCO COUNTY

Should Land the Republican Congressional Nomination for Hon. Temple Emery.

The contests in the various townships of this county for delegates to the county convention on the 19th inst. is now on. If the people of this county wish to confer the honor of a nomination on a man who has done much for the advancement of their interests and the future prosperity of the county they will elect delegates to the county convention favorable the nomination of Hon. Temple Emery, of East Tawas. He is a man who has ever had the interests of the county at heart and has let no opportunity pass to advance those interests. It is through his efforts that today we have within our borders an institution which is furnishing a ready market and fair price for an unlimited quantity of potatoes and other vegetables. An institution that is but in its infancy and which will do more to aid in the development of our future prosperity, than any one institution that could be located here.

As an employer of labor no man has a better reputation than Mr. Emery. He has always been fair and honorable with men in his employ, and is held in high esteem by them.

None of the numerous candidates are better or more favorably known outside of this county than Mr. Emery, and the conditions for securing his nomination are very flattering.

When all these matters are taken into consideration, it seems that there should be no question as to his ability to secure the county delegation. By conferring upon him your support you are voting for your own best interests.

Let the republicans of Iosco county lay aside party differences and unite on Mr. Emery and there will be but little doubt of their securing the congressional nominee.

Just Like a Woman.

The flames were raging on all sides, and we implored the woman in the twelfth story to jump for her life.

"Where?" she queried through a megaphone.

"In the street," we shouted.

"No," she calmly answered. "If I must die by the heat, I prefer to die in my own domicile."

There was some sense in this, we thought, for the reporter on our right had filled his notebook and was making notes of heat prostrations on his pink cuff.—Indianapolis Sun.

Mr. Jaycomer—See here, officer, why the dickens does the law say bathers must wear trunks?—Chicago News.

An Appeal to the Injunction.

"Are you sensitive about your fiery hued hair?"

"Not if there is any money in it."

"Well, I am going to hire you to stand out in front of my drug store right next to my self raising thermometer. I want to make folks believe when they look at you that it's so blazing hot that they'll all have to come into my place and drink my cold drinks or shrivel on the spot."—Cleveland Plain Dealer.

Woe of Eliza.

Clutching her child to her bosom, Eliza looked out despairingly upon the rushing waters.

"What am I to do?" she moaned, wringing her hands. "The sheriff has attached our last cake of ice!"

Was there no escape?

Were she and her innocent offspring to feed the ten—count 'em—ten fierce bloodhounds yonder?—Detroit Journal.

Objectionable in Either Case.

"Why did she break the engagement?"

"He told her that she was the only girl he had ever kissed."

"What of it?"

"Why, she naturally reasoned that he was either untruthful or absurdly foolish, and he was hardly worth having in either case."—Chicago Post.

TEACHERS' ATTENTION.

Regular examination at Tawas City, on the third Thursday and Friday of August 1901.

J. A. CAMPBELL,
Commissioner.

BREVITIES

PERSONALITIES.

But nine Americans can claim the honor of life membership in the Automobile Club de France. W. K. Vanderbilt is one of them.

Henryk Slenkiewicz, the famous author, is now 53 years old. He is an inveterate smoker and takes little interest in anything but literature.

Charles J. Delvin, a Topeka millionaire, carries more life insurance than any other Kansan. The amount is \$714,000, and the premiums aggregate \$30,000 a year.

Mr. and Mrs. Clement C. Cole, he 88 years old and she 80, are the champion married pair of Iowa. They were born in Vermont and have been man and wife almost 62 years.

Alexander Hogg, brother of ex-Governor Hogg of Texas, is about 150 pounds lighter than the former executive, but the two nevertheless bear a striking resemblance.

York county, Pa., the home of many people prominent in state politics, boasts of a white man whose name is Michael Andrew Jackson Johnson Donelson Fillmore Deckman.

Captain J. B. Coghlan, who commanded the Raleigh under Dewey at Manila bay, has bought a \$3,000 house at Manitou, Colo., and will in future make that his home while ashore.

The Duke of Devonshire possesses a book for which his father refused an offer of £20,000. It is Claude Lorrain's "Book of Truth," the rarest book in England and an heirloom of the family.

