Ask your dealer Why he sells so many more **Remington Game Loads**

DEMINGTON Game Loads are increasing in N popularity faster than anyother shells in America. Have you tried them?

Hundreds of thousands of sportsmen all over this country are discarding the old style specified loads, and are now shooting Remington Game Loads.

With all due respect to any specified load you are now shooting-give Remington Game Loads a tryout on your next shooting trip.

Go into the store. Tell the dealer what kind of game you are going after-and get the Remington Game Loads specifically made for that kind of game.

They will give you a shooting quality you have never known before. They are scientifically loaded to a uniform standard of velocity, pattern and penetration, all with moderate recoil.

This idea of specific loads for specific game is original with Remington.

All our experience and ballistic knowledge told us how absurd it was to have 3200 different shotgun loads-when there are only a few kinds of game hunted with shotguns.

So we brought out Remington Game Loads-the right load-the best load-for each kind of game.

Remington Game Loads are loaded with the highest quality American-made smokeless powders in Remington Nitro Club Wetproof Shells.

Thousands of seasoned sportsmen will tell you that they are right.

Isn't it about time for a New Shotgun?

While you are at your dealer's, look at the New Improved Model 10 Remington Pump Gun. Handle it. Work the action. Note its smoothness of operation, its remarkable pointing qualities and fast hammer action.

Wherever you see this old Duck Hunter in the window, you'll find a Remington dealer - Remington Arms and Remington Ammunition

nated by American body designers without following precedent or imitating or adapting what has been done before.

Today Studebaker proves that a practical and beautiful type of car can be made to combine the pleasure and performance of the open car and the comfort and protection of the closed car - and this without excessive price or compromised quality - a car "duplex" in open-car smartness and convenience and closed-car elegance and comfort-and at a price no higher than that of an open car!

Today Studebaker proves, in its new Standard Six Duplex model, that a six-cylinder car of fine quality, great power, plenty of room and impressive appearance can be made and marketed at a price of \$1145.

Today Studebaker proves in its new Special Six and its Big Six Duplex models that the ultimate in all the essential features of quality in five- and sevenpassenger cars can be made and marketed at a price of \$1495 and \$1875 respectively.

And this is possible only because Studebaker cars are made in one of the most comprehensive industrial plants in this country, 70 per cent of which is new within the last six years.

Every modern method of manufacture and long experienced management are available for the production of Studebaker automobiles.

Today Studebaker proves that the highest grade closed car bodies—framed in selected hard woods, cushioned with the best cushion work, upholstered in fine mohair fabrics and fitted with expensive appointments-can be made and marketed on superlatively good chassis at moderate prices.

This is made possible by the new \$10,000,000 Studebaker closed body plants. Studebaker designs and builds all of its closed bodies in one of the best equipped and most modern body plants in the industry.

The Three New Chassis

THE STUDEBAKER STANDARD SIX - 113 in. wheelbase, 5-passenger. Engine, 33/8x41/2, 50 b.h.p.-with 6 different bodies, including Duplex-Phaeton, Duplex-Roadster, Coupe-Roadster, Coupe, Sedan, and Berline.

THE STUDEBAKER SPECIAL SIX - 120 in. wheelbase, 5-passenger. Engine, 31/2x5, 65 b.h.p.with 5 different bodies, including Duplex-Phaeton, Laplez Roadster, Victoria, Sedan, and Berline.

THE STUDEBAKER BIG SIX-127 in wheelbase, 7-passenger. Engine, 37/8x5, 75 b.h.p.-with 4 different bodies, including Duplex-Phaeton, Coupe, Sedan, and Berline.

The Ten New Closed Bodies

COMPLETELY NEW BODIES - each car a masterly expression of modern style, yet distinctly Three completely new chassis!.. 15 completely new bodies! Completely new lines! . . . Marvelous new performance Completely new open-closed car!

Completely new radiators, new fenders, new lamps, new seating comfort, new finish, new colors in lacquer finish, three improved engines

Real balloon tires, not low-pressure cords. Sizes-21"x 5.25" to 20"x 7.30".

New Studebaker automatic hydraulic 4-wheel brakes-optional.

New values, never before equaled-even by Studebaker!

original in beautiful lines-individual, conservative, impressively elegant, but crisp enough in its departure from imitation to be entirely distinctive.

The Five New Duplex Bodies (A new type of car originated by Studebaker to take

the place of the open car)

SO ENTIRELY NEW and so different from any other body ever made before that a new name had to be created-the DUPLEX.

