

**WHO'S NEWS THIS WEEK**

By LEMUEL F. PARTON  
Consolidated Features.—WNU Release.

NEW YORK.—One fancies that the least of current worries of Col. Julia O. Flikke, superintendent of the army nurse corps, is involved in the question whether or not she is entitled to retain the silver eagles which accompanied her new commission as colonel.

By the same token the commission itself seems to be in danger as a result of the prying of legal comma hunters who after the manner of their kind are probably rejoicing in a point they have extracted from their study of the law creating the army of the United States. The law says that "qualified persons" are eligible for commissions. By virtue of this ruling Mrs. Flikke's colonelcy was sanctioned by the surgeon general, the adjutant general and the judge advocate.

High authority indeed; none the less it is questioned that there were no women in the army when congress passed the law; that, therefore, promotions of women are outside the law. The United States controller general, an important official since he passes on all pay vouchers, is inclined to accept the point raised. If, he says, congress meant women to be eligible for army rank, it would have said so. So there we are and so specifically is Colonel Flikke.

Even should the nice distinction be upheld, she will still, as major, be the highest ranking woman in the United States army. Commander of nearly 10,000 nurses, she is well-fitted to her responsibility, colonel or no colonel. A native of Verona, Wis., she went to Chicago, married there and was there left a widow. She prepared for nursing in the Augustana hospital in Chicago and after a post-graduate course in nursing and administration at Columbia university, she returned to Augustana hospital as assistant superintendent.

When World War I involved the United States she joined the army, serving three years in France, China and the Philippines. Subsequently she was attached for 12 years to the Walter Reed hospital in Washington and in May, 1937, succeeded Maj. Julia C. Stimson as superintendent of the army nurse corps.

Eleven years ago Eugene J. Houdry, a Parisian scientist and inventor, arrived on these shores with his wife and two small children. Established in Philadelphia the family eventually moved to Ardmore, a main line suburb. Then 38 years old, Houdry had been at work in his native country over a period of years on a method for the catalytic cracking of oil by which the crude is converted into vapors at lower temperatures and pressures than had hitherto been used. These vapors, then, are brought into contact with a catalyst and are condensed into their various derivatives in proportions which can be controlled in the operation. In the midst of these researches in France—having already invented a process for obtaining octane gasoline vital to aviation—his money ran out. He could get no more and seeking practical encouragement in the United States, he migrated hither and found two great oil companies eager to finance his laboratory. Some \$10,000,000 was paid out in perfecting Houdry's process and in devising and making apparatus for its use on a large commercial scale.

Now Eugene Houdry is cited as having succeeded in applying his catalytic cracking process to the commercial production of butadiene—something for which an eager public has been waiting since war began and our supply of rubber was cut off. For butadiene is the main ingredient of a very fine brand of synthetic rubber. Consequently, if all is well with the Houdry process, the present shortage in an essential commodity may be overcome much sooner than had been hoped.

In such case a currently dreaded event will be postponed, if not forever averted—the requisition of your tires by the government. Immersed since his arrival in this country in scientific research Mr. Houdry, now a naturalized citizen, found time after the fall of France to help organize here that aggressively militant organization, "France Forever," a large national group of Free Frenchmen of which he is the president and its chief spokesman. "Only here," he has said, "could I have achieved such scientific success as has been vouchsafed me."

**WEEKLY NEWS ANALYSIS**

**International Court and Police Force For Postwar World Envisioned by Hull; Nazi Drive Increases Russia's Peril; Rommel Stymied by Allied Air Power**

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)  
Released by Western Newspaper Union.

Maj. Gen. Carl Spaatz, chief of the American air forces in the European theater of action (left), pins the Distinguished Service Cross on Maj. Charles C. Kegelman. Taking part in a recent bombing raid on enemy airfields in Holland, Kegelman brought his ship back safely after one motor was wrecked and a wing damaged in fighting with German air forces.

**POSTWAR WORLD: Hull Envisions**

When silvery-haired Cordell Hull broadcast an appeal for a safe and saner postwar world, it was clear that a majority of Americans agreed with his thesis that the peace as well as the war must be won by the United Nations if future chaos is to be avoided.

In an address heard around the world, the secretary of state made these points:

1. The United Nations' immediate problem is to win the war—decisively.
2. After the war surveillance must be exercised over Germany, Japan, Italy and their satellites by the United Nations until the aggressors prove their willingness and ability to live at peace with other nations.
3. Disputes must be settled by peaceful means. An international court of justice would provide respect for law and obligations.
4. Freedom is to be assured by removal of economic and political shackles. Errors of extreme nationalism that caused the present war must be avoided.

**EGYPT: Air Power Tells**

It had become increasingly clear that air power was assuming a decisive role in the fight for Egypt. Steady reinforcements of the British air arm had enabled the Imperials to launch an offensive along the 35-mile front from El Alamein on the Mediterranean to the Quattera marshes, paced by an RAF onslaught that drove Nazi planes from the sky.

The British drive dislodged the Nazis from oft-disputed Tel el Eisa (Hill of Jesus) in the north and succeeded in making considerable headway along the center.

Activity by the Allies had followed a week-long assault by American and British planes and British warships on the North African coastal highway on which German Marshal Rommel had rushed reinforcements to offset the capture of 6,000 Italians on the Egyptian front in previous engagements. In raids covering 275 miles of Rommel's exposed supply route, British planes virtually wiped out the El Daba airport near the Egyptian lines.

**REQUIEM: For U-Boat Crew**

Burial with military honors is the hope of friend or foe alike, if death in battle is the fighting man's lot. Thus a tradition sanctioned by the ages was followed when the bodies of 29 German submarine crew members were buried in Hampton, Va. The victims were the first enemy dead to be landed on American shores since the beginning of the war.