Prince Kropotkin, the famous Russian, was confined for three years in a French prison at Lyons and was expelled from and forbidden to return to Switzerland. He became an anarchist in 1872.

Daniel Mills, the Canadian minister of justice, has been appointed the Dominion's representative at the coming conference on an imperial court of appeals. He is 70 years old and has occupied his present position since 1897.

John Morley, who is writing a "Life of Gladstone," gets on slowly with the work. It took him a long time to sort out the vast accumulation of papers left by Mr. Gladstone in Hawarden castle. By way of explaining the slow progress he is making Mr. Morley says, "Imagine a life of nearly 90 years filled to the utmost capacity."

PLAYS AND PLAYERS.

"Way Down East" is to be one of the features of the Buffalo exposition.

Arthur Roberts, London's funniest fellow, is to star in America next season.

A daughter of Harriet Hubbard Ayer has just entered upon a comic opera career.

Mme. Bernhardt, if a new scheme goes through, will play in England for three months every year.

"Richard Lovelace," written by Laurence Irving, a son of Sir Henry, will be E. H. Sothern's chief play next season.

"Die Meistersinger" was recently sung without cuts in Frankfurt. The performance lasted from 6 o'clock until 11:15.

The new play written by Barrie for Maude Adams is a comedy, the time of the action being that of the battle of Waterloo.

In addition to losing heavily in her London theatrical venture, Mrs. Langtry has decided to sell her racing stable and will probably retire for a year or two.

William A. Brady has permanently severed all connection with pugilism in order to give his exclusive attention to his many successful theatrical enterprises.

ORCHARD AND GARDEN.

Nitrogen can be supplied to fruit trees by glowing under clover or cow-peas.

Late planting of trees will do very well if the trees are well watered when set out.

If a grapevine sets too much fruit, thinning in good season should always be done.

The family orchard, unlike the commercial orchard, wants a good many varieties.

Moss and lichens on the trees work injury by furnishing a hiding place for insect pests.

About the only fruit trees that are admissible in the garden are dwarf pears or apples.

Summer pruning of raspberries and blackberries consists in pinching back the ends of the canes.

When the trees are badly affected with bark lice, there is perhaps no better remedy than to wash their trunks with a strong solution of tobacco water.

When the peach tree is not pruned long, slender branches form, and these produce fruit mainly at the outer ends. The tree will carry more fruit if properly pruned.

PITH AND POINT.

A love affair between a boy and dog is the most sincere in the world.

Getting mad does some people as much good as a dose of medicine.

No matter how poor a musician a girl is, she is a much better one than her neighbors think.

Every time a man runs across a lot of old clothes around the house he searches them, although he never finds anything.—Arlington Globe.

has been entertaining his father, M.
Kinney and brother James. They
returned to their home in Grand
Rapids Tuesday.

Mr. and Mrs. Herman Fasheldt,
of Tawas township, attended the
golden wedding of Mr. and Mrs.
Miessler at Saginaw, last Saturday.
Mrs. M. is a sister of Mr. Fasheldt.

The republican county convention
to elect delegates to the congressional
convention at Standish, August 22,
has been called to meet at the court
house in this city, Monday, August
19, at 1 o'clock.

The ladies of the Alter Society of
St. Joseph's church will serve a 10
cent supper at the New Bay Side,
Tuesday evening, Aug 6. All are
cordially invited. Supper served from
4 o'clock.

Mrs. Belle McDonald, who has
been suffering severely from the ef-
fect of a tumor for some time, was
taken to Bay City Wednesday for
medical treatment. She was accom-
panied by her daughter, Mrs. Herbert
Horn.

The monthly union meeting of
young peoples' societies will be held
at the M. E. church next Sabbath
evening at 6:30. This meeting is to
be followed by a union preaching
service in the same church commenc-
ing at 7:30.

The Sebawaing Sugar Co. has asked
of the township of Sebawaing the
privilege of having its taxes for the
next ten years used for the construc-
tion of stone roads. The company
also offers to donate the stone to
make two and half miles of road if
the township will build it.

The pastor of the Presbyterian
church will preach next Sabbath
morning from Zech. 4:6, subject "The
church's Resource." In the evening
at the union meeting in the M. E.
church, the subject will be "Finding
Life," the third in a series of evening
sermons on "Salvation."

