## FLOUR MILL DESTROYED BY FIRE; \$25,000 DAMAGE

Fire of unknown origin burned the Wilson Grain Co's. flouring mill early Tuesday morning. The milling machinery and building were worth about \$25,000.

At about one o'clock last Tuesday morning an alarm of fire was sent to the East Tawas and Tawas City fire departments. The East Tawas firemen having received the alarm first were the first ones to arrive on the scene, but were quickly followed by the local fire fighters. The East Tawas department turned a stream from their chemical engine on the flames and soon three streams from the Tawas City fire engine were playing on the burning building. The fire had however, gained too much headway and within thirty minutes the plant was completely burned.

Owing to the walls being covered with corrugated iron and the roof with composition roofing the surrounding property was not greatly endangered.

This plant was built about 18 years ago by the Michigan Cereal company for an elevator. At the same time this company built elevators at Hale and Whittemore. The plants were built principally for handling peas which at that time was one of the leading crops of this section. Through crop failures the pea industry declined and about ten years ago the Michigan Cereal company disposed of the elevators, the Tawas City plant to the Wilson Grain company. At the time of transfer, G. G. Hood, now of Saginaw, was manager.

Shortly before the war the plant was equipped with flour milling machinery and a large quantity of flour was produced for the government. During the past three or four years the mill has not been used but the building was used for storage purposes. At the time of the fire there were 150 barrels of cement and a car of salt stored here, which was burned as well as the mill supplies and milling machinery.

The loss is partly covered by insurance.

## SPORTSMEN GIVE MANY REASONS FOR HUNTING

Ask men why they go hunting! They'll give you many reasons. Some prosperous business or professional men, probably will tell you that there's no better preparation for the winter's work than some time spent in the open with their Remington in hand, matching their quickness and wits against those of the game they're hunting. They'll say there's no pep-producer that can compare with the air of this "season of mists and mellow fruitfulness," redolent with the tang of the forest or the salt of the bay—that hunting's a real efficiency measure. To bring home a good bag a man must be on the alert!

Others will declare that now the country and the woods are at the height of their beauty. Many of the trees are beginning to put on their gorgeous russet, scarlet and gold coats of autumn foliage. The landscape on every side presents a panorama in which they delight.

Still others prize most highly—beside the never-to-be-forgotten thrill of hunting—a pleasure of a more material kind; appetizing dishes that are fit for a king; roast duck, broiled grouse or squirrel pot-pie—yum!

There are most as many reasons given for going hunting as there are hunters, but all agree on one thing; not to go hunting is to miss a barrel of fun, to pass up a big part of the joy o' life.

## TWO WHITNEY FARMERS TREADED BY ANGRY STEER

Last Friday while Fred Rollin, Jr., and Will Oats, two Whitney farmers, were driving a bunch of cattle along the highway, a steer from the herd ran amuck forcing the two men to climb trees. Coburn, who is employed at the farm, tried to prevent the steer from entering the yard, but he was unsuccessful, being knocked down and trampled upon. Mr. Coburn suffered severe injuries.

## Why the FLORENCE is the Best Heater

The Florence construction adds to the ordinary heating power of the fuel, the heating power of the gases evolved from it. By burning the gasses emanating from the fuel in the process of combustion, saves the user what has heretofore passed up the chimney and been wasted in other makes of stoves.

### AS A RESULT---

The Florence stove requires less fuel to obtain the desired temperature of the air, a large saving in fuel bills is effected and an excessive accumulation of soot in the pipes and chimney is avoided.

The Florence burns anything combustible and leaves less ashes than any other stove.

**Make Each  
R.R. Crossing  
A Stop Street**

Most Michigan cities compel motorists to bring their cars to a full stop before crossing any heavy-traffic street.

This law is universally approved. It saves time and averts accident. It is wise and fair.

Yet heavy motor vehicle traffic is far less dangerous to you than a railroad train. Speed is the very essence of Railroad service. A train cannot stop quickly. Nor can it turn out to avoid hitting you.

Six states have already passed laws, making stop streets out of Railroad intersections. The time may come when the State of Michigan will compel you by law to thus protect yourself.

But, why wait for law, when you have common sense?

Determine today that, from this time on, you will always bring your car to a full stop before crossing a Railroad track, anywhere—any time.

Everybody will approve your good judgment. Many will follow your example. And you will be relieved forever from the possibility of this, the most serious of common accidents.

THIS IS A STUDEBAKER YEAR

The New Studebaker Big Six Duplex-Phaeton

**Two Cars in One—  
An open and closed car combined**

STUDEBAKER Duplex—a closed and open car combined. An entirely new-type car—developed by Studebaker and available from no other maker.

It is the most sensational—most talked-of car in America.

One minute you are enjoying the comfort and protection of a closed car—next the unhindered freedom that made the open car so popular. And the change can be made in 30 seconds by simply lowering the roller side enclosures.

Yet, with all this two-fold convenience, the Duplex-Phaeton sells for no more than an open car.

The new Studebaker Big Six is strikingly beautiful—with long, low sweep-

ing lines. It is especially designed and powered for seven-passenger service.

The Big Six Duplex-Phaeton is delivered to you with complete equipment. This even includes two highest grade bumpers, extra balloon tire, tube and tire cover—there is nothing else to buy.

But to appreciate this car you must inspect it—drive it. Test its delightful ease of operation—steering mechanism especially designed for its full-sized balloon tires.

Notice the new location of the lighting switch on the steering wheel—and many other new and unusual features.

See this car that has definitely solved the open-closed car problem.

**Good and Bad Luck**

To balance "unlucky" superstitions there are many "lucky" ones. If, when dressing, one accidentally puts on a garment inside out, an unexpected gift will shortly arrive. To carry about a coin with a hole in it is to secure one's self against misfortune, and if swallows are permitted to build near a house, the owner need not trouble to take out a fire insurance policy, for fire will never attack a dwelling thus protected.

**Painful Beauty**

**Where Walnuts Flourish**

Commercial success in growing the English walnut is found only in southern California. In the Eastern states, so far as the present data show, it may be said that the Persian walnut flourishes on all soils upon which the black walnut is found, and under favorable conditions on some others. Sandy loams, clay loams and gravelly loams if not too open, are suitable for the growth of this tree.

**Here Are Lions**

At the corner of old maps of the world, of the Fifteenth century, may be noted a large, blank space, without form and without name, whereon these three words are inscribed: "Hic sunt leones."
