Sowing in the morning,  
Sowing seeds of kindness  
Sowing in the noon-tide  
And the dewey eve,  
Waiting for the harvest  
And the time of reaping,  
We shall come rejoicing,  
Bringing in the sheaves.

Sowing in the sunshine,  
Sowing in the shadows,  
Fearing neither clouds nor  
Winter's chilling breeze;  
By and by the harvest  
And the labor ended,

We shall come rejoicing,  
Bringing in the sheaves.

Going forth with weeping,  
Sowing for the master,  
Tho' the loss sustained  
Our spirit often grieves;  
When our weeping's o'er  
He will bid us welcome,  
We shall come rejoicing,  
Bringing in the sheaves.

FREDERIC SIEVERS.

#### CALLS SPECIAL SESSION.

#### Governor Says He Regards Situation Extraordinary And Demanding Relief.

Lansing, Sept. 23.—Governor Fred M. Warner today issued the following call for a special session of the legislature to convene Oct. 7:

"Section seven of article five of the constitution of the state of Michigan, empowers the governor to convene the legislature in extraordinary occasions.

"At the last regular session of the legislature the two houses disagreed regarding the bill making appropriation for the maintenance of the Central Normal school for the ensuing two years as well as for improvements at that institution. The contention was raised after the legislature had adjourned that the bill as signed by the governor was not the bill that had passed the house and the senate and therefore void, thus depriving the college of funds for maintenance and necessary betterments.

"The people of the state are almost a unit in demanding that all candidates for public office who are voted for by the primary system shall be selected by the people and under no circumstances by a delegation. The existing law in Michigan makes this provision for all candidates save those for governor and lieutenant governor. At its recent session the legislature failed to make a number of changes in the law which the people of the state desire. These universally desired changes should be made before another general election is held in Michigan. The legislature alone can supply the needed remedies.

"Regarding the situation as extraordinary and as demanding immediate attention, I hereby call the legislature of the state of Michigan to meet in extraordinary session on Monday, the seventh day of October, 1907, at 12 o'clock noon of that day to consider such matters as shall be submitted by the governor by special message."

It saves more lives than all other throat and lung remedies together. Used as a cough and cold cure the world over. Wuggazer & Co. druggists. 50c and \$1.00. Trial bottle free.

### \$9,437,662 IN SALT.

#### Michigan Holds Second Place in Output for 1905.

Washington, Sept. 23.—At the census of 1890, 1900 and 1905, New York, Michigan and Kansas, in the order named, have stood at the head of the salt producing states. Of the total production of the United States for 1905, these three states supplied 69.9 per cent. Saginaw, Mich., says a census report just issued, probably produces salt at a lower cost than any other place in the country, because there the great lumber interests supply as fuel sawdust and lumber offal, which though utilized as far as possible for other purposes, remain in enormous quantities, and if not burned must be removed at considerable expense.

At the census of 1905 the establishments producing salt numbered 146, and had a combined capital of \$25,586,282. They employed, on the average, 4,666 wage-earners, paid \$2,066,399 in wages, consumed materials costing \$4,166,137, and manufactured products valued at \$9,437,662.

The manufacture of ice is a comparatively new industry, and its growth has been remarkable. In 1870 the industry had hardly made a beginning. But in 1905 the number of establishments engaged primarily in the manufacture of ice for sale have increased to 1,320; their combined capital, from \$434,000 to \$66,592,001; the average number of wage-earners, from 97 to 10,101; the wages paid, from \$40,600 to \$5,549,162; the materials, from \$82,165 to \$6,011,325; and the value of products, from \$258,250 to \$23,790,045.

#### Jerking a Horse.

Once put to and out-of-doors the principal evil we shall notice is the tendency of drivers of wagons, cabs, rye, and private carriages as well, to nag and jerk the horses' mouths, instead of using the voice or the whip, and it appears that this brutal practice is on the increase. Some drivers' hands are never still, but it is a jerk, jerk all day long, and the appearance of their horses shows how the suffering wears on them, while an inspection of their mouths, and the way in which they let go of their bits, will disclose bone and skin bruises and abrasions of dreadful extent, lacerated tongues and torn lip-corners. The lower jaw of a horse is a marvelous structure of tenderest and thinnest skin, quivering nerves and acute sensitiveness, and yet every vehicle in our streets is steered by some double-fisted brute who mauls this organ from daylight to dark. The horror of it! A single jerk to a horse's mouth inflicts far more acute agony than cutting of six tails (if he had them,) yet one goes unpunished and the other is a states' prison offense—or would be if the S. P. C. A. were in earnest about preventing the mutilation of the thousands of horses annually in this state—Outing.

#### Annual Excursion to Detroit, Toledo, Port Huron, Bay City, Ohio and Indiana.

Special train with parlor car leaves Tawas City at 8:45 a. m. If possible buy tickets and get baggage checked before the day of excursion. Write D. & M. agents or T. G. Winnett, G. P. A. Bay City.