The bodies and a few empty life jackets were all that remained afloat after a destroyer on Atlantic patrol sank the U-boat. The same honors were accorded the enemy as Americans might wish for their own dead, if the circumstances were reversed. Navy chaplains read the requiem. A navy firing squad fired a salute of three volleys. A navy bugler sounded taps.

**HIGHLIGHTS . . . in the week's news**

LONDON: The British information service said that British women are now nearly 100 per cent mobilized. Of 15,800,000 women between the ages of 18 and 64, the agency said, 7,500,000 are doing full time jobs in war production. About 670,000 others are disabled and 5,600,000 are taking care of families. Many others are serving in the auxiliaries of the army and navy.

**RUSSIAN FRONT: 'Terrible Days'**

The gravity of the Russian situation could not be underestimated and no attempt was made to belittle its seriousness. Germany's report of the fall of Rostov emphasized the crisis.

As the sorely pressed Russians guarding the approaches to the Caucasus and the Volga river had fallen back before the million-man German army smashing its way southeast down the Don river valley, the Soviet army organ, Red Star, said frankly: "Terrible days face the country." It called upon the fighting men of Russia to emulate the example of 28 Red soldiers, who in the defense of Moscow last winter, died fighting a tank charge with little more than their bare hands.

The speed of the new Nazi drive against the Reds' celebrated defense-in-depth technique was believed to be due to the Germans' use of a crushing, mass maneuver which employed monster tanks, armored trains, heavy mortars and an unprecedented concentration of air power.

Only comforting note in the bleak picture was the success of Russian soldiers in regaining ground far to the north in their counter-offensive around Voronezh. By turning the Nazis back here, Marshal Timoshenko might be able to take some of the pressure off Red forces in the deep South who had fought with their backs to the wall in defense of Rostov.

**U. S. CASUALTIES: Show War's Trend**

Casualty figures released by the Office of War Information revealed that the navy's losses since Pearl Harbor were 15 times greater than for the entire span of World War I.

The OWI's statistics disclosed naval casualties thus far totaling 12,143 compared with 871 in the first World war. The current casualties included 3,420 killed; 1,051 wounded and 7,051 missing. Those of World War I included 356 killed in action; 58 died of wounds and 456 lost at sea.

The army's losses in the present war, were placed at 19,767. These included 902 killed; 1,413 wounded and 17,452 missing. That the Philippine Scouts trained under General MacArthur had given a heroic account of themselves was indicated by casualties listing 479 killed; 754 wounded and 11,000 missing.

Casualties for all services were placed at 44,433. "The bulk of the army casualties fall into the category of missing," the OWI said.

**FEMINE ARMY: WAAC Trains Hard**

Every morning at 5:45 a. m. from now until next November 9, 800 members of the newly organized Women's Auxiliary Army corps will leap from their army cots to begin a crowded day of drills, lectures and training at their camp at Fort Des Moines, Iowa.

By November 9, America's first feminine army of occupation will begin to spread out to 19 forts throughout the country to relieve men in the armed forces for active combat duty.

**JAPANESE:**

*Mixed Tidings*

Taking their first offensive action in the southwest Pacific since their disastrous defeat in the Battle of the Coral Sea last May, the Japanese landed an invasion force at Buna, 100 miles directly across the eastern arm of New Guinea from Port Moresby, last Allied outpost of Australia.

A Melbourne communique reported that United Nations planes had attacked the invasion fleet and sank a large transport and barge, but did not prevent the landing.

On the Chinese front the Japs did not have such happy tidings to report to Tokyo. First item of bad news was the recapture by Chinese armies of Kienteh, a key point southwest of Hangchow. Second item was a report that United States bombers had sunk two Japanese naval craft on the Fu river in Kiangsi province.

Meanwhile along the Hangchow-Nanchang railway the Nipponese invaders were being constantly harassed by Chinese guerillas. The official Central News agency disclosed that Chinese farmers had been armed with 30,000 rifles in each county of western and southern Chekiang province. They are organized into units strong enough to destroy small enemy detachments. If superior Japanese forces approach, they withdraw, leaving their villages stripped.

**ANTI-INFLATION: OPA Gets \$120,000,000**

Price Administrator Leon Henderson was given \$120,000,000 with which to fight inflation, when the house of representatives agreed to adopt a conference committee's recommendations to compromise its differences with the senate.

The outspoken Henderson thus got \$75,000,000 less for financing his operations than he had originally asked for, but actually \$45,000,000 more than the house had first voted. Political wiseacres observed that the result was simply an illustration of the old game of give and take. Henderson had first asked for more than he expected, the house first voted less than he actually needed. The finale was a compromise satisfactory to all.

**WAR PROFITEERING: Halted by House**

Drastic steps to curb wartime profiteering were taken when the house of representatives passed a bill outlawing commission fees on government contracts, after Chairman Carl Vinson declared that agents, obtaining war contracts for manufacturers were "fleecing American taxpayers."

Testimony presented previously to the house naval committee had disclosed that three Washington firms of so-called "sales engineers" had earned close to \$2,000,000 in commission fees on government contracts in the past six months.

**LEAHY: 'Eyes and Legs'**

Called from retirement to the newly created position of chief of staff to the Commander in Chief, was Adm. William Daniel Leahy, former chief of naval operations and more recently ambassador to Vichy France.

With all the world discussing the prospects of the United States and Britain opening a second front in

ADMIRAL WILLIAM D. LEAHY

Europe this year, the appointment of Admiral Leahy to the new position was hailed as significant of supreme efforts ahead. Regarded as an able strategist, Admiral Leahy, in the words of President Roosevelt, will serve as "his eyes and legs and relieve him of many detail duties." The Chief Executive, however, made it clear that Leahy would not be supreme commander of the United Nations' forces, or even of American forces. Although Mr. Roosevelt did not use the term, it appeared that the admiral would become an assistant commander in chief, ranking all naval and military officers but the President.

