### The Forestry Commission Received a Jolt.

The state forestry commission and their guests did not meet much encouragement or arouse anything but opposition among the residents and farmers of Roscommon and Crawford counties when they went up there to look over the "barrens" which they intend to convert into a forest preserve. The people were ready for the "preservers" when they arrived and they strewed pointed interrogatories in their way all across the county and pestered them with questions. The commission was probably surprised to learn that the farmers in the two counties were numerous enough and active enough to have already nominated for the legislature a man who is pledged to do everything in his power to stop legislation looking to the establishment or enlargement of preserves, and that they had also communicated with all other prospective members of the legislature from the northern part of the state.

If the visitors gave heed to their surroundings, they saw some very prosperous and thriving farms in the counties which they purpose turning into forests; they saw some of the best grazing land in the state; they saw a district that is well watered, and they also saw land which is not so good but whose devotion to forestry, according to the plan proposed, would isolate the farmers, decrease the value of their lands and their crops and infringe the rights which they are guaranteed. The farmers are antagonistic to the commission because the commission has proceeded in the wrong manner. It assumed at the start that counties in which the experiments were to be made were barren and uninhabited and that assumption made every conclusion necessarily fallacious. If the commission would, reconsider and revise its plan it would find that the farmers, instead of being hostile, would co-operate earnestly and heartily. The matter of reforestation should be placed in the farmers' hands under the direction of the commission. If a portion of each farm were set aside for the growing of trees and the farmers were instructed as to the best methods to be followed, the results would be satisfactory, the forests would be no isolation and no one be damaged. The matter of restoring the forest is just as important as it has been made, but the setting aside of great tracts of land in a farming community, or a district that may become a farming community, is an error which must defeat the purposes of the effort at reforestation. As to forest fires, the danger from them would be reduced to a minimum by making each farmer the guardian of his own portion of the forest.—*Detroit Tribune.*

### Beware of the Knife.

No profession has advanced more rapidly of late than surgery, but it should not be used except where absolutely necessary. In cases of piles for example, it is seldom needed. DeWitt's Witch Hazel Salve cures quickly and permanently. Unequalled for cuts, burns, bruises, wounds, skin diseases. Accept no counterfeits. "I was so troubled with bleeding piles that I lost much blood and strength," says J. C. Phillips, Paris, Ill. "DeWitt's Witch Hazel Salve cured me in a short time." Soothes and heals.

### Time to Arbitrate.

Pennsylvania has a law compelling arbitration of labor troubles. It is high time its aid was invoked in compelling settlement of the strike in the coal fields. Under this law either or both parties to a strike may ask the courts to name arbitrators. If the court shall find there is occasion it is authorized to name a board whose findings shall be final. No way of enforcing arbitrators' decision is provided, but it seems as though a means might be found. At all events the hearings which such a board has a right to conduct would thoroughly air the controversy. When thus informed of the merits of the case a public sentiment would be roused which neither the miners nor the operators could afford to ignore.

### Gives His Reasons.

Charles L. Rarden, the well known republican attorney of Greenville, has issued an open letter stating his reasons for bolting the nomination of Gov. Bliss, and from it the following is taken:

"The Bliss adherents profess to believe that it is only 'sore heads' and disappointed office-seekers in the republican party who revolted. That this is merely a faction employed for the purpose of attempting to stop the stampede to Durand, can be easily ascertained by going among the people. Largely, opposition to Bliss will be found among farmers and laboring men who have ever been in this state the most loyal supporters of the republican party and its principles, but not office-seekers, office-holders or politicians for revenue only.

"If you would ascertain the magnitude of the republican revolt against Bliss, listen to the talk of people on railroad trains, in hotel lobbies, on the streets and at every cross-road and it will seem as if everybody is for Durand. Nor is the cause for this obscure. The great mass of the republican voters of this state will not be used to further the schemes of dishonest manipulators and they will go to the polls and vote against Bliss, for they can no longer be tricked into the support of a man who is so weak that he does not even know when he is being used by dishonest schemers.

"The republican party was organized by and made up of 'bolters' and within its ranks was comprehended the noblest and best of this land of ours. Actuated by the noblest impulses and purest motives it has written the most illumined pages in our nation's history and to-day 50,000 loyal republicans of Michigan, proud of the achievements of their party and jealous of its honor and purity, will vote against Bliss to prevent its prostitution and dishonor by those who are trying to traffic in its prestige."

