

WEEKLY NEWS ANALYSIS

By Edward C. Wayne

Landing of Naval Forces in Iceland Brings Speculation on Future Moves Of U. S. in Setting Up Defense Bases; Shaded Communiques Dim War Picture

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.) (Released by Western Newspaper Union.)

Dr. J. C. McCracken, superintendent of the American Hospital for Refugees in Shanghai, China, is pictured with two of his charges from the baby clinic. The children seem to be thriving on meals made up of cracked wheat, which they consider a luxury. The Red Cross bags are then cut up and used for making clothes for the children.

ICELAND: A Move

The sudden step which President Roosevelt took in ordering the occupation of Iceland by American naval forces, and the plan to thus relieve the British in the handling of that distant adjunct of the occupied Danish kingdom not only clarified the present foreign policy but brought repercussions on both sides of the Atlantic.

These were both favorable and unfavorable to the move, the British hailing it with obvious delight as "putting teeth" and definiteness into the U. S. policy of insuring arrival of lease-lend aid and the fullest co-operation short of war with Britain.

The Axis powers, as were to be expected, were quoted variously as vigorously opposing such action which, apparently, they did not learn of until it was an accomplished fact. The Germans said the U. S. now had troops "in the war zone" and could expect results; the Italians called it a "provocative" step; and the Japanese called it "de facto American entry into the war."

These sentiments were echoed on this side of the water by the chief opponents of the administration, Senator Wheeler not only being outspoken against it, but drawing White House fire for having announced the rumored objective before it took place, thus, according to a White House secretarial statement, "jeopardizing American lives."

More interesting were the speculations concerning future moves, the Nazi sources recalling in their comment on the President's action the fact that he had spoken previously of the strategic import, from a Western hemisphere viewpoint, of the Azores, the Cape Verde islands, and Dakar, African port.

The President also made clear that geographical definitions of the Western hemisphere, as far as he is concerned, do not make much difference, and that when one is defending a certain section of the globe, it is more important to "out-guess the other fellow" than to draw geographical limitations on your activities.

RUSSIANS: A Picture

Gradually, as the Russo-German war moved into the latter part of the first month, a growingly clearer picture of the situation could be obtained.

Stripped of equivocal communiques, and delving behind these with the aid of town names and general lines, here was the portrait of conditions at that period:

The Germans, together with their allies, had attacked along a 1,100 mile front, with initial quick success in the extreme north, in the central district, and a slower success in the south.

This continued, with the Russians falling back and burning towns and supplies as far as possible for about a week or 10 days.

Then the German advance ran into the Stalin line and an entirely different tempo of Russian resistance. It was almost as though a large train had run into a resilient obstacle, which halted it gently and then even began to shove it backward.

The Russian communiques painted this picture as far more favorable to the Reds, and the Germans minimized or ignored things, and spoke of everything being "expected," and "running on schedule." All this, of course, might be true, depending on the schedule.

From other points came data, however, tending to show that the German machine had perhaps not met its master, but at any rate a foeman worthy of its steel, and one that was not going to be a "push-over" in the sense of previous opponents.

Iceland Leader

Shown here is Hermann Jonasson, prime minister of independent Iceland, who approved President Roosevelt's dispatching of American forces to take over defense of the island from the British.

LEASE-LEND: Aid Speeding

A report that President Roosevelt was going to ask for another large lease-lend appropriation to add to the seven billions of dollars, a goodly portion of which was spent and all of it allocated, was coupled with the statement that American lease-lend aid to Britain is now moving at a speedier clip.

The statement was made that a ship a day, approximately, is docking and unloading at Red sea ports, not accounting for such others as may be arriving in convoy in England itself.

If these ships are well loaded with the munitions of war, then the British commands in North Africa as well as on the British Isles should be having measurably strengthened their hands.

The period in which General Auchinleck took over and General Wavell gave up the North African command was followed by a continuation of the inactivity which had marked this stalemate.

But as soon as the Syrian peace was announced, it was expected that the North African battle would be resumed, and that the new general plus his new equipment, would make a determined effort to release the long-besieged garrison of Tobruk.

KNUDSEN: And Rubber

The statement by William S. Knudsen, of OPM, making a tour of the defense production areas, that he had little worry about the rubber situation, despite the fact that the government, foreseeing a shortage, had ordered the tire makers not to use more rubber than they had in the first six months.

Mr. Knudsen said that the rubber situation was this: that even if the supply of real rubber was cut off, the industry knew enough about synthetic rubber manufacture to pick right up and continue the supply of suitable tires and other articles without feeling the shortage of the actual article at all.