### ARE YOU A KICKER?

#### A Class Which Should Be Avoided By All People.

Do you know the knocker? A sour, discontented face. A suspicious, disagreeable expression. Eyes that see only what is amiss. Ears that hear only tones that are out of tune. A mouth that has uttered nothing but fault-finding for so long that it has forgotten it has any other function. Lips that are only the gateway to a heart where complaint lives, with its world-old companions, criticism and abuse.

This is the man who kicks, says an exchange.

No matter what happens, he sees the fault in it. It is always either too early, or too late, or at the wrong time, or it is the worst thing that could possibly have happened, or else the man who did it was a rascal. If he wasn't a rascal, he was at least wretchedly incompetent. No matter what is said, he sees where it was insincere because it said too much, or cunning because it said too little. Whatever is done, it is just about as unsatisfactory as it can possibly be.

The house is too warm, or else it is too cold. If the window is open it ought to be closed; if it happens to be closed he wonders why people prefer to be smothered. His meals are never cooked to please him; he never did like the way the house was built, and nobody knows how to bring up children any more.

He fairly revels in the wretched way in which the office is conducted. The office boy is lazy; the book keeper is a doddering old ass; the chief clerk is an ignoramus; and he wonders who it was that died and left things in such a shape that the boss ever got his position of authority. The bank is rotten. He knows it is. The minister is a hypocrite. Besides, he doesn't like the sermons, and the music is awful. They don't run the church right, anyway. He wishes to heaven he could find a decent grocer. The weather is abominable. The city government is extravagant and corrupt. The state officials are worse. As for the national government—only Providence can save the country now.

Nothing is right; everything is wrong.

The poor man has a cross-eyed soul.

This picture is overdrawn. Probably there isn't any human being quite as bad as is drawn in this composite picture; but this is expressed as it is so that the picture may be clear.

You see, if there is anybody who helps to cloud the world's blue sky, it is the man who kicks.

The blue sky is the sky of faith, out of which the sun of happiness shines down. If the heaven is hidden by clouds, there can't be any sun in the world.

And one little cloud is enough to cast a shadow.

The single stir on another man's friend, the single suspected motive ascribed to a thoughtless woman, the single irritable word spoken to your wife at breakfast—anyone of these may be the cloud that will keep the sun from shining somewhere all day long.

Don't have a cross-eyed soul. Trust, believe, have faith. Make the best of everything. Learn to see the good side and the satisfactory side. Let the sun shine.

The pupils of the seventh grade are memorizing the Ship of State.  
Rena Whittemore's map was the best in the grammar department.  
Minnie Newman enrolled in the intermediate room Monday morning.  
Alice Tichenor has left school, having returned to her old home at South Branch.  
Charlotte Jahraus, while passing to her class Monday, slipped on the stairs and met with a serious accident.

The intermediate room boasts of a choir consisting of ten pupils that take charge of the music.  
The second primary room is much interested in some of Ernest Thompson Seton's animal stories.  
Edith Bloomer and Leroy Wade were absent from the grammar department on account of sickness.  
Hiawatha's wigwam was a feature in the primary room on Tuesday. There was a bonfire forest and canoes on the "Shining Big Sea Water."  
The score of the ball game last Saturday was five to three in favor of East Tawas. Our boys are rather slow as they don't seem to be on the winning side.  
The high school, grammar room and the normal pupils listened to a most interesting and instructive lecture delivered by Rev. Hastings, giving an account of his trip to Europe, and telling of the things he saw in England, Scotland, Ireland and France. At the conclusion of his

lecture, Rev. Berry offered a few remarks and told us he would address us in the near future and tell us of his trip to Mammoth Cave.  
**WARD SCHOOL.**  
Philip McCombs has been absent for the past few days, being ill with a cold.  
There are forty-one enrolled at the ward school, all of whom are interested workers.  
Mr. Chaffee was a visitor at our school yesterday and took some little time in getting acquainted with the scholars.  
A great many slips have been brought to start a window box which we expect to have all completed early next week.  
**NORMAL DIXIE.**  
We had Wednesday and Thursday afternoons for the fair.  
Miss Hamner was absent Thursday morning on account of the rain.  
We were favored with a talk by the Rev. Hastings Tuesday afternoon, on his trip abroad. We enjoyed it very much.  
Professor Chaffee told the Normal girls that they might practice their manual training upon the flag that was badly torn by the wind. Misses Parker and Cadorette were the two industrious ones.  
The Normal school opened Monday, Sept. 14, with Miss Harding as teacher, having an enrollment of twelve girls. The members of the class are Misses Victoria Green and Minnie Hamner, of Tawas City; Eva Sauve, Edith Graut, Estella Murphy, Josie Bristol, Beatrice McCully, Alice Nordstrom, Lueella Tait, Cora Parker and Mary Cadorette, of East Tawas; and Marguerite Kinney, of Osceola.