### Take Care of the Stomach.

The man or woman whose digestion is perfect and whose stomach performs its every function is never sick. Kodol cleanses, purifies and sweetens the stomach and cures positively and permanently all stomach troubles, indigestion and dyspepsia. It is the wonderfully reconstructive tonic that is making so many sick people well and weak people strong by conveying to their bodies all of the nourishment in the food they eat. Rev. J. H. Holladay, of Holladay, Miss., writes: Kodol has cured me. I consider it the best remedy I ever used for dyspepsia and stomach troubles. I was given up by the physicians. Kodol saved my life. Take it after meals.

### Now Is The Time.

People who want good homes are missing it that they don't secure some of the excellent farm lands in northern Michigan. One of the best informed men of the west recently declared that within ten years he believed all the good, well tilled farming land east of the Missouri river would be worth at least \$100 per acre, and while the land in the prairie states is easier brought under cultivation the superb home market, created by our manufactures, is so much nearer to the Michigan lands and the pure water will more than offset the disadvantage of having to clear up a timber farm. The young man with good health will make no mistake in securing title to a good farm in Northern Michigan while the lands can be had so cheap as at present.—*Bellaire Independent*

### Twine From Flax Straw.

Secret experiments with flax fiber for binding twine have been so successful that indications now are an industry will be developed in the northwest which will save the farmer millions of dollars annually. Since the development of the flax fiber mill in North Dakota, progressive farmers concluded that the tow could be converted into a form of binding twine. Tests were quietly made until recent experiments show a grade of twine of lighter weight and far superior quality to the best qualities now on the market. North Dakota, raise more flax than all other sections of the United States and the millions of tons of straw can be converted into the much desired product. It is believed that the new plan of manufacturing would be much cheaper and that a supply adequate to the needs of all the northwestern states could be turned out.

### Lingering Summer Colds.

Don't let a cold run at this season. Summer colds are the hardest kind to cure and if neglected may linger along for months. A long siege like this will pull down the strongest constitution. One Minute Cough Cure will break up the attack at once. Safe, sure, acts at once. Cures coughs, colds, croup, bronchitis, all throat and lung troubles. The children like it.

### Cream Cheese and Fruit.

A cream cheese to be served with fruit is made light by beating up the cheese with a little olive oil. When it is soft and light, it is pressed into shape again before it is cut into pieces for serving. It should be sliced about an inch thick and served on a plate with a spoonful of whipped cream on it and a spoonful of gooseberry or currant jam at the side.

### New Rainbow Glass.

There are many dainty vases in what used to be called rainbow glass. Some of the prettiest shapes are in the small vases large enough for one or two flowers. An odd vase, that stands in little danger of breaking has a bulb of solid glass as its base, long and slender stem holding just enough water for one flower. This, however, is in plain glass.

### Reduced Rates to the West.

Commencing September 1st and daily thereafter, until October 31st, 1902, the Wisconsin Central Ry. will sell Settlers' tickets from Chicago to points in Montana, Idaho, Oregon, Washington and British Columbia, at greatly reduced rates. For detailed information inquire of nearest Ticket Agent, or address H. W. STEINHOFF, D. P. A., Saginaw, (W. S.) Mich., or Jas. C. Pond, General Passenger Agent, Milwaukee, Wis.

### Pen Factories.

The manufacture of pens in the United States is confined to only four companies, although one might suppose there were many more. That does not include the making of gold pens, which is a separate industry, but pens of steel, brass and german silver. The steel for these pens is brought chiefly from Sheffield, England, as that is the best blade steel. Many experiments have been made with steel manufactured over here, but it never has sufficiently stood the test.

### Javal's Theory of a Sixth Sense.

Dr. Javal of the French Academy of Medicine, who is sightless, denies that nature compensates blindness by increased sensibility of touch and hearing, but contends that when a person is blind an extra development takes place in a sixth sense which is latent in all persons. This sense, which has been called the sense of obstacles, acts by the perception of certain warm and indefinite vibrations. The seat of the sense is believed to be placed in the forehead.—*Kansas City Journal.*

### ESTRAY COLTS

Strayed from my farm in Plainfield, during the latter part of April last, two colts, one a very large black mare, 2 years old, white spot in forehead and roman nose. The other a light iron grey horse, 2 years old this fall, left hind foot white to gambol joint and a white strip in the face, and dark mane and tail. A liberal reward will be paid for their recovery.