**AIR LEVIATHANS: Aid War Effort**

Giant airplanes shuttling across the seven seas carrying men and materials for the world's fighting fronts will become an increasingly important arm of Uncle Sam's service of supply, it was disclosed by Brig. Gen. Harold L. George, commanding the air transport forces, who announced that the army would rely on commercial airlines to operate greatly increased numbers of transport planes.

**Greetings to Leader of 'Fighting French'**

Gen. Charles De Gaulle, left, leader of the "Fighting French" (formerly the Free French) shakes the hand of Lieut. Gen. D. D. Eisenhower, U. S. commander for the European theater on the celebration of Bastille day in London. Adm. H. R. Stark, commander of the U. S. naval forces in European waters (center) looks on.

**Paul Revere Rides Again**

Paul Revere, 25, of Braintree, Mass., lineal descendant of the famous patriot of the same name, is now a buck private in Uncle Sam's army, having been sworn in recently in the presence of cheering troops. He then toured the camp on Duffy, 101st cavalry horse, before donning his uniform. Above, Paul bids adieu to Duffy and takes over with a jeep.

# Common Sense Will Help Smash Summertime's Heat

Dress Lightly, Eat Little but Often, Relax, Don't Get Too Much Sun at One Time, Is Way to Keep Cool.

By CLIFF LANGE

Released by Western Newspaper Union.

Don't let the heat get you down!

Don't let it keep you from working, or eating or enjoying your spare time. Don't let it keep you from sleeping and getting that so very necessary rest.

Science and 1942 ingenuity have gone a long way helping you combat the heat waves. Combine this with the basic aid of forgetting the temperature, and you'll be well on the way to whipping those red hot, "mid-summer blues."

True, you can't do much about lowering the sizzling temperature. You can do a number of things to help keep yourself cool as you go through your daily routine.

For instance, the first thing to remember to do is to "dress cool." Don't wear heavy, tight fitting clothing.

Clothing has been devised—from the time when animal pelts were the style both for man, woman and grown-up children—as a protection from the elements whether sun, rain, snow, sleet or biting wind. Don't use winter style of dressing for the summertime. Shed some of those clothes!

You ladies who are handy with the scissors, needle and thread can whip together some dandy summer work, play or "visiting" dresses easily enough these days. There is still plenty of dress material to be had. Ready-made dresses are also plentiful, and reasonably priced, too.

Take a look at your favorite store. You'll see both plenty of dresses, and material to make them.

There is no reason, either, why the men, young and old, shouldn't be dressed to combat the heat. Many men, when asked why they are dressed so "hot" in the summertime, usually give an answer which seems to suggest they "hadn't thought about it" or "were too busy" to do anything about it. Meanwhile they continue working with the sweat rolling down their temples.

Men are slow in changing to new, even a more comfortable style of clothing. Those that aren't so conservative aren't getting shoved around by the heat this year like their more backward brethren are. They were more willing—i.e., the married men, the fathers—to see their daughters going around in shorts, rather than themselves. When really it was the men, not the women that needed them!

Maybe, when shortages in cloth, dress goods begins to appear, which it hasn't, as yet, it will be the usual thing for the men to be wearing them. What difference does it make whether they are worn driving

## —King Cold—

This method of keeping cool (or cold, if you prefer) is just one of many hundreds of ways available. This young fellow has a look of doubt, a stiffness of form which causes a person looking at him to

wonder whether this is the best method to defeat the heat of summer. Perhaps it is just a spirit of contemplation which has overcome him—lifted him above all mortals, away from mundane thoughts. Or is it?

## 'War Nerves' Even Disturbing Children

The war has created for children many serious problems which American parents and teachers must face. Dr. Clifford E. Erickson of the school of education, Northwestern university, asserted in a lecture of the summer session series at the Evanston, Ill., university.

Basing his conclusions on research studies and confidential documents regarding the effect of the war on English children, Dr. Erick-

son warned that under present conditions it is impossible to protect children from many life situations which have formerly been "tabooed."

"In many cases we can no longer keep children from knowledge of death, dying, disease, wounds, birth, sex, and human nature in the raw," he said, adding that as a result children are emotionally disturbed.

## Best Way

This is one of the nation's favorite ways of cooling off. It doesn't make any difference whether you swim in a private pool, a park, river, pond lake or sea—it does the trick.

The summer sun, in seeming retaliation, shows its resentment on

thousands of swimmers every day by giving them a severe case of sunburn, or blistering.

Enjoy your swim, but don't take too much of the sun at one time.

who complain. They, too, should be made as comfortable as possible. They, too, are the ones who should be reminded that what they formerly used to do, "just to help out," shouldn't be done in the hot weather. For there is a debilitating effect of the sun quickly noticeable on the aged and weak.

One of the pleasures of the summer months are the outdoor picnics, the family reunions, the parties and fishing trips both for the youngsters and the grownups.

Although rubber restrictions will cut down on many of the long auto trips on such picnics and outdoor excursions, it won't—at least it shouldn't for the ingenious—cut down on the outings held in the nearby woods, or even in the side, or back.

It is on such picnics, and side-yard excursions that real summer time meals, old style "Dutch Lunches" can be served. Meals having salads, cold cuts, cheeses, lemonade, iced-tea, iced-coffee, and other fruit juice drinks.

The little extra equipment needed for such meals that break the monotony of eating indoors all the time is available at any of the local retail stores. It used to be during the not far past days that it was thought necessary to travel 15 to 50 miles to a favorite picnic spot. There there would be the steak fry on the fire pits, or the weiner roast.

Today, with plenty of room available, alongside or behind the house, or in the field or woods near home, there is no reason why similar "picnic" equipment isn't available. The war hasn't stopped, in fact, couldn't stop, American ingenuity.

Many times, too, in the desire to cool off there were long trips to distant pools, or "favorite" spots on lakes and rivers. Today, when rationing has stopped that there is no reason why the shower equipment at home shouldn't be given an extra workout.