Last Tuesday was the fifth
anniversary of the Rev. and Mrs. E.
O. Sutherland's marriage and the
members of his congregation planned
a pleasant surprise on their pastor
and wife. They were the recipient
of considerable "wooden" ware and
all enjoyed a social evening.

Every column in a newspaper con-
tains from 10 to 12 thousand distinct
pieces of metal, the displacement of
one of which would cause a blunder
or typographical error. And yet,
says an exchange, some claim great
smartness if they can find an error
in a newspaper. When some people
find a word with a wrong letter in it
or a misplaced letter, they are sure
they could have spelled that word
right, and they are happy for a whole
day and go around informing others
how the editor spelled a word wrong.

It is estimated the waste from un-
intelligent cooking in the United
States is over \$1,000,000,000 a year.
This figure has been indorsed by
Prof. William Mathews as about
correct. Prof. Marshall, the noted
English economist, estimates that
half as much is wasted annually by
the working people in Great Britain
in a similar way.

The laws of health require that the
bowels move once each day and one of
the penalties for violating this law is
piles. Keep your bowels regular by
taking a dose of Chamberlain's Stom-
ach and Liver Tablets when neces-
sary and you will never have that
severe punishment inflicted upon you.
Price, 25 cents. For sale by G. S.
Darling.

An observing farmer is about right
when he says: "If you pass a farm
and see a large barn and a small
house you may know that the man is
boss, when you see a fine house and
small barn you may understand that
the woman has things her own way,
and when there is a good barn and
nice house you may take it for granted
that the man and the woman are
equal and work together in harmo-
ny."

The business men of the little vil-
lage of Omer have raised \$1050.00 to
lay a piece of plains road between
that village and a good farming com-
munity tributary to them. This is
enterprise and will pay them back
an hundred fold. When merchants
show people that they want their
trade there is no trouble in getting it.
It would be good investment for our
merchants if they would raise two or
three hundred dollars to put the
Plank road to the Hemlock road cor-
ners, in a good condition.

It will soon be the season when the
soap man, the range man, the cheap
supply house man and the fakir in
all his guises—but still the fakir, will
be here. He will come with his tale
of cheap price, long time, installment
plan and balance of his rot, but let
us hope the crop of suckers will be
light this season. Your home mer-
chant will duplicate any prices the
fakir will make and will give you
good goods. Give your local dealer
the first chance and nine times
out of ten you will save more money
by trading with him. Keep your
money at home.

What most people want is some-
thing mild and gentle, when in need
of a physic. Chamberlain's Stomach
and Liver Tablets fill the bill to a
dot. They are easy to take and
pleasant in effect. For sale by Dr.
G. S. Darling.

Death of Mrs. Shneeberger.

Mrs. J. C. Shneeberger, died very
suddenly at the home of her daugh-
ter, Mrs. I. Curry, in Saginaw, Mon-
day, July 22, 1901. She arose as usual
that morning and after a hearty
breakfast assisted with the house
work and was busy preparing dinner
when taken suddenly ill. Medical
aid was immediately summoned, but
could do nothing for her. She died
within 20 minutes after being stricken.

The deceased was born in Witten-
berg, Germany, in 1822, and came to
this country when 22 years of age.
She was united in marriage to Mr.
Shneeberger in 1848, and was the
mother of five children, three of
whom died in infancy. She is sur-
vived by two daughters Mrs. I. Curry
of Saginaw and Mrs. Thomas Curry,
of Tawas township. The deceased was
a resident of this city for a number
of years and was well known by near-
ly every citizen.

The remains were brought here for
burial and the funeral was held from
the home of Mr. and Mrs. Thomas
Curry on Wednesday following her
death.

CARD OF THANKS.
The undersigned wish to convey their most
sincere thanks to the friends and neighbors for
the kind aid and sympathy extended them dur-
ing their bereavement in the death and burial
of their mother.
THOS. CURRY and FAMILY.
MRS. I. CURRY,
W. C. MCKENZIE.

[The above should have appeared in the last
week's issue of the HERALD but was overlooked
Ed.]

**Cuts and Bruises Quickly
Healed**

Chamberlain's Pain Balm applied
to a cut, bruise, burn, scald or like
injury will instantly allay the pain
and will heal the parts in less time
than any other treatment. Unless
the injury is very severe it will not
leave a scar. Pain Balm also cures
rheumatism, sprains, swellings, and
lameness. For sale by G. S. Darling.