When something unfortunate takes place, those who are equally guilty of the same offense, are the first to stand around the corners and threaten a lynching. If there is any man who should be despised it is the noodle who tries to build his reputation up on the downfall of others. Good men are sorry for the downfall of any man or woman. The bad men gloat over it like a skunk over the carcass of a dead hen.—E.E.

The state campaign must not be diverted from state issues. The people of Michigan have a case of housecleaning to attend to, and it has nothing whatever to do with the tariff question or the colonial policy. It does not concern Washington, but Lansing. It has nothing to do with President Roosevelt, but simply with Gov. Bliss. It will have no effect upon national legislation, but will profoundly affect the legislation which emanates from Lansing.—Hastings Herald.

### Judge Durand Ill.

The announcement of the serious and probably fatal illness of Judge George H. Durand, of Flint, the democratic candidate for governor, has cast gloom over the entire state. Regardless of party, no citizen of this commonwealth stood nearer to the hearts of the people than Judge Durand. His honest, sincere, noble personality has always been admired, and his loss will be most sincerely mourned by all.

The latest bulletins indicate slight improvement in his condition, but the hopes of his recovery are very slight.

### Mayor O'Brien for Congress.

The democratic congressional convention for the tenth district met at Bay City last Wednesday, and placed in nomination Mayor Michael O'Brien, of Alpena, the nomination being by acclamation, after the other candidates had withdrawn. The nominee is one of the best known and most popular residents of Alpena, and a man of ability. As a vote getter he has demonstrated his ability, having been elected to many positions of responsibility and trust and never defeated. As a public official he has always proven capable, honest, and energetic. He will be heard from during the coming campaign.

### Races for the Fair.

Arrangements are being completed whereby a number of outside horses will be brought here to compete for special purses at the coming fair. The business men of the Tawas have been asked and have responded in a most liberal manner, to contribute for the purses, and there now appears to be no doubt that sufficient funds will be raised to offer purses of at least \$350. The horsemen at Alpena have agreed to bring at least eight horses, and those of other towns have also signified their intention to attend.

The arrangements will be completed within a day or two, and programs announcing the races and purses will be out early next week. These races, together with the ball games and other attractions will make the coming fair the best ever held, and the attendance should be the largest.

If you need a buggy or light spring wagon James Murrey & Co., East Tawas, will sell you one. Cash or time.

The farmers are rushing in their contract peas. The crop is immense. About 10 ton are being delivered at the station each day, and it keeps our agent on the hustle.

The new store front which Dr. McColl has had placed in his drug store is an improvement to his place of business and to our village. H. Misner, of East Tawas, did the work.

We notice that the correspondent from Wilber seems incredulous about the fabulous yields of grain as reported from this vicinity. If the gentleman will come over we will take pleasure in verifying the facts as reported in the Herald, and will show him an exhibit of fruit that can't be beat in the State.

A. Blumenau has an offer for his farm recently purchased near Emery Junction. We don't know whether Albert will sell or not. Lands in that locality are in good demand. We predict a glorious future for Emery Junction. We expect to see it the leading city in Isoco and the county seat in the near future. Tawas City must look out for her laurels.

### Tax Titles.

There are large amounts of tax titles being bought by the Flint Land Company upon village property and lands in this and adjoining counties, and there is going to be trouble on the part of owners in getting their land clear. The taxes of late years have been turned into decrees which are likely to be good, and unless 100 per cent is paid to these tax-title purchasers they will most likely get good titles. In addition to this the state has already, or is about to have these lands and properties deeded to the state for homestead and auction purposes, which will surely cut it off; therefore it behooves property owners to pay up their back taxes, and save the 100 per cent. Lands are constantly being picked up by wealthy men from other states, for stock raising purposes; and when good lands can be gotten for the taxes or less, it cannot be expected that vacant lands which are good for farming purposes will long remain without being gobbled up. Ohio parties have purchased over 3000 acres in Sherman alone since spring, and during the past week all the land around Emery Junction has been sold to Ohio parties also.

### Weekly Crop Report.

U. S. Department of Agriculture, Climate and Crop Bulletin of the Weather Bureau, Michigan Section, for the week ended Sept. 1, 1902.

The mean daily temperature for the past week was 65.9 degrees, or 1.8 above the normal; the average total precipitation was 0.05 of an inch, or 0.45 below the normal; the sunshine averaged 79 per cent of the possible amount.

The weather of the past week has been bright and dry; the days have been moderately warm and the nights cool; these conditions were unfavorable for the best advancement of beans, corn and late potatoes. Corn has eared nicely and has made some improvement during the past week, but the crop is still backward and is making slow growth had if present conditions continue the yield will be short.