You know, just because it used to be only the kids who had a good time with the outdoor shower is no reason why you couldn't enjoy one, too. Of course if you dislike the idea of imitating the kids and enjoying the whirling spray, why not rig up an outfit for you and the rest of the older persons.

Such an outfit could be dropped from one of the trees in the yard, or attached to a post used for the washline.

This war has brought the people of the nation more closely together than at any time since the advent of the automobile. This year there'll be more local entertaining, visiting, and genuine social life than ever before.

Common sense will take care of most of the heat's oppressiveness. That which can't be taken care of should be treated as a matter of fact. A matter of, "Well, this is the summertime. It should be hot."

This summer has seen, and will continue seeing until the days cool off, plenty of local picnics in which various successful means to combat the heat have been achieved.

You can do more about taking care of the heat by actually doing something to counteract the effects of it. Talking about the weather, about "how hot it is" isn't doing you any good, nor the person saying it.

You got to help yourself, and those not able to help themselves, if you want to let Mr. Sun continue working while you do.

## IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

#### ABRAM: A PIONEER IN FAITH

LESSON TEXT—Genesis 12:1-9; Hebrews 11:8-12. GOLDEN TEXT—Fear not, Abram: I am thy shield, and thy exceeding great reward.—Genesis 15:1.

Without faith it is impossible to please God (Heb. 11:6). The opposite is also true, namely, that faith always pleases God. As we read the Bible and consider Christian experience, it is evident that God is constantly longing to show Himself strong in behalf of them who believe Him (II Chron. 16:9).

Abraham was not the first man to walk by faith. Before him came such men as Abel, with his acceptable sacrifice; Enoch, with his walk pleasing to God; Noah, who believed and obeyed; and others.

But Abraham was nonetheless a pioneer of faith. He had many other noble characteristics, and was a man of such distinction that his memory is venerated by Jews and Mohammedans as well as Christians. Yet his real claim to an outstanding place in history is that by faith he responded to God's sovereign act in choosing him to begin a new nation, to be His chosen people.

We note two important points about faith:

#### I. Faith Makes Demands.

In the very nature of things, faith calls for action consistent with belief. "Faith without works is dead" (James 2:20), that is, not a real faith at all. In Abraham's life (and in our life) faith calls for:

#### 1. Separation (Gen. 12:1).

"Get thee out" was God's command to Abraham. To accomplish His divine purpose God had to take him out of the heathendom of his fathers, and start anew. It is His command to His followers today, "Come out from among them, and be ye separate, saith the Lord" (II Cor. 6:17).

Who will doubt that this is the crying need of the church today, for instead of the church being in the world seeking to win it to Christ, worldliness has come into the church and devitalized its message.

#### 2. Obedience (Gen. 12:4-6; Heb. 11:8, 9).

"Abram departed, as the Lord had spoken" (v. 4). He didn't know where he was going, but he did know who had called him, and he went. Faith knows God, and obeys Him without hesitation and without reservation.

Obedience is a virtue that needs to be revived, in the home, in school, in society, and especially in our relation to God, for there surely should be no disobedient children in the family of God. He merits and expects obedience.

#### 3. Trust (Gen. 12:7-9; Heb. 11:10).

An assured reliance on the Word of God is a part of faith. God made a promise to Abraham. He accepted it, and worshiped. Here was no questioning, no bargaining, but simple trust in God's word. In fact, there was anticipation of even greater things to come (Heb. 11:10).

We need men of vision and that means we need men who by faith can see the unseen, who can see "a city which hath foundations" even in the midst of destruction and disorder. "In God We Trust" must be more than a motto on our coins if America is to survive.

#### II. Faith Brings Results.

The world wants to know if a thing works before accepting and approving it. Well, faith really does work! It brings:

#### 1. Blessing (Gen. 12:2, 3).

God is always on the giving hand. "I will bless," was His word to Abraham, not only for Abraham himself and for the great nation of which he was to be the father, but to "all the families of the earth" (v. 3). How gloriously that promise was fulfilled in the coming of Christ our Redeemer, who also was a "son of Abraham" (Matt. 1:1).

#### 2. Protection (Gen. 12:3).

"I will curse him that curseth thee." That promise to Abraham is still binding and valid. God is not through with Israel. The nations and persons who have vented their hatred upon the children of Abraham need to take notice.

We need to be reminded that God's protecting care is just as sure over us who bear His name. We too are "safe in Jehovah's keeping," even in what is perhaps the darkest hour in the history of the world. Faith in God brings to us the protection of His almighty hand.

#### 3. Fulfillment of Promise (Heb. 11:11, 12).

The entire promise to Abraham hinged on the birth of a son, something which was, humanly speaking, beyond all possibility. But because Sara, joining Abraham in believing God, "judged him faithful who had promised," it came to pass.

"With God all things are possible" (Matt. 19:26). He delights in doing the impossible in response to the faith of His children. Apart from that fact we might be fearful, yet despondent, but "with God" we say again, "All things are possible."

## PATTERNS SEWING CIRCLE

IN SPITE of record heat—relax and enjoy life in this open top princess line frock! It has straps only over the shoulders and is cut to emphasize your slim waist. Hemmed above the knees this style makes the smartest of tennis dresses! Regular length, it is a wonderful heat defier, and, worn with a jacket, is a smart costume for any daytime occasion.

#### All-Day Dress.

LONG straight lines running from shoulder to hem of this dignified frock give it a smooth silhouette which is flattering for every wearer. The detailing of the side pleatings and the soft gathers at the waist add style interest too, to a model which is ideally suited to the season's smartest cotton materials—printed pique, linen, lawn or rayon prints. It is

#### Such a Racket Couldn't Be Kept From Landlord

The landlord was showing a prospective tenant the premises. Everything seemed to be satisfactory, when the landlord spoke up. "You know, we keep it very quiet and orderly here," he said. "Do you have any children?"

