The success of the corn crop this year will depend largely upon the time the first frost appears. A few fields are well advanced while others are late. Some will be lucky if they have a crop at all. The backward condition of the crop is caused by the dry spring which intefered with the planting. If there is no frost until late in September the bulk of the crop will be out of danger. Should a frost come before the middle of September many fields will be injured or ruined. Messrs. Lyon & Healy. of Chicago. have presented to the U. of M. Farming in the Yakon.

W. M. Swinebart, says the Montreal Sear, conducts a 120-acre farm at Fort Selkirk, where he has been five years, and is enthusiastic over the agricultural possibilities of the Yukon Valley. His chief products are hay, oats, potatoes, turnips and other hardy vegetables. All of these are produced abundantly, and Dawson and the sur r unding country affords a good mar. ket. Potatoes yield about 200 bushels to the acre, and a similar area of ground will produce three tons of oats or timethy hay. A povel feature of the country is that timothy can be sown in May and a hay crop can be cut the same season. Mr. Swinehart Office Phone 195. says that experience has shown that 20 acres of his farm at Selkirk will simplify a greater profit then his fath DENTIST. give him a greater profit than his father can make on his well tilled 1,000 acre farm in Wisconsin.