THE THIRD ANNUAL

**Picnic of the Northeastern Mac-
cabee Association Promises
to be the largest
yet Held**

Returns from all portions of the
district indicate that the third annual
picnic of the Northeastern Maccabee
association at Tawas Beach, August
15, 1901, will be the largest gather-
ing ever held at that popular resort.
The enthusiasm manifested by the
Maccabees and their friends is much
more marked than at the previous
meetings.

The officers and committees will
have the best program of games and
prizes ever offered. The special at-
traction of the sports this year is the
fact that they are so arranged that a
few professionals cannot carry away
all the prizes. The special feature
of the day will be the competition of
"Rube" characters for liberal prizes.
Prizes of \$10, \$7.50 and \$5.00 are of-
fered for the best, (or worst) dressed
company of ten rubens; while the
most comical Rube will receive a
special prize of a sack of flour.

Sixty dollars in cash prizes will
be given for the three best rube bands
of not less than 12 musicians. In
addition good prizes are offered for
foot races, including men, women
and children, also for melon, apple
and pie eating contests. In fact a
better program of games for more
liberal prizes has never been offered.

The day will be one which no one
can afford to miss, as all arrange-
ments are being made to make it the
most enjoyable occasion to be held in
this section of the state this year.
All arrangements will be complete to
accommodate all who come. The D. &
M. Ry Co. are making a special
effort to secure extra coaches enough
to accommodate everyone.

Meals will be served by the macca-
bees of this vicinity for those who do
not bring their baskets and ample
provision will be furnished.

Kenneth Anderson's Death.

The accident which caused the
death of Kenneth Anderson, men-
tioned in our last issue, occurred Sat-
urday July 20, in the mill of the
Northwestern Cooperaage Co., at
Gladstone. The young man came in
contact with a circular saw which
caught his left leg at the knee, cut-
ting through the knee cap and fol-
lowing down the leg to the foot.
When first hurt he assisted in tight-
ening the bandage to stop the flow of
blood. The attending physicians
thought that amputation necessary,
but later consented to. The operation
was performed and he rallied and was
conscious for three quarters of an
hour, during which time he complain-
ed of great pain in the stomach. He
lived but two hours after being hurt.
The deceased was 23 years of age.

Alex. Anderson, of Reno, the
young man's father, went to Gladstone
and brought the remains here for
burial, arriving last Friday. The
funeral was held from the Reno
Baptist church last Sunday, Rev. A.
Waterbury, of this city, officiating,
and was largely attended, 73 rigs
forming the procession.

The bereaved parents wish to
extend through these columns their
most heart felt thanks for the sym-
pathy and comfort extended them
during their sad affection. Especial
thanks are extended to the proprie-
tors and employes of the Northwest-
ern Cooperaage Co., for the free and
kindly manner in which they assisted
preparation for shipment of the body.

The East Tawas Baptist Church.

Repairs on the East Tawas Baptist
house of worship were so far advanc-
ed, that on Lord's Day evening, July
28th, that services were informally
resumed. Rev. C. H. Prescott
preached from II Tim. 4:10—"For
therefore we both labor and suffer
reproach, because we trust in the liv-
ing God, who is the Saviour of all
men, specially of those that believe,"
—showing that the living God will do
for those who trust Him, and who
honor Him by obeying Him, what he
will not do for all the rest of the
world. Brief addresses were also made
by Rev. B. H. Thomas, the first
pastor of the church and who was
there ordained and by others who
remembered the "beginnings" of the
present organization.

Rev. B. H. Thomas, the first pastor
of the church, will preach next
Lord's Day evening, (D. V.) at the
usual hour of worship. A large
attendance would be a pleasant way
of giving him welcome and cheer of
heart.
Sunday school next Lord's Day at
2:30 p. m. Other services will be
regularly held, weekly, but at hours
to be hereafter announced. ***

Whittemore.
Received to late for last issue.

Harvesting is well along.
Mrs. Edmund Goppel died the 20th
aged 74.

Harvey Braun can run pretty fast
—you bet.

Alf Cataline is talking of joining
the Quakers;

Mrs. J. W. Curtis' is improving
from her illness.