"No, just my wife and myself," was the reply. "Do you have a piano, a radio, or a phonograph?"

"No." "Do you play any musical instruments?"

"No." "Do you have a cat, or dog, or a parrot?"

"No, but I feel that in all fairness I must tell you my fountain pen scratches when I write with it."

Medical officers have long recognized tobacco as an aid to morale among our armed forces. Surveys among the men themselves have shown that tobacco is their favorite gift. If you have a friend or relative in the Army, Navy, Marines, or Coast Guard who smokes a pipe or rolls his own, nothing would be more appreciated than a pound of his favorite tobacco. Prince Albert, the world's largest-selling smoking tobacco, in the pound can be recommended by local dealers as an ideal gift for men in the service.—Adv.

#### Give Up "Makeshift" Constipation Remedies!

Why fool with constipation? Why try to combat the trouble after it has already made you miserable?

It may well be that your constipation is caused by too little "bulk food" in your diet, for medical science warns that lack of "bulk" is one of the commonest causes of constipation.

If yours is this kind of constipation, those purges and cathartics can give you, at best, only temporary relief. Eating KELLOGG'S ALL-BRAN regularly, on the other hand, corrects the cause by supplying the "bulk food" you lack and must have! Enjoy this crisp, crunchy cereal daily, drink plenty of water, and like so many others, you'll "Join the Regulars" ALL-BRAN is made by Kellogg's in Battle Creek. If your condition is not helped by this simple treatment, see a doctor.

**Dunking Old Idea**  
Dunking in your "bunchum" is a custom as ancient as Arabia. It was there where the world's first cup of coffee was made from some strange, bright red berries the Arabians called "bunn." The beverage became "bunchum" and was thick enough to scoop out of the bowl with bits of food. Result: Introduction of dunking to the world!

I . . . . . being duly sworn, depose and say that I am and duly qualified elector of the . . . . . precinct of the township of . . . . . or village of . . . . . or the . . . . . ward of the city of . . . . . in the county of . . . . . and state of Michigan: that my postoffice is No. . . . . street . . . . . or R. F. D. No. . . . . P. O. . . . . that I am not now registered as an elector therein and that I am voting by absent voter's ballot at the election (or primary election) to be held upon the . . . . . day of . . . . . 19 . . . . . which ballot accompanies this affidavit, that I make this affidavit for the purpose of procuring my registration as an elector in accordance with the statute, that I make the following statements in compliance with the Michigan election law: Age . . . . . Race . . . . . Birthplace . . . . . Date of naturalization . . . . . I further swear or affirm that the answers given to the questions concerning my qualifications as an elector are true and correct to the best of my knowledge and belief.

Taken, subscribed and sworn to before me this . . . . . day of . . . . . A. D. 19 . . . . .  
Notary public in and for the county of . . . . . State of Michigan.  
My commission expires . . . . .  
Upon receipt of such affidavit in the time specified herein, the clerk shall write in the registration book the name of the applicant together with other information required by this chapter and such applicant shall thereupon be deemed to be duly and properly registered.

**Note**—If this acknowledgment is taken outside of the state, the certificate of the Court that the person taking the acknowledgment is a notary must be attached.  
**Registration of Absentee by Oath**  
If any person whose name is not registered shall offer and claim the right to vote at any election or primary election, and shall UNDER OATH state that he or she is a resident of such precinct and has resided in the TOWNSHIP or CITY TWENTY DAYS next preceding such election or primary election designating particularly the place of his or her residence and that he or she possesses the other qualifications of an elector under the constitution, and that owing to the sickness or bodily infirmity of himself or herself or some member of his or her family, or owing to his other absence from the TOWNSHIP or CITY on public business or his or her own business, and without intent to avoid or delay his or her registration, he or she was unable to make application for registration on the last day provided by law for the registering of electors preceding such election or primary election, then the name of such person shall be registered and he or she then may be permitted to vote at such election or primary election. If such applicant shall in said matter, wilfully make any false statement, he or she shall be deemed guilty of perjury, and upon conviction, be subject to the pains and penalties thereof.

**Provision in Case of Removal to Another Precinct**  
Any registered and qualified voter who has removed from one election precinct of a township or city to another election precinct of the same township or city, shall have the right on any registration day, as in this act provided, on application to the township or city clerk, as the case may be, to have his name transferred from the registration of the precinct from which he has removed to the registration book of the precinct in which he then resides. Such elector shall have the right to have the right to have such transfer made on any election or primary election day,

by obtaining from the board of inspectors of such election or primary election of the precinct from which he has removed, a certificate of transfer, and presenting said certificate to the board of election inspectors of the precinct in which he then resides. In every such case of transfer the township or city clerk or the board of inspectors issuing such certificates shall cause opposite the name of such elector, to be entered in the column headed "Remarks" in such registration book, the words "transferred to the precinct number . . . . . (giving the number)" together with the initials of the said clerk or some member of the board of inspectors of election, as the case may be, and the date of the transfer: Provided, That any city may provide by its charter or by resolution duly approved by a majority of the members of its legislative body for the transfer of electors as herein provided on the last Saturday prior to any election or primary election at the several places of voting in the voting districts of such city instead of an election or official primary election day, and may in like manner further provide that no transfer of registration shall be received by the clerk of such city for a period not exceeding 10 days prior to any primary or election. # GHOST PLANE

By ARTHUR STRINGER  
W.N.U. SERVICE

**THE STORY SO FAR:** To help his partner, Cruger, keep Norland Airways in business, Alan Slade agrees to fly a "scientist" named Frayne and his assistant, Karnell, to the Anawotio river in search of the trumpeter swan. With the proceeds Cruger gets a new plane, a Lockheed, which is stolen while Slade is away. The plane must be found, or Norland Airways is through. When he returns Slade starts out again, with only two meager clues, to recover the plane. The first clue is the "devil bird," the eskimo, Umanak, believes comes from Echo Harbor. The second is Slade's hunch that the lost plane and the swan-hunter, Frayne, are somehow connected. He flies back to where he left Frayne, only to find that Frayne is apparently just hunting swans. There is no sign of the lost plane.