Beans have improved slightly and most of the crop is now very near maturity. Late potatoes are badly in need of rain, have not made much progress and show some blight. Buckwheat has filled nicely and is in promising condition. Sugar beets continue to do well. Pasturage is becoming short, especially in the Upper Peninsula and northern counties.

The soil is very dry for plowing and some correspondents report the soil so lumpy and dusty that plowing is almost impossible. Peaches and pears are yielding well and the late varieties are fairly plentiful. Early apples are quite plentiful and prospects for fairly good yields of the late varieties continue promising.

**FOR THE HOUSEWIFE**

**Putting Away Clothes.**  
The question is often asked, Which is the better time to clean house, spring or fall? I should advise spring cleaning. All closets, boxes and drawers should be thoroughly cleaned and the house from garret to cellar be swept and dusted, says the Ladies' Home Journal. This treatment will dislodge any dormant insects or their eggs.  
Early the cloth moth begins to make its appearance, depositing its eggs in furs and all kinds of woolen materials and often in crevices in doors, closets and boxes. It always seeks quiet, dark places. Closets, drawers and boxes should be well cleaned. Take special pains to clean thoroughly each crack and groove. Buy at the druggist's a few ounces of the oil of red cedar. With a small brush such as artists use apply the oil of cedar to all cracks and grooves in boxes and drawers and to the tops of doors and baseboards in closets; also around the edges of the floors. Use very little of the oil. There must not be enough to soil anything which comes in contact with the treated surface. This treatment will make closets, boxes, etc., moth proof for some time, even when in constant use, and if closed at once the contents will be perfectly safe through the summer and fall. All articles should be thoroughly brushed, shaken and aired before being returned to closets or drawers. From time to time through the spring and summer put a few drops of oil of cedar on little wads of cotton and place them in closets which are in constant use, being careful not to let the oiled cotton come in contact with clothing or other articles.

**Pretty and Useful.**

One of the cleverest conceits for holding twine is the one represented here. Cut two lengths of art linen in any shade 13 inches long, 3 1/2 inches wide. Arrange each end in a point; bind the edges with satin ribbon. Any little flower or fancy can be painted on the sides or a little kitten that loves

THE TWINE HOLDER.

to play with a string. Make an eyelet hole through the bottom of the box for the string to pass through. Overhand the sides carefully together and thus keep the ball intact. Finish with satin bow and ends to hang by.

**Stains For Floors.**

Oak stain is made by mixing together a pint of boiled linseed oil, a gill and a half of turpentine, three tablespoonfuls of raw umber, three tablespoonfuls of whiting. Mahogany stain is made with one pint of boiled oil, a gill and a half of turpentine, three tablespoonfuls of burnt sienna, three tablespoonfuls of whiting, half a tablespoonful of yellow ochre, half a tablespoonful of bismarck brown and half a tablespoonful of aniline black. A little of the stain should be tried on a piece of board before trying it on any articles of furniture or a floor. The shade of color may be deepened or lightened by increasing or diminishing the coloring matter. The stain should be rubbed into the wood and after a day or two the floor rubbed hard with a soft woolen cloth.

**To Get Rid of Ants and Moths.**

A Tennessee housekeeper claims that a locality can be made very offensive to ants or to moths by soaking wads of cotton in oil of cedar and placing them on the shelves or in the drawers to be protected. She also says that carpets may be protected from moths by an application of turpentine and cold water, one tablespoonful of the turpentine to a quart of cold water. First sweep the carpet thoroughly, then go over each breadth with a sponge dipped in the mixture and rub dry with a clean cloth. This will brighten the colors and sweeten the atmosphere of the room, besides discouraging the moths.

**A New Seasoning.**

A Massachusetts cook who has a good word to say about the value of seasoning in cooking makes some suggestions along this line which will be novel to many people. For instance, the seasons apple pie with three tablespoonfuls of freshly made Japan tea, baked beans with a half cupful of sweet cream during the last hour of baking, corned beef hash with cayenne pepper, fresh meats with a tablespoonful of brown sugar and fish with cider vinegar.

**Tomato Patties.**

For a family of five use one pint of canned tomatoes. Thicken with bread crumbs to a consistency for baking on a griddle. Season with salt, pepper and butter, adding sugar if the taste requires it. Dip with a cooking spoon on to a griddle heated as for pancakes and brown on both sides. The time required for properly cooking is much longer than for griddle cakes.