The upper structure is shaped in pressed steel and covered with the finest water-proof fabric. The steel construction permits the use of another radical Studebaker creation, the new roller enclosing curtains. There is the permanent beauty and durability of the steel top plus the instant convenience of the roller curtains.

Thus Studebaker engineers have solved the openclosed car problem.

The buyer who wants the airiness and practical convenience of the open car and who also wants the comfort, protection and beauty of the closed car can now get both in one car and at the price of an open

car. One moment the new Studebaker Duplex is a beautiful open car-a touch of the hand to the overlapping roller curtains and it is a snug weather-tight closed car.

Balloon Tires

Genuine and full size balloon tires on all models. Every part that functions with the tires has been specially designed for balloon tire equipment-steering gear, steering knuckles, spindles and springs, even the fenders.

The Standard Six closed bodies are beautifully

balloon tires are contrasting touches. The Standard Duplex Models are finished in glossy

The Special Six and the Big Six Duplex models are in soft satin lacquer with dark blue hoods and bodies striped in light blue and ivory. Here, too, the sparkle is added with burnished nickel radiators and light, natural wood wheels in contrast with jet black fenders and big, black balloon tires.

More Power

The universally famous Studebaker engine is more than ever a peer among power plants. The crankshaft is heavier. ALL surfaces are perfectly machined to exact dimensions and balance. The bearings are larger.

The engine is in unit with the clutch and transmission. There is a force feed lubrication system with clean, strained oil always in reserve. There are many changes and improvements which result in MORE POWER, MORE QUIETNESS and SMOOTHNESS and STILL BETTER PER-FORMANCE in every way.

New Brakes

Larger, more powerful, simpler and much easier operated two-wheel brakes. An entirely new emergency brake is operated from the instrument board, instantly convenient to the driver's hand where it simplifies the control and frees the floor board from _____and the year after! SEE IT TODAY!

The regular two-wheel Studebaker brakes with their simplicity, safety and great braking power are entirely adequate.

But Studebaker 4-Wheel Hydraulic Brakes (with disc wheels) can be furnished as optional equipment on all models at extra charge if desired.

Studebaker 4-Wheel Brakes have three exclusive features not found on any other system in this country.

1. Braking pressure is furnished by hydraulic power automatically developed. A light touch to the braking pedal controls its great force like a touch to the throttle controls the power of the engine. This feature will appeal instantly to women.

2. The front wheels cannot lock.

3. There are only two adjustments required-one at each rear wheel. The front brakes are permanently adjusted at the factory. The oil in the transmission is used to generate the hydraulic power; the action of the gears and the pump keep it in circulation: it cannot congeal or freeze. Braking power is always instantly ready—in winter as well as in summer!

New Ease of Operation

New Ease of Gear Shifting-New power in braking, a touch to the pedal exerts a giant's strength at the rear wheels -New clutch action, soft as velvet-A new steering gear and steering knuckles designed for balloon tires-A new grouping on the dash, including ALL the usual instruments plus a gasoline gauge that always works accurately.

Lighting Control Switches -all on the steering wheelinstantly handy.

Automatic Spar Control-No manual attention required, ted. Automatically governed to all so the lever n of machinery. speeds with t...

And the Details

The new cars are longer and lower to the ground. The line from the radiator to the rear is nearly straight. The wheelbase of all models is increased.

The fenders are much wider and deeper crowned to cover the width of the tires. They fit more closely over the wheels. The rear fenders are long and gracefully curved into the running boards.

The radiators are high and set low in the frames and convex curved just below the filler cap. The design is strikingly original and beautifully distinctive.

Entirely new head lamps and cowl parking lamps designed by Studebaker-artistically appropriate and in perfect keep-ing with the originality of the body and fender design.

Deeper, stiffer frames, more cross members; shorter, flatter springs for balloon tires. All bodies lower, all roomier, better and more comfortably cushioned. Seats are lower, backs and sides are higher.

Look Forward Into Next Year

The new Studebaker is here today! And no matter how sweeping your ideas of what a new model should be this car will satisfy you. It will thrill you with the very newness and originality of its beautiful lines!