Now continue with the story.

## CHAPTER X

He would be glad, he knew, to hear the roar of that engine again. He even quickened his pace as he recognized the cove where his ship was anchored.

Then his gladness vanished and a tingle of apprehension went through his body. For as he glanced down at the waterfront he saw that his mooring lines had been cast off and his plane was adrift. He could see it moving in the freshening breeze, circling slowly about until the pontoons grounded on a gravel-bar.

His response to that discovery was both immediate and unreasoned. He went sliding down the ridge side and splashing through the shallows as he rounded the cove end. The intruder aboard the plane must have seen him as he went.

Slade could make out a wide-shouldered figure clambering down to a float, a figure that hesitated for only a moment and then leaped into the shallow water and waded ashore. Once ashore he slipped away into the spruce slopes and was lost to sight.

Slade's first impulse was to race after him. But the most important thing, he remembered, was his plane. He went splashing out and climbed aboard. There his quick eye inventoried his instrument board, assessed engine and controls, and discovered no damage to his ship. His smile was grim as he replaced the breaker assembly which was essential to the life of his motor. Its absence, he suspected, had kept that wide-shouldered intruder from taking off and disappearing into the unknown. And that wide-shouldered skulker, he had every reason to believe, was Frayne's man Karnell.

Indignation was still burning through Slade's body as he gunned the motor and rose into the air. He circled twice over the lakeside spruce slopes, searching without reward for any sign of life there. Then he veered back and circled twice over the island-studded water where he knew Frayne's observation post to be. But the only sign of life he caught from that quarter was the sudden wing-flutter of a huge male trumpeter, who interrupted his watchful driftings to lift his long neck and fling a cry of defiance up at the cloud-cleaving wings of his rival. Slade caught the sound of that trumpeted challenge, even through his engine roar, as he turned south and headed for the camp at the mouth of the Kasakana.

Slade had the feeling of being in more friendly territory when he saw Lake Avikaka once more under his floats. But no welcoming figures emerged from the shack as he circled over it in the evening light. No kindly old voice called out to him as he moored beside the landing stage.

That left him both puzzled and depressed, until his ear caught the sound of a distant detonation. He knew well enough the meaning of that blast. It meant that Zeke and Minty had foregone their usual supper hour to keep on with their mine work, delving like badgers along some new drift or pounding rock at the bottom of some new test pit.

Slade, standing back between the shadowy ore piles, could see Zeke crimp a mercury cap with his teeth and stick it into a dynamite cartridge before disappearing in the pit mouth. It was that old sourdough's fixed rule, he remembered, never to use powder until down to hard rock. Their methods may have been those of a passing generation, but they had found something worth while. For after a second detonation and a second scrambling down the pit mouth Slade could hear Minty's cackle of triumph as he inspected a fragment of blue quartz which Zeke's tremulous fingers held just under his nose.

"She's rich, all right," cried Minty. "You can see her with the naked eye."

"She's the best yet," Zeke agreed as he continued to squint at the ragged quartz slab. "And now we know she's there, you old thimble-ribber, it's about time to call it a day."

It was then that Slade called out to them. That call, through the long-houred evening light, caused Minty to wheel about with a startled grunt at the same moment that Zeke's long arm swung out to catch up a rifle that had rested unseen against the windlass frame.

"Put it down, you old quartz-chipper; put it down," was Slade's cry as he advanced toward them.

The two taut figures relaxed. The

A figure that hesitated for only a moment and then leaped into the shallow water.

hostility went out of their faces. But Zeke's eyes remained troubled.

"You mustn't do things like that, Lindy. I might've given you an air hole through the esophagus."

"I'd rather you gave me a meal," said the new-comer, as they shook hands and headed toward the shack.

"You're too old to keep to a sixteen-hour day like this."

Minty pointed an accusatory finger at the flyer.

"So you're givin' us the go-by these days?" he questioned.

"What does that mean?" asked Slade as they trudged shackward.

"Weren't you in this neighborhood two nights ago?"

"So you're givin' us the go-by these days?" he questioned.

Garden—Fresh Vegetables Bring Health to Your Table (See Recipes Below.)

## Summer Salads

Salads with summertime meals form a perfect alliance bringing your family precious pepping minerals and vitamins. Vitamins A, B, and C are well represented in crisp celery, golden skinned carrots, rosy cheeked tomatoes, green glowing cucumbers and lettuce. Dress them up with a light liquid salad oil blended with seasonings to bring out the hidden flavoring of the vegetables, and you have a perfect warm weather meal.

**\*Tossed Garden Salad**  
Wash and drain dry your favorite salad greens—such as lettuce, romaine, watercress or endive; a combination of two or more may be used. Cut or break into pieces and combine with portions of diced celery, cucumber, green pepper, radishes and minced onion. Chill thoroughly. Then place in a salad bowl; add Basic French Dressing and bits of tomato. Toss lightly until well blended. This type of salad may also be served with just an oil and vinegar combination as a dressing.

**Basic French Dressing.**  
(Makes ¼ cup)  
½ teaspoon salt  
½ teaspoon sugar  
¼ teaspoon paprika  
Dash white pepper  
½ teaspoon dry mustard  
½ cup mild salad oil  
¼ cup cider vinegar or lemon juice

Combine first five ingredients in a jar and blend well. Add vinegar, cover and shake; add oil and shake again thoroughly. Just before using, shake again. Or simply mix ingredients together in a bowl and beat with mixer until well blended.

Leftover meats and vegetables served daintily in lettuce cups make tempting main dishes for lunch or supper. Have a hot soup, potato chips, thin bread and butter sandwiches and fresh fruit to serve with salad. The next three salads are perfect as a main course.