**They Knew Their Worth.**  
"One of the most vital results of the presence of women in business," says Anna Steese Richardson in the October Woman's Home Companion, "is the fact that the invasion of the business world by an ever-increasing army of the inexperienced, untrained, half-grown girls has lowered the wages of men and withered ambition in many of them."  
"Time was when America's great merchants received their commercial training behind the counter. 'Clerking' was then merely preparation for active management or ownership. The salesman was a human bundle of commercial possibilities which he could readily embrace in thousands of cases."  
"To-day, with twice as many saleswomen as salesmen in the average small store, and three or four times as many in large department stores, the male clerk has lost prestige. He is tolerated, not approved. The title of retail salesman has become more or less a reproach."  
"While gathering the material for these articles I spent one whole day with the superintendent of a new department store while he hired all sorts of help, from drivers of delivery wagon to buyers and floor managers. Before two hours had passed 'we could spot' a would-be salesman directly when he stepped inside the door. He approached the superintendent with an air so unconsciously pitiful that it baffles description. His walk, his carriage, his tone, all said plainly: 'I know I ought to be ashamed to apply for this sort of work, but I've got a family to keep—and anyway I ought to be worth more to you than a raw, untrained girl.'"  
"But let the man enter who could drive a horse, lay a carpet, or even polish stoves in the hardware department, in fact do any sort of work where he would not come in competition with the line of gum-chewing, pompadoured, sixteen-year-old girls, and he would radiate that wonderful air of buoyancy, elasticity and hope which marks the man who believes life still holds something for him. He knew what his services were worth, and he asked for that amount. The agreement with him was on a logical basis."

**Bringing Results.**  
The agitation for purity in food products has become world wide. Everywhere consumers are demanding assurance that the things they eat are not adulterated. The national and state governments in this country have lately enacted drastic laws and public sentiment is strongly supporting their enforcement. It is beginning to be realized by producers of foodstuffs that it pays them to obtain a reputation for the quality of their goods and the public is beginning to appreciate that cheapness is not the only thing to be considered. Canada has just put into effect a law for the inspection of meats similar to that in operation here. Canada does this for commercial reasons as much as any other, for American inspected meats have gained much favor in foreign markets. The packing house men no longer claim that the law imposes hardship and loss upon them. It is now conceded to be of general benefit.—*Tradesman.*

**COLE'S HOT BLAST**  
Wonderful Heater and Fuel Saver  
For Soft Coal, Lignite or Hard Coal  
Cost of Stove Saved in Fuel  
Guarantee

As you know one-half of soft coal is gas—the entire gas supply for many cities and towns being made from the same kind of soft coal you are using.  
The extent of unburned gases in hard coal is shown by opening the magazine cover of a base burner when the extra oxygen supplied fills the entire stove with flaming gas.  
Other stoves allow this gas, which is the best part of the coal, also a large part of the heat, to pass up the chimney. This waste will average from \$10.00 to \$50.00 a year for every family and millions of dollars in fuel are thus wasted annually.  
**The Original Cole's Hot Blast Stove**  
Saves All Wasted with Other Stoves  
Cole's Original Hot Blast, by means of the Patented Hot Blast draft used in connection with other patented features, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or coke in the coal.  
On account of the patented air tight and gas tight construction giving perfect control over the drafts, it also saves the heat usually wasted up the chimney.  
\$5.00 worth of hard coal, soft coal or lignite, or a \$1.50 ton of slack or coal siftings is thus made to do the work of twice the amount of fuel in other stoves and the cost of the stove is more than saved in fuel each winter. \$7.50 worth of slack will heat your house all winter, five tons at \$1.50 a ton does the work.  
**Build only One Fire a Winter**  
Cole's Hot Blast is so perfect in construction that fire keeps all night, and when the draft is opened in the morning will burn two or three hours with the hard coal or soft coal put in the night before. No other stove does this. Fire, therefore, never goes out, kindling fires is dispensed with, and the rooms are kept at an even temperature all the time.  
Read the Guarantee. We are the exclusive agents for Cole's Original Hot Blast and sell it on the accompanying guarantee which cannot be made on any other heating stove in the world. If you want to save half your fuel bill and would enjoy the luxury of getting up in a warm house on cold winter mornings without kindling fires, buy Cole's Original Hot Blast now.  
**Avoid Imitations**  
Imitations of this Original Hot Blast are many. None of them has the absolutely air-tight and gas-tight construction throughout which Cole's Hot Blast has by reason of its numerous patents. A Patented Steel Collar connects the elbow draft to the stove body and cannot open by action of the fiercest heat. The Patented Compound Hinge on the lower draft cannot warp, and the draft door closes air-tight by its own weight. The guaranteed Smoke-proof Feed Door prevents smoke, dust or gas escaping when fuel is put in the stove.  
Imitations soon open seams and cracks which spoil them for keeping fire and cause the gas half of the coal and much of the heat to escape up the chimney.  
See the name "Cole's Hot Blast from Chicago" on the feed door of our stove. None genuine without it.  
Ask to see the patented dustless ash cover for removing ashes. Our method is the only clean way.