You may not be in the market now, or even this year. But to see the new Studebaker is to look forward into next year

New Lacquer Finish

finished in semi-glaze, satin lacquer. The hood and lower panels are in light gray, the upper panels in darker gray. Hairline parallel striping in oriental red. Burnished nickel radiators, jet black fenders, light golden finished, natural wood wheels and big

jet enamel-lasting, lustrous and wear-resisting.

	and the second

a few days here with his family. John Searle went to Bay City Tuesday with his daughter, Laura, where she will receive medical treatment.

Highest Scottish Lake

Scotland can boast of the highest loch in Britain, Loch Coire-an-Lochan, lying 3,250 feet above the level of the sea. England's highest sheet of water is the Red Tarn, on Helvellyn, over 2,000 feet altitude.

Napoleon and Suicide

Napoleon said that a man had a right to suicide if "his death will do no harm to anybody, and life is a torment to himself."

Detroit News. The South Carolina railroad was chartered in 1827 and in a few years was completed from Charleston to Hamburg and over the Savannah river to Augusta, Ga. In 1834 it was the longest continuous line of railroad in the United States

or Europe. The first locomotive built in the country was constructed for the South Carolina railroad. This engine, bearing the name "The Best Friend," ran for many years with great success. A queer accident happened to "The Best Friend." The engine had a negro fireman, unused to the ways of steam, who became much annoyed at the sound of escaping steam of the safety

The result was an explosion that de-Frank Meyer of Detroit is spending stroyed him and partly destroyed the engine. "The Best Friend" was soon rebuilt and put back upon the track tined to appear in any dictionary, and to do its accustomed work. The distance from Charleston to Hamburg, history of words to find that when we 135 miles, was performed in daylight, from six in the morning to six at night.

> Who Calls the Frogs? Frogs and toads in winter are deeply buried in the mud or beneath some stump, log or stone. Nature awakens them at the proper time, however, of a "still" we mean a distillery. says Nature Magazine. How it is that they know when it is time for them to come forth is one of the mysteries of nature that has never been satisfactorily solved. Nevertheless, they are never late.

The pigs, dogs and goats found on every Balinese farm are kept in a separate hut. The loan huts are usually built upon wooden elevations and are exceedingly ugly and ungainly. On each farm one will also find

bamboo baskets to house the fowls. Words We Have Clipped A few years ago a music-hall come-

dian made a great hit by clipping familiar words, and we still hear him imitated in colloquial conversation, vance. valve. He tied down the safety valve. London Tit-Bits says. People say "im poss" for impossible, "biz" for business and "pash" for passion. But such clipped words are not desrain. we must go back much farther in the say: "He led the van," we mean the as I arrive, to make sure." "vanguard"; when we speak of a pair of van horses, we mean "cervan"; when we retire to the "drawing room," we ought to say the with-drawing back."-Windsor Magazine. room; when we talk of a "hobby" we refer to riding a "hobby-horse"; when we talk of sport we mean "disport," of "tending" we mean "attending," or a "cute" lawyer we mean acute, and

Refuge in Silence

Mrs. Scrubbs, whose highly colored imagination was well known in her neighborhood, was called as a witness in a damage suit. "The evidence which you will give to the court shall be the truth, the whole truth and nothing but the truth," said the clerk. "Yes," quavered Mrs. Scrubbs, now thoroughly frightened and unable to was the heroine. "Well," asked the judge, "what have Journal.

you got to say about the case?" "Well, judge," she replied, "with the limitations I've just had put on me, I don't think I've anything at all to say !"

Fair Enough Rents were exceedingly high in that part of the city in which the young couple felt they had to live. After they began to get discouraged. At length, after looking at one that just suited them, they expressed indignation when the agent told them the rent would be \$150 a month. "I can't ask less, because of the view," the agent said. The Super-Salesman **KEERS BUSINESS GOING**

When sales begin to slacken, the super-salesman redoubles his efforts and gets business by constantly using Long Distance.

He keeps covering more territoryhe goes after more prospects and keeps orders coming in by using Long Distance.

In three hours he can talk, by Long Distance, with prospects that he would not be able to call upon, in person, in weeks.

Business houses can help their salesmen by including in their catalogs and literature, directions for the placing of orders by Long Distance.

The saving of time and money to producer, wholesaler and retailer is reflected in the cost to the consumer.

MICHIGAN BELL TELEPHONE CO. BELL SYSTEM

One Policy, One System, Universal Service

- C.F. Numetal Weather Strips will do this. They are inexpensive, quickly and easily installed. It is not necessary to remove the window sash when installing. 14141 FOR OLD OR NEW HOMES