A talk with rubber experts revealed that while some disagreed with Mr. Knudsen, the outstanding majority believe it could be done, and with ease. Said one:

"We can make a tire that will outlast and outperform a real rubber tire right now. All that is needed is for our factories to make slight changes in technique."

"If our supply of raw real rubber were cut off, here is what I think would happen. Factories would be started in construction to manufacture hundreds of thousands of tons of synthetic rubber."

"While we were waiting to get them in production, we have six months' supply of sheet rubber on hand, and for another six months we could operate with mixtures of reclaimed rubber and synthetic rubber, and so, in the 12 or 14 months that it would take to get the new factories built and in operation there would be no lost motion at all, for we have inventories of finished tires that would last about six months."

He could say little about the price of such tires, but some experts thought they might be slightly more expensive than rubber tires at first, until the "know how" had been achieved in making them.

MISCELLANY:

London: Nazi fliers dropping incendiaries and bombs over England were beginning to mix leaflets with them, announcing in the English language, "The Battle of the Atlantic is being Lost."

Berlin: A German newspaper editorially commented on the occupation of Iceland: "This is a stab in the back of a nation wrestling with Bolshevism."

Moscow: Women and children, heeding Stalin's request for guerrilla action on German forces in the rear of the front line, are joining such bands. Moscow sources claimed that these bands had accounted for 18 tanks.

London: When the war is won, say British political leaders, a Pan-Slav agreement whereby Russia, Czechoslovakia and Yugoslavia and Poland will join a united and organized front contiguous to Germany, was envisioned.

Getting Ready to Take on 'All Comers'

These are days when many nations are preparing against invaders. At the right, British soldiers are shown jumping a trench during a theoretical attack, and the upper picture, which was made in Northern Ireland, shows the men going through a barbed wire entanglement. With Holland in Nazi hands, Netherlands Indies soldiers are ready to fight for the Pacific islands. At left, Indies artillery men are handling an anti-aircraft gun while wearing gas masks.

Royalty in Exile—in England and Egypt

King Peter of Yugoslavia (extreme left) who lost his throne when the Nazis steamrolled through the Balkans, shown in London. At the right, King George of Greece and members of his family rejoice. Left to right: Princess Cathrine, Princess Mary, Prince George, Prince Peter and King George. The king and his party took to the hills when Nazi parachutists invaded Crete, finally boarding a ship for journey to Egypt.

Hot? Look at This and Cool Off

Usually the month of July is the year's hottest, and snow is just so much "wishful thinking." But here we see Marianne Newton (left), U. of Utah senior; Wanda Pratt, U. of Arizona student; and Barbara Kollin, U. of California sophomore, reversing the order of things by shoveling July snow at Cedar Breaks national monument high in the mountains of Utah.

First Barrage Balloon at Fort Davis

Balloon barrage crew of the 301st barrage battalion at Fort Davis, N. C., shown inflating a D-5 dilatible type which holds 27,000 feet of helium. It is made of synthetic rubber fabric, and can be inflated in less than a half hour. This is the first barrage balloon to be inflated at Fort Davis.

Released

P. G. Wodehouse, noted British author, is free again. He was captured by the Germans in the fall of France, and has been released from the Silesian internment camp and granted full freedom within Germany. He is shown here (left) on visit to Berlin.

'Iron' Man

Ald. L. E. Couplin of St. Louis is finding real work pleasant. Because he had grown flabby, Couplin went back to iron working, his trade before entering politics, and is making \$70 a week. He still holds his aldermanic job at \$1,800 per year.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON (Consolidated Features—WNU Service.)

NEW YORK.—A few years ago, Anita Loos' maid used to deliver to her every day a dash of gopher dust from Harlem. We haven't heard whither this still goes on, but the charm seems to be still working. All goes well as "Blossoms in the Dust" gets warm, almost fulsome from the critics. Miss Loos did the screen play for Ralph Wheelwright's story. It taps deep founts of tears and ranges far from Miss Loos' "Gentlemen Prefer Blondes," and its Lorelei Lee, the alluring and unabashed golddigger of 1925. It's one of those "where are they now?" stories, with Miss Loos sitting pretty, literally and figuratively, as a deft, swift, workmanlike story adapter, scenarist and remodeler in Hollywood—one of the best.