**Veal Salad, Summer Style.**  
(Serves 6)  
2 cups cold veal, diced  
1 cup string beans or celery or both  
6 hard-cooked eggs  
Salt and pepper  
4 tablespoons salad oil  
1½ tablespoons vinegar  
3 tomatoes  
Mayonnaise  
Lettuce and parsley

Chop eggs coarsely, combine with veal, oil, vinegar, salt and pepper. Let stand 30 minutes. Add mayonnaise to moisten. Arrange salad in a mound and garnish.

**Jellied Green Pea Salad.**  
(Serves 6)  
1 tablespoon gelatin  
¼ cup cold water  
¾ cup pea liquor

Chop eggs coarsely, combine with veal, oil, vinegar, salt and pepper. Let stand 30 minutes. Add mayonnaise to moisten. Arrange salad in a mound and garnish.

**Frozen Fruit Salad.**  
(Serves 6)  
2 three-ounce cakes cream cheese  
2 tablespoons cream  
½ cup mayonnaise  
2 tablespoons lemon juice  
½ teaspoon salt  
1 cup orange sections  
½ cup seeded and quartered Royal Anne cherries  
½ cup chopped nutmeats  
½ cup maraschino cherries, chopped  
2 tablespoons ginger, in  
1 cup cream, whipped

Mix cream cheese and 2 tablespoons cream. Add mayonnaise, lemon juice and salt. Combine orange sections, cherries, and nutmeats, and add to cream cheese mixture. Fold in whipped cream and pour into freezing tray and allow to freeze in electrical refrigerator without stirring. Garnish with orange sections and cherry halves.

## THIS WEEK'S MENU

- Potato Salad
- Cold Sliced Corned Beef
- Tossed Garden Salad
- Bread and Butter Sandwiches
- Chocolate Pie
- Beverage
- \*Recipe Given

- 1 tablespoon green pepper, chopped
- Allspice, cloves, nutmeg
- Green pepper rings
- 1 cup tomato puree
- 1½ cups peas
- 1 hard-cooked egg, sliced
- 1 teaspoon chopped onion salt
- Lettuce, dressing

Fix gelatin with pea liquor. Add puree, onion, salt, spices. Let cool and thicken. Add peas, chopped green pepper. Mold and chill. Garnish with pepper rings, egg, and lettuce.

- Royal Meat Salad.
- 2 cups diced, cooked meat
- 1 cup diced celery
- 1 cup Bing cherries
- 4 hard-cooked eggs
- ½ cup chopped pecans
- 1 teaspoon salt
- 1 cup mayonnaise
- Salad greens

Combine meat with celery, pitted cherries, diced eggs, pecans and salt. Chill thoroughly. Just before serving, add mayonnaise and toss lightly. Pile on salad greens and garnish with additional slices of hard-cooked eggs and Bing cherries.

- Savory Corned Beef Loaf.
- (Serves 6)
- 2 tablespoons gelatin
- ¼ cup cold water
- 1½ cups tomato juice
- ½ teaspoon salt
- 1 teaspoon grated onion juice
- 2 tablespoons lemon juice
- 1 teaspoon Worcestershire sauce
- 1½ cups corned beef cut in small pieces
- ¾ cup chopped celery
- 3 hard-cooked eggs, sliced
- ¼ cup chopped pickle relish (if desired)

Soften gelatin in cold water and dissolve in hot tomato juice. Add salt, onion juice, lemon juice and Worcestershire sauce. Stir well. Rinse loaf pan out with cold water. Garnish bottom with slices of hard-cooked egg and cover with a little of the gelatin liquid. Chill in refrigerator until set. Cool remaining liquid until mixture begins to thicken and fold in corned beef, celery and pickle relish. Line sides of loaf pan with sliced eggs and fill with meat mixture. Chill until firm. Unmold on platter and garnish with watercress, lettuce or desired greens. Serve with mayonnaise or any desired dressing.

To save sugar, omit dessert and serve a pretty chilled salad with coffee and wafers as a last course. You can prepare this in the cool morning hours and keep in the refrigerator until just ready to serve.

Mix cream cheese and 2 tablespoons cream. Add mayonnaise, lemon juice and salt. Combine orange sections, cherries, and nutmeats, and add to cream cheese mixture. Fold in whipped cream and pour into freezing tray and allow to freeze in electrical refrigerator without stirring. Garnish with orange sections and cherry halves.

## HOUSEHOLD HINTS

Chopped ripe olives with the merest dash of garlic make a pungent filling for small white bread sandwiches to be toasted and served with cocktails.

A good way to utilize stale bread is to make crisp rusks to eat with butter and cheese. Break up the bread into fairly equal sizes, dip into a little sweetened milk, and bake in a warm oven until dry and crisp.

Oven pre-heating for short baking jobs wastes heat. Plan to do your baking and oven-cooking at the same time, when possible.

Strained honey, heated and mixed with soft butter and a dash of cinnamon and cloves, gives a delicious flavor to toasted muffins, hot waffles or pancakes.

Copper flashing around pipes, dormer windows and the edges of roofs never needs painting. But copper is now on the priority list. If you have or are installing galvanized flashing, remember that it should be examined frequently and kept covered with paint.

TO YOUR Good Health by DR. JAMES W. BARTON Released by Western Newspaper Union.

VACATIONS NEEDED A news item some weeks ago spoke of a convention of tourist agencies. There was a general feeling that there was no use trying to push the tourist trade during the war as the minds of the people would not be on holidays, travel, or vacations.

One member, however, pointed out that there was never a time when a vacation was needed more by all workers than at this time. The British authorities call the vacations furloughs, which is the name given to the holiday granted soldiers. As a matter of fact, a great many are now working directly or indirectly on war work and need the vacation or holiday which has been shown to help health and morale and increase output of work in the long run.