Horace Dutton of Lapeer, is visit-
ing his uncle Maynard Butts.

Mrs. McColl is recovering quite
rapidly from her recent severe illness.

Mrs. Theodore St. James presented
her husband with a harvest hand a
—fine boy.

The gentleman Cow Thistle Club
will soon go on their annual outing
to Sand Lake.

The boys are talking about Mr.
and Mrs. Ed Wisley's new girl which
arrived the 22nd.

The infant son of Mr. and Mrs.
Joseph Caverly died very sudden of
croup, aged 11 months.

Mr. and Mrs. John Cataline and F.
L. Barnby and wife called on uncle
Adam Cataline and family and help-
ed store away, a good supper, didn't
they John?

One of our boys the other night
Talked awful to his baby.
Why for shame you great boy,
You should use her as a lady.
He talked so fast, he talked so loud,
He scared me half to death,
He kept on talking just the same until he
got out of breath.
Take my advice don't say you won't
Be better to your maw, or
When you come to leave this world
The golden gates will not stand ajar.
So brace up and mend your ways or
you'll not with the angels dwell;
For if you should die before tonight
You would surely go to —

FARM BUTTER MAKING.

Details to Be Observed to Secure the Best Results.

The ability to make good butter is worth money to a farmer and his family in these days, when so much inferior quality is on the market, says an Ohio farmer's wife in National Stockman.

I will omit saying anything about the way the stable should be cleaned or how the milking should be done. As I have never been able to detect any barnyard odor in either milk or butter I will leave that for the scientific dairyman to write about.

In selecting milk pails get the very best heavy tin (not those with double bottoms), see that every seam is well soldered over and perfectly smooth and even, and there will be no chance for filth to gather.

I have seen milk pails that had a yellow sediment along every seam. In washing pails look well to the seams and see that they are kept perfectly clean.

The strainer pail needs especial attention. After it is washed take a nail brush, one that is kept for this purpose, and some coarse salt and thoroughly brush the strainer several times a week if necessary.

We have four shotgun cans to cool the cream in after it comes from the separator and three large creamery cans to ripen the cream in.

Since I have adopted this precaution our butter is perfectly sweet and sells as "gilt edge butter" in any market.

We keep the cream out of the cellar. Only in extreme warm weather do we keep it in the cellar.

The Jersey bull Dewey (5322), the property of the Duke of Marlborough, Blenheim Home Farm, Woodstock, England, was calved on Aug. 2, 1898, and was bred by Mr. P. F. Alier, Jersey, his sire being Reminder (2419), dam Etna (7293).

Three tons of cowpea hay can be raised per acre on good ground, and if one must have meal to supplement the silage the cowpea hay may be ground into meal and make as much milk as its weight in best wheat bran.

Ten tons of soy beans can be cut green to mix with the corn in the silo from an acre or from 20 to 30 bushels of seed harvested.

By devoting less range of pasture to the cows and practicing summer rolling, or better, substituting the summer silo, a fair proportion of the land heretofore used for pasture can be utilized for the growing of some of these protein crops and next winter's ration not only be balanced, but the operation be performed without an undue unbalancing of the farmer's bank account.

Professor T. L. Haecker of the Minnesota experiment station after nine years' experience gives the following as to the best ration for dairy cows.

Ensilage is the foundation feed used and the grain feed consists of five parts bran, five parts cornmeal and two parts of new process gluten meal, which contains 37 per cent protein, and the rations are from five pounds to nine pounds of this mixture, according to the amount of milk given.

Plaxseed meal is now too high to be used with profit, says Professor W. A. Henry. A little gluten feed or gluten meal might be used instead.

Retention of Placenta. The placenta should be removed by the hand after the third day, and the parts washed out with one part of carbolic acid to 50 of soft water.

Lung Fever in Calves. Give each calf a teaspoonful compound sirup of squills and one ounce liquor acetate of ammonia at a dose three times a day in one-half pint of water.

Silo and Ensilage

Cornstalks should be cut into about inch lengths. The finer the cut the more compact the silage, says Breeder's Gazette.

In 1886 an American named Jeffreys, lmbittered by a love affair, made his home on a small island 1,000 miles south of Ceylon.