**THE FASHIONS.**

Holland dresses more or less tinted are much used for beach and mountain costumes.  
The Gibson effects are still very popular, and there are tennis, yachting, pingpong, golf and coaching Gibson waists.  
Plain white nun's veiling or pongee makes a charming summer gown over white taffeta, the gored skirt laid at intervals in fine vertical tucks down to the knee.  
Some of the new French skirts are arranged in graduated box plaits all around, the plaits being very narrow and flat at the top, widening out as they descend and when released giving the fashionable fullness near the feet.  
Noticeable among the light silk and liberty satin gowns is the fact that the seven and nine gored skirts are very much used, but so often disguised by fagot stitching, vertical tucking or insertion bands of lace that the seams are almost invisible.  
One of the daintiest of the summer blouses is formed of almost transparent pink India silk, elaborately tucked and trimmed with Flemish lace insertion. The neck is finished with a transparent collar of a wider band of the lace, threaded with black velvet bebe ribbon.—New York Post.

**THE HORSES.**

Bob Davis will rein behind Coney, 2:02, this season.  
The sister to Bingen, 2:06 1/4, recently foaled by Young Miss, is dead.  
It is reported that John Hussey will have Onward Silver, 2:08, this year.  
The Abbot recently worked a mile in 2:13, last half in 1:03, for Ed Geers.  
The pacing mare Violation, 2:11 1/4, is being raced in the slow trots this year.  
Miss Logan, 2:06 1/2, recently paced a mile in 2:07 on the San Jose (Cal.) track.  
The pacing mare Nelly M., 2:10 1/4, has a chestnut filly by Heir-at-law, 2:05 1/2, at foot.  
Markala is the name given to the yearling filly by Peter the Great, 2:07 1/4, out of Nancy Hanks, 2:04.  
Anagnall, purchased at the Marcus Daly sale in December by Mr. Brayton Ives, has by her side a handsome bay filly by Bow Bells and has been bred to Kellar, 2:10 1/4.  
Queen Wilkes, owned by E. E. Smathers, recently clinched her title to the championship of the New York speedway by defeating Nathan Straus' Alves, 2:09 1/4, easily in two brushes.

**PLAYS AND PLAYERS.**

In a popular Boston theater feed tea is served free to the audience on warm days.  
"The War of Gold" is a melodrama based on the Boer war just successfully reproduced in Paris.  
The Lieblers have signed a contract to bring Charles Wyndham to the United States next season.  
Bronson Howard has been abroad for two years, so ill with neuritis that at times his life has been despaired of.  
Aaron H. Woodhull has engaged the full cast of forty-two people for the big musical comedy, "Codfish Aristocracy."  
Minnie Palmer is in a vaudeville sketch at the Royal theater, Holborn, England. The sketch is called "Rose Pon-Pon."  
Mme. Sembrich comes to this country in October to head a concert company that will tour under the direction of M. Grau.  
The suggestion has been made that every theater give one matinee performance a year in aid of the various theatrical charities.

**SHORT STORIES.**

The world's steel output for a year would build a steel wall 5 feet thick, 20 feet high and 100 miles long.  
There has been erected in the works of a Bethlehem (Pa.) steel company a steam hammer four stories high which strikes a blow of 125 tons.  
If all the land in the United States planted in corn this year was massed, its area would equal the British Isles, Holland and Belgium combined.  
The private car of General William Mahone of Virginia is now an odd looking shanty in the suburbs of Richmond and is used by railroad employees.  
Consul Saylor of Dawson City says that the output of gold this year promises to exceed that of 1901, which amounted to over \$20,000,000 in the Klondike.  
The government bureau of animal industry is of the opinion that the whole system of keeping pigs could be reformed to advantage, and an effort will be made to make the American hog a cleanly animal.

**Potato Souffle.**

To make potato souffle, add to two cupfuls of smooth and well seasoned potatoes yolks of two eggs; stir over fire until eggs are beaten through; when cool, beat in lightly whites of eggs beaten stiff; turn into pudding dish and brown in hot oven.

**A Sad Disappointment.**

Ineffective liver medicine is a disappointment, but you don't want to purge, strain and break the glands of the stomach and bowels. DeWitt's Little Early Risers never disappoint. They cleanse the system of all poison and putrid matter and do it so gently that one enjoys the pleasant effects. They are a tonic to the liver. Cure biliousness, torpid liver and prevent fever.