As to just what vacation one should take, the individual knows best because, after all, to get away from the routine of work at, or away from home, to get a real change is the important factor in getting the most out of a vacation. Doing what you want to do is another large factor in getting the most out of your vacation. The fact that after waiting for months you are now able to do what you have planned to do, gives a vacation a flying start in enjoyment.

Unfortunately, before some can go on a vacation, they have a great amount of work to do—mental and physical—so that by the time they are to go they are completely exhausted. For them to rush off and do what they most want to do—hike, dance, play strenuous games like tennis—is a great mistake with body and mind so tired.

As pointed out before, the word vacation means to vacate, to leave your present surroundings amid different circumstances.

In planning to get the most out of a vacation, I have previously suggested that it is best to rest the first two days of your vacation to get over the tiredness due to getting ready to go. Then, when rested, you can indulge in the swimming, boating, dancing, walking, climbing you had planned. Then, before you return to work or business, spend the last day or two the same as the first two days—resting and loafing.

Preserving The Hearing

As we think of the great number of hard of hearing individuals who are now wearing satisfactory hearing aids we are apt to think that we have reached the point where all the hard of hearing accept this condition and are willing to wear hearing aids. But this is not so.

Dr. C. C. Bunch, Northwestern university school of speech, in an article on the conservation or preservation of hearing in the Journal of the American Medical Association says:

"Recently an employer was asked what his reaction would be if someone asked permission to test the hearing of his employees. He replied that he preferred to let sleeping dogs lie. A locomotive engineer was asked if he would invite some members of his union to come to the laboratory for hearing tests. No charge was to be made and the results were to be confidential. None appeared for the tests."

Why do employers and employees avoid these tests? Employers are afraid that additional legal regulations and questions of compensation will arise. Employees are afraid that it will bring about loss of employment. It is likely that most of us, whether we were employers or employees would do just as this employer and employee did.

However, just a little thought should convince all of us that as most cases of hard of hearing are not in an advanced condition but still have considerable hearing ability, the common sense thing to do would be to find out how much hearing was lost, what was causing the loss, what could be done to prevent further loss and what could be done in the way of treatment or a hearing aid to bring the hearing up to or nearly up to normal.

Dr. Bunch recounts the measures being used in factories, tunnels, airplanes and other places and occupations, to preserve, not restore, the hearing. One of the simple methods used to preserve hearing by shutting out noise is use of absorbent cotton ear plugs, covered with vaseline.

QUESTION BOX

Q.—What is the cause and cure for callouses?

A.—Cause of callous is improperly fitting shoes. Treatment is to soften top layers in one-half ounce of baking soda to a gallon of water. Pare off with a safety razor, but not too close. Then paint on salicylic acid in form of collodion ointment or plaster. Ask your physician to advise you as salicylic acid may cause trouble if applied to healthy tissue.

### Do You Know?

by Dorothy Scott  
Are you having difficulty with your  
fruit canning? Maybe these sugges-  
tions will help you.  
When packing fruit: do a small  
number of jars at a time, and place  
your rubber ring before filling them.  
Work rapidly and keep the product  
hot. Leave the pack loose enough to  
permit the liquid to circulate through  
out. Air bubbles are released when a  
silver knife blade is inserted down  
the inside of the jar. For fruits and  
tomatoes to be processed, leave one-  
half inch of head space. Wipe the  
sealing surface with a wet sterile  
cloth and adjust covers.

Fruits and tomatoes are best pro-  
cessed in hot water bath or heat-con-  
trolled oven. With either method,  
leave space around the jars for the  
heat to circulate especially in your  
oven which heats more slowly. Also  
when oven canning, leave one and one  
half inches of headspace instead of  
one-half inch, and process a half lon-  
ger than the time given for hot-water  
processing. Count the time after the  
bubbles begin to rise in the jars  
indicating that they are about to boil.

In the hot water bath the water  
should be at least one inch over the  
top of the jars, and begin counting  
time when the water boils vigorously.  
Covers are adjusted for processing  
by turning screw tops tight, then  
back on-fourth inch, putting top  
clamp up, and leaving side clamps  
up, or screwing metal bands firmly  
in place on vacuum seal jars. After  
processing tighten screw tops firmly,  
or put side clamps down. Vacuum  
seal jars require no final seal. Cool  
all jars in an upright position as  
quickly as possible by spacing them  
so that air circulates freely between  
them. After cold, remove the metal  
rings. Jars may be inverted to test  
for leaks after they are cold. Wipe  
all jars before storing, and place in  
a cool, dry and preferably dark spot.

Sometimes we use the open-kettle  
method for canning tomatoes and  
some fruits, as well as for jams and  
jellies. With this method, no head-  
space is left in the jar, and the seal  
is completed at once.

### Money Divorce Cause

Money, or rather the lack of it, is  
the most common cause of marital  
troubles, according to Circuit Judge  
Paul D. Barnes of Miami, and he  
should know, for last year he han-  
dled 4,000 divorce cases. "Willing-  
ness to live within income is the  
most important thing I can say to  
young married couples," Judge  
Barnes said. "The tendency to ex-  
ceed income seems to be a fashion  
of the times, but it's probably the  
most disastrous habit married cou-  
ples can fall into."

Avoid "cheap" insur-  
ance. Like anything else,  
in buying an insurance  
policy you get just what  
you pay for. When you  
have an accident, that  
extra dollar or two you  
paid for Complete Pro-  
tection may save you  
thousands of dollars.

The Very Rev. Edmund J. Reilly of  
a Brooklyn church found a note  
on the collection plate signed "Pat-  
rick Gunn," inviting the good man  
to step outside after mass for a fist  
fight. . . In Minneapolis a pretty  
woman walked up to a policeman  
and without ado kicked him smartly  
on the shin. He said "ouch," and  
she let him have another. Her ex-  
planation for such quaint conduct  
was simple. "All my life," she told  
the judge, "I've wanted to kick a  
cop."