Here he remained, living a Robinson Crusoe life, until his death in 1898, occupying himself with scientific studies and the cultivation of fruit trees.

Viennese dueling methods are quite different from those of Paris. The chief characteristic of Parisian dueling is its publicity and harmlessness.

People are fast learning that good ensilage can only be secured in a first class silo and that a silo made of poor material or from lumber that warps or twists will always prove disappointing.

Feeding Ensilage. One can begin to feed silage from the top of the silo as soon as cutting ceases, or the material may be left until needed in winter time, says Breeder's Gazette.

Entering the kitchen hereupon I found a policeman hugging the cook. "A nice cuisine, this!" exclaimed I, with all the irony I could summon.

Amiability. "She has an admirable trait," remarked one woman. "She never gossips."

One Advantage. She (at the museum)—I wish I were the two headed girl.

Ships That Pass. "Ship ahoy! What ship is dat?" "Dis is de good bathub Saturday Night."—New York Journal.

Cause and Effect. Raynor—How do you ever get such a snap job as yours? Shine—Oh, I just rubbered around a little.—Chicago Tribune.

Astounded The Editor. Editor S. A. Brown, of Bennettsville, S. C., was once immensely surprised.

To Save Her Child. From frightful disfigurement Mrs. Nannie Gallego, of LaGrange, Ga., applied Bucklen's Arnica Salve to great sores on her head and face.

TEACHERS' ATTENTION. Regular examination at Tawas City, on the third Thursday and Friday of August 1901.

CHICHESTER'S ENGLISH PENNYROYAL PILLS. Beware of Counterfeits. Refuse all Substitutes.

Kodol Dyspepsia Cure. Digests what you eat. Artificially digests the food and aids Nature in strengthening and reconstructing the exhausted digestive organs.

W. H. WOODMANCY. Opposite LaBerge's East Tawas. MORTGAGE SALE. Whereas, default having been made in the conditions of a certain mortgage...

STEAM DYEING. Cleaning, Repairing and Pressing Gents' Clothing a Specialty. All work Guaranteed to Please and at LOWEST PRICES.

THE DAIRYMAN. With the old method of testing the cows with the churn mighty little testing was done on the average dairy farm, and the seven day test was about the only one known of, and of course we took the seven best days when the cow was in her flush, says L. W. Lighty in National Stockman.

What we want to know is how much butter fat is contained in the cow's milk and how many pounds of milk the cow gives in one year, not a day or a week when in flush on feed that possibly costs twice as much as the product is worth.

The method I use for testing dairy cows is not at all original with me, but is used by the foremost dairymen of the land, and from years of observation and experience I feel conscientious in recommending it as practical for all dairymen and farmers who depend on their cows for the main money crop.

I need three implements—viz, the scale, the Babcock test and the lead pencil. Weigh every cow's milk from year's end to year's end. Test twice per month and keep a strict account.

Bank Barns. Bank barns are always damp and always dusty. Owing to their construction they never admit sunlight in quantities sufficient to be of any use.

A Royal Gift. The Duchess of Fife, daughter of King Edward VII, has received from the government of Western Australia as a souvenir of the Glasgow exhibition...

A New Kind of Fruit. The new dumbbell fruit which has recently made its way to London resembles a Siamese twin peach and tastes like a peach flavored with pineapple.

Different Duelling Methods. Viennese dueling methods are quite different from those of Paris. The chief characteristic of Parisian dueling is its publicity and harmlessness.

Cured Chronic Diarrhoea After Thirty Years of Suffering. "I suffered for thirty years with diarrhoea and thought I was past being cured," says John S. Holloway of French Camp, Miss.

TROTTERS AND PACERS. Anaconda worked a mile in 2:05 1/4 a few days ago hitched to a road cart. A 3-year-old filly bearing the name Goodness Gracious won a race at Denver recently.

CHICHESTER'S ENGLISH PENNYROYAL PILLS. Beware of Counterfeits. Refuse all Substitutes. Safe. Always reliable. Ladies, ask Druggist for CHICHESTER'S ENGLISH in Red and Gold metallic boxes, sealed with blue ribbon.

Kodol Dyspepsia Cure. Digests what you eat. Artificially digests the food and aids Nature in strengthening and reconstructing the exhausted digestive organs.