The pint-size girl with bangs—weight 87 pounds, height four feet, eleven inches—was riding on the train from California to New York in 1925, considerably bored. She started writing up this golddigger Lorelei, with a soft-stub pencil, in big, round letters. The manuscript strung along clear through Kansas and Indiana and on to New York, and was almost as big as Miss Loos, what with those big ropetrick letters, when she landed here.

It brought her something over \$600,000. It was translated into virtually every language except Eskimo and pigeon-talk, and in England its sales passed those of any other American book. She later wrote "But Gentlemen Marry Brunettes."

Her talent for humor may have been inherited from her father, a country newspaper publisher and humorist of the Bill Nye school, of Sissons, Calif., where Miss Loos was born. She was a shy, quaint little thing, hanging around the newspaper shop, helping polish up a gag or feed the flatbed. When she was 14, she sent a story to the New York Morning Telegraph. They printed it. A year later David Griffith sent for a girl who had sent a scenario which had set his assistants to whooping joyously.

"What can I do for you, my child?" he asked when the tiny girl with bangs and pigtailed came in. The Loos girl showed him her summons to Hollywood. There she was and is. In the years between she had become a pretty good actress, appearing in San Francisco and other California cities.

JUST a year ago, Roger L. Putnam, go-getting mayor of Springfield, Mass., was much in the news with the Putnam plan to break bottlenecks in industry. He caught the nation's attention by his success in achieving co-operation among the city, industry and labor, the most important detail of his formula being the training of labor by the city, to fit specific needs. He's in the news as Springfield's defense director with some snappy suggestions about the swift and effective integration of civilians and officials, and private and public facilities. His successful battles with two floods and a hurricane give weight to his words.

Management, Over Finance, Rapidly Forging Into Lead

He's Harvard, 1915, did a P.G. stretch at M.I.T., worked at engineering and was in the navy in the World War. In the navy he learned to crochet cord belts, an art which he still practices, and Putnam-made belts are in great demand among his friends. He is the father of three boys and three girls, 48 years old, stocky in build, but quick-moving both in person and speech. He is president of the Package Machinery Co.

More and more management, as above, is coming to the top, as against finance. Note James Burnham's new book, "The Managerial Revolution,"—malign over there, still benign over here.

A WIZARD in electrometallurgy is Dr. Francis C. Frary, who explains the exact uses to which aluminum pots and pans may be put in expediting defense. Since 1918 he has been director of the research laboratories of the Aluminum Company of America at Keystone, Pa. His work made possible over 2,000 uses of aluminum.

He was schooled at the University of Minnesota and the University of Berlin. He then taught for seven years and became an industrial research worker in 1915.

Operations for Knee Injuries Now Quite Safe

By DR. JAMES W. BARTON
(Released by Western Newspaper Union.)

TODAY'S HEALTH COLUMN

ONE of the injuries football, basketball, baseball players and other athletes sustain is a loose cartilage in the knee. This cartilage serves as a cushion between the two bones forming the knee joint and as the knee joint supports the whole weight of the body, anything that disturbs that cushion means not only a painful knee but a knee that will not support the weight of the body.

My own treatment in "fresh" injuries was to strap the knee up with adhesive tape, replacing the tape every few days for two or three weeks. In more severe cases, the knee was placed in a plaster cast for three to five weeks.

The question naturally asked is why did these loose cartilage cases undergo operation? To be quite frank, it was not until recent years that the physician or surgeon has felt free to recommend operation because so many operations resulted in a "stiff" knee; in fact, very little motion remained after operation.

These knee injuries are just as common today as ever, but if adhesive or plaster cast treatment fails to give results, most physicians feel free to recommend operation owing to the satisfactory results which are now obtained. These satisfactory results have been obtained because the patient now receives a thorough examination and any infection—teeth, tonsils, sinuses—is removed before operation.

Reports Results.

In recording his results in operation of 50 of these cases, Dr. Harold R. Bohlman, Johns Hopkins university, in the Journal of the American Medical Association, outlines his method of preparation, recommends the use of a local instead of a general anesthetic, the complete removal of blood from the joint, and injection of air, with gentle movement of the joint within a few days after operation.

The hospital stay is from three to seven days instead of the two or three weeks of former years.

Hernia Treatment For Elderly Folks

ALL physicians have patients consult them regarding a hernia or rupture. In nearly all cases, the patient being well and strong, operation has usually been advised. Operation means getting rid of a truss.

Fortunately, with the discovery of injecting hernias, this method makes operation unnecessary in about one-third of all cases.

Some older patients with hernia who have perhaps worn a truss for 30 or 40 years and have never liked the idea of operation may be wondering whether the injection method is suitable in old cases or in old individuals.

Dr. L. Manoil, New York, in Archives of Surgery, Chicago, presents some figures regarding the injection method. During the period between February, 1936, and February, 1939, 158 hernias in 123 patients (some with hernia on both sides) were treated by the injection method in Dr. Manoil's clinic. Ninety-two per cent of these cases were between 41 and 90 years of age. The hernia returned in 26 patients or about 16 per cent of this group and five patients were operated on after injection, making total failures about 20 per cent. In the 15 patients between 11 and 40 years of age, no hernias returned. There were no infections and no deaths.

From the above figures showing that four of every five older patients were cured by the injection method, Dr. Manoil believes the injection method should be used in older patients who are considered poor surgical risks, and because of their state of nutrition, or other condition present. It should also be used in younger patients who refuse operation but are willing to undergo the injection method even though it takes weeks and months to bring about a cure.

QUESTION BOX

Q.—Acid fruits cause me to break out with hives. Should I avoid these foods, thereby depriving myself of necessary vitamins?

A.—You are sensitive or allergic to certain foods. If you want to be free of hives, you'll have to avoid the foods you "know" cause them. Treatment is to start with a very small amount of the food or foods causing the hives, gradually increasing the amount until system can take them without disturbance.

NOW A 5-DAY WEEK FOR A&P EMPLOYEES THROUGHOUT THE NATION

Stores Will Be Open Six Days A Week As Usual But No Employee Will Work More Than Five Days

Two months ago this company tried the experiment in a few eastern states of a five-day work week for our retail store employees. Now we are able to announce that we have adopted the five-day week as our national policy.

- This, we believe, constitutes the first five-day week and the shortest general working hours of any major retail food establishment.
- This shorter work week will be in effect before Labor Day in A&P food stores in thousands of communities throughout the country. It will be extended as far and as fast as possible. Frankly, however, we must recognize that in a few states and a number of cities the introduction of this policy may be delayed or even prevented by state or local labor regulations or local agreements.
- A&P food store employees affected by this policy will work only five days a week although stores will be open six days a week as usual. Their weekly salaries will not be reduced by their shorter work week. Our policy is to continually improve working conditions and salaries as evidenced by the fact that during the past year alone we have been able to make actual wage increases and to pay added compensation to our employees in an amount totaling more than \$4,000,000.
- Many people are utterly astounded at the new low prices for quality foods in A&P Super Markets. They are getting so much more and better food for the same money, that they wonder how we can do it. Frankly, it is simply because A&P Super Markets represent a new, more efficient, more economical way of distributing food to the public.
- This new, shorter week is still further evidence that the tremendous savings you can now make in buying groceries, meats and fresh fruits and vegetables in the great, new A&P Super Markets are made possible by savings through efficiency, and that no part of these savings comes out of the wages of our employees.

For many years it has been a source of pride to us that we have been able generally to maintain the highest average wage scale and the shortest general working hours in a field where long hours have been traditional. Since we first cut the work week eight hours in 1916, there has been a long record of further reduction in hours, increases in wages and vacation schedules.

Because our new low prices have resulted in increased patronage, we have been able to further reduce our operating expenses and increase our efficiency and still further improve the working conditions of our employees.

At the same time thousands of families will testify that they buy their foods today at lower average prices in A&P Super Markets than in any group of stores in the highly competitive retail food field. Today, when you spend a dollar in one of our stores, more of that dollar actually purchases food and less of it goes to cover distribution costs and profits than ever before in the history of the food business.

There is no conflict between low prices and good working conditions. We have achieved both by constantly improving methods of bringing food from producer to consumer, cutting

out waste and unnecessary handling operations along the distribution route.

The new A&P Super Markets have made possible savings so astounding that we would not have believed them possible five years ago. This year we are paying the highest wages for the shortest work week in the history of the food business and yet our customers throughout the country will save more than \$50,000,000 on the food they buy as compared to the lowest prices we could charge on the basis of our own operating expense only five years ago.

We are more than ever conscious, in these unusual times, of an obligation to make every possible contribution to the American standard of living. We know that we are making it possible for the average family to buy more good food for the same money, or to buy the same quantity of food for less money.

We are happy to tell you that you can enjoy these savings with the knowledge that the people who serve you in our retail stores are sharing more than ever before in these good things. This means a better standard of living for you and for those who serve you.

This plan will necessitate slight adjustments in store hours which will be announced locally. We respectfully ask our customers for their cooperation and assistance in making this new schedule a success.
